NEPA ENVIRONMENTAL ASSESSMENT

West Virginia School of Osteopathic Medicine
Fredric W. Smith Science Building
400 Lee Street North
Lewisburg, Greenbrier County, WV 24901

Project No. 24-0453

EXECUTIVE SUMMARY

This Environmental Assessment (EA) has been prepared to address the environmental impact of the grant program, Health Resources and Services Administration (HRSA) Fiscal Year (FY) 24 Congressionally Designated Spending Grant (Grant #: CE1HS54324-229767), with renovation and construction activities to be conducted at the West Virginia School of Osteopathic Medicine (WVSOM) Fredric W. Smith Science Building (Science Building), located at 400 Lee Street North, Lewisburg, West Virginia (WV). This Draft EA has been prepared in accordance with the requirements of the National Environmental Policy Act (NEPA), and the Council on Environmental Quality (CEQ) regulations for implementing the procedural provisions of NEPA, and 40 CFR Parts 1500-1508.

There will be no significant environmental impacts consequent to the WVSOM Science Building renovations and addition project. However, there is potential for socioeconomic consequences of this project over time due to the increased size of laboratory space and new programs at the school. This allows for a potentially higher number of students enrolled and subsequent increase in staffing needs. It was determined that environmental and socioeconomic resources that fall under NEPA review would not be negatively affected by the proposed action.

NEPA DRAFT ENVIRONMENTAL ASSESSMENT

West Virginia School of Osteopathic Medicine
Fredric W. Smith Science Building
400 Lee Street North
Lewisburg, Greenbrier County, WV 24901

Project No. 24-0453

1.0 INTRODUCTION

1.1 Background

The proposed project under review includes construction of an addition and upgrades to the approximately 28,500 square foot (sq ft) Science Building that is part of the WVSOM 43-acre campus located at 400 Lee Street North, Lewisburg, Greenbrier County, WV. WVSOM is within a mixed business and residential area. The site location is shown in **Figure 1** of **Appendix A**, which was reproduced from the USGS Lewisburg 7.5-minute series topographic map. A diagram of the site and adjoining properties is included as **Figure 2** of **Appendix A**.

WVSOM is a public osteopathic medical school comprised of approximately twenty (20) school or state-owned buildings and greenspace that was established in 1972. The campus formerly housed the Greenbrier Military School (GMS). Based on a historical review the GMS appears to have operated at the site from 1812 to 1972.

The Science Building, located on a 22.6-acre parcel of the WVSOM campus, owned by the WVSOM Board of Governors, was originally completed in 1991, with a major addition completed in 2007, and a roof replacement in 2013. It is a two-story facility which encompasses approximately 28,500 square feet (sq ft). The Science Building houses the modern gross anatomy demonstration lab for teaching, and a variety of laboratories for basic science and clinical faculty to carry out research projects.

In 2021, WVSOM developed a campus master plan to establish a framework for the development of capital improvements to support the mission, vision, values, and strategic initiatives of the school (**Appendix B**). This included an assessment of existing facilities on the Lewisburg, WV campus and potential upgrades to support its education mission. Some improvements have been completed since that time. However, the Science Building, which was previously identified with the most significant needs in the last master plan, has not yet been addressed.

1.2 Purpose and Need of Proposed Action

WVSOM's proposal is for the necessary maintenance and renovation of the existing facilities and expansion of laboratory and faculty space in the Fredric W. Smith Science Building. The proposal includes:

- Construction of a new addition,
- Increasing the size of the roof-top generator,
- Upgrades to the elevator,
- Installation of Americans with Disabilities Act (ADA) controls on the main entrance doors,
- Resealing cast stone coping and banding,
- Resealing of joints between exterior concrete paving and building,
- Repairs to grading on the northwest corner of the building,
- Repairs of asphalt cracks in the north parking lot,
- Repairing structural wall cracks,
- Repairing a roof leak at the second-floor landing,
- Installation of new acoustic ceilings and LED light fixtures in corridors and laboratories,
- Various repairs and preventive maintenance to exterior and structural systems,
- Various heating, ventilation, and air conditioning (HVAC) including replacing aged chillers and addressing humidity controls in animal holding and laboratory classrooms,
- Interior renovation of the lobby and specialty cabinetry and countertops throughout the facility, and
- Replacement of the fire alarm system to combine the two currently separated units into one single control unit.

The purpose of the proposal includes protection of the health, safety and welfare of students and faculty who use the Science Building through the above-mentioned upgrades and repairs. Elevator upgrades and the installation of ADA controls on the main doors will allow for better access by students and faculty with disabilities.

Without the financial support of the HRSA Grant, WVSOM would not be able to complete the upgrades and expansion of space for laboratory work. This would hinder the school in increasing student enrollment to prevent stagnation of growth and continuing the current and future research projects occurring there.

Currently, WVSOM has a range of 800 to 850 enrolled students per year at the Lewisburg campus. The 2021 WVSOM Master Plan included a reference to a recommendation that the school establish various new programs. One program that is likely to be implemented is a post-baccalaureate program in medicine. Enrollment in this program is anticipated to be 30 to 60 additional students with potential for future implementation of a variety of master's degree programs as well. The current addition and renovations are being performed with that potential growth in mind.

1.3 Alternatives

1.3.1 Proposed Action

The goal of WVSOM's proposal is to increase the life of the current facility, expand the facility, and make it more useful for laboratory research, as well as drawing more students to the school. The 2021 WV School of Osteopathic Medicine Master Plan detailed information about the Science Building and its uses, necessary updates, and the initial plans for additions in 2021. Architectural plans in the current proposal have been revised compared to the 2021 plans.

1.3.2 No Action

The No Action alternative was not considered prudent, as it did not meet the proposed project's purpose and needs. Upgrades and repairs must be made to the Science building for continued use.

1.3.3 Alternatives Considered But Not Carried Forward

There are no alternatives considered for this proposal. Previous alternatives included in the 2021 plan have been discounted due to the location of the planned construction not meeting the specific laboratory needs (**Appendix B**). Therefore, the only potential project plan is the current one.

2.0 ENVIRONMENTAL AND SOCIOECONOMIC IMPACTS

This section describes the existing condition of environmental and socioeconomic resources potentially affected by the proposed actions.

2.1 Physical Environment

2.1.1 Physiography, Geology, Topography, and Soils

Greenbrier County is located within the Valley and Ridge physiographic province of West Virginia, which is between the Blue Ridge Mountains and the

Allegheny Front. It is part of the Appalachian Mountains and extends for 1,200 miles covering approximately five counties and parts of seven other counties in eastern West Virgina. The structural geology of the Valley and Ridge is complex with extensive thrust faults and folds that contribute to the repetition of all the rock formations. The northeast-southwest trending valleys and ridges are characterized by intermittent high ridges and deep valleys. This is the result of the area's predominant geologic process of erosion of sedimentary beds creating alternating anticlines and synclines that run nearly parallel with each other. The valleys range from approximately 500 to 1,800 feet (ft.) below the ridge tops into weaker limestone and shale formations.

Greenbrier County is known for its karst geology, which is an area of limestone characterized by sinkholes, caves, ravines, and underground streams. Karst in the Greenbrier River Valley is found primarily in limestone of the Greenbrier Group, which is about 900 feet thick and contains eight (8) recognized units, most notably the Greenbrier Limestone. Karst of this area has one of the world's largest concentrations of sinkholes per area, with an average of 18 sinkholes per square kilometer. This is a unique problem for development, as the ground is prone to subsidization and developers often build their structures too close to the open spaces beneath the ground.

A United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey was consulted for detailed soil information within the proposed project area. The soil was found to be 100 percent (%) Frederick silt loam, karst, 3 to 8 % slopes. The typical profile includes 0 to 8 inches (in.) of channery silt loam, 8 to 29 in. of silty clay loam, and 29 to 80 in. of channery clay. The parent soil material is clayey residuum weathered from limestone and dolomite (**Appendix C**).

2.1.2 Groundwater

Originally, it was thought that groundwater in Greenbrier County should generally be found in sandstone and carbonate-rock aquifers. However, research suggests that water wells in the area produce water from shale units with the limestones acting as confining beds. The basic hydrogeologic setting includes relatively flat-lying Greenbrier limestone, making up a karst drainage system. Aquifers are recharged by capture of surface streams and water infiltration where they sink once they cross the Greenbrier limestone. Discharge of aquifers outcrop as large springs usually in creek beds, mainly due to underlying shale acting as an aquitard.

Base water level for most of the area is governed by the Greenbrier River and its tributaries. The relief of several hundred feet provides the hydraulic gradient. The area is under drained by an integrated network of caves.

2.1.3 Surface Water

The most prominent surface water in Greenbrier County is the Greenbrier River located approximately five (5) miles from the town of Lewisburg, WV. It is approximately 170 miles long and is the longest unblocked river remaining in the Eastern United States, with no part of the river or its branches dammed. The Greenbrier is formed by the confluence of the East Fork Greenbrier River and the West Fork Greenbrier River, beginning in northern Pocahontas County, and flows generally south-southwest between the Yew Mountains to the west and the Allegheny Mountains to the east, through Pocahontas, Greenbrier and Summers counties. Streams in Pocohontas, Greenbrier, Summers, and Monroe counties flow into the Greenbrier River making up the watershed. The Greenbrier River converges with the Bluestone River and the New River at the Three Rivers confluence in Hinton, WV, creating the New River Gorge National River. The New River Gorge National River, combining with the Kanawha and Ohio Rivers, is part of the Mississippi River watershed which has a drainage area of 1,656 square miles.

The Greenbrier River has multiple access points for recreation activities such as swimming, tubing, kayaking, and smallmouth bass fishing. However, it is currently listed by the West Virginia Department of Environmental Protection (WVDEP) as an impaired stream due to fecal coliform contamination, citing that development has created water quality and quantity issues.

The Lewisburg Municipal Water System treats surface water from the Greenbrier River prior to disbursing to the community, serving approximately 12,000 people.

2.1.4 Floodplain

Based on information provided by the Federal Emergency Management Agency (FEMA) WV Flood Tool, the area is not within any identified flood hazard area (**Appendix D**).

2.1.5 Air Quality

According to a FOIA review, there is limited data on air quality in Greenbrier County, but there are no known air quality concerns. It is not expected that the proposed project will affect the air quality.

2.2 Biological Environment

2.2.1 Threatened and Endangered Species

The United States (US) Department of the Interior (DOI) Fish and Wildlife Service (FWS) Information for Planning and Consultation (IPaC) system was

utilized on March 5, 2025, to determine the effect of the proposed project on threatened and endangered species. Two species, the Northern Long-eared Bat and the Tricolored Bat, and their habitat, were evaluated for the potential to be positively or negatively impacted by the project. Using IPaC, the determination of "no effect" was found for the Northern Long-eared Bat and the Tricolored Bat and documented in a letter with Project Code 2025-0064367 (**Appendix E**). Within the letter, the following five (5) more species are discussed as Proposed Endangered, Proposed Threatened, or Threatened while potentially occurring in the proposed project area, but no determination has been made: Green Floater, Indiana Bat, Monarch Butterfly, Small Whorled Pogonia, and the Virginia Spiraea. These five (5) species either have no proposed critical habitat or the project area lies outside proposed critical habitat area(s).

A request for information regarding rare, threatened, and endangered (RTE) species in the proposed project area was submitted to the WV Division of Natural Resources (DNR) on March 7, 2025. The WV DNR reviewed Natural Heritage Program (NHP) files for RTE species and sensitive habitats, finding that the project lies within the buffer of one RTE species (Candy Darter) and one state rare species (Spring Cave Amphipod). However, they found that there are no bats, reproducing trout streams, or bald eagle nests within the project buffer. The WV DNR information is documented in a letter dated March 7, 2025 (**Appendix F**).

After reviewing the FWS and DNR documentation and considering that the project is located on an occupied campus without habitat for the considered species, it has been determined that there should be no effects to RTE species.

The following table summarizes the findings from the FWS and the DNR:

Common Name	Scientific Name	Listing Status	Determination
Northern Long-eared Bat	*Myotis septentrionalis*	Endangered	No Effect
Indiana Bat	*Myotis sodalis*	Endangered	May Be Present in Area
Candy Darter	*Etheostoma osbrni*	WV Endangered	Project Within Buffer
Tricolored Bat	*Permyotis subflavus*	Proposed Endangered	No Effect
Virginia Spiraea	*Spiraea virginiana*	Threatened	No effect
Small Whorled Pogonia	*Isotria medeoloides*	Threatened	Not Likely to be Affected
Green Floater	*Lasmigona subviridis*	Proposed Threatened	May Be Present in Area
Monarch Butterfly	*Danaus plexippus*	Proposed Threatened	May Be Present in Area
Spring Cave Amphipod	*Sygobromus spinatus*	Rare State Species	Project Within Buffer

2.2.2 Terrestrial Resources

The valleys with their gently rolling surfaces and limestone soils have been devoted to farming since the first settlements, and the multiple counties of the Ridge and Valley Province currently generate three-fourths of the value of agricultural products of West Virginia. According to the 2022 Census of Agriculture County Profile, Greenbrier County has approximately 770 farms. The average farm size is 227 acres, and 98% of the farms are considered family farms. Livestock such as cattle, hogs and chickens, and the associated forage crops such as hay are the most common cultivated. Other top crops grown include corn, soybeans, and apples. Six (6)% of state agricultural sales come from Greenbrier County.

The ridges, covered with regrowth forest of spruce, pine, and northern hardwood, figure prominently in the state's forest industries. These natural features are combined in such a way as to produce one of America's most scenic regions.

Although farming and forestry has decreased in this area over the years, the proposed project and addition to the WVSOM Science Building will not impact these resources in the area. The project is within the city of Lewisburg on the active WVSOM campus and will not affect rural areas, agricultural, or terrestrial resources as it lies within an area already fully developed as a commercial and residential space.

2.3 Socioeconomics

2.3.1 Zoning

Zoning refers to an area's real estate zones differentiated according to land use and building regulations. WVSOM is located within an Educational and Institutional (EI) Zone. The EI Zone is intended to allow for an appropriate setting for public and private educational and institutional facilities. WVSOM is adjacent or near many historically significant parts of Lewisburg, WV. The Greenbrier Avenue Park, which is situated approximately 1,000 ft. west of WVSOM, is part of the Lewisburg Historic District. However, the WV Department of Arts, Culture and History (DACH) provided a letter stating that the proposed project will have no effect on any architectural or archaeological resources (**Appendix G**).

2.3.2 Climate Zones

The International Energy Conservation Code (IECC) defines climate zones with similar weather patterns based on temperature and precipitation. Most of the U.S. is in the Temperate Zone, however, the U.S. Department of Energy (DOE)

Building America Program further designates down to eight (8) temperature zones (1 – 8) and further divides into three moisture regimes (moist, dry, marine) listed at county level. Greenbrier County is listed as IECC climate zone 5 and IECC Moisture Region A. The climate zone of 5A is considered cool and humid.

2.3.3 Community Resources

The Robert C. Byrd Clinic, a comprehensive not-for-profit rural health clinic, is located on the WVSOM campus and provides primary health care to residents of the Greenbrier Valley. WVSOM faculty conduct research and offer clinical training opportunities at the clinic as well (**Appendix B**).

The proposed project will potentially benefit community resources by allowing more laboratory space, increasing jobs, and developing new major areas of study.

2.4 Historic and Cultural Resources

See **Appendix G** for the Section 106 Report requested through the WV DACH State Historic Preservation Office (SHPO). WV DACH provided a letter stating that the proposed project will have no effect on any architectural or archaeological resources.

2.5 Hazardous Materials

The results of a federal and state/tribal regulatory database review by Environmental Data Resources, Inc. (EDR) revealed a facility listing of Resource Conservation and Recovery Act (RCRA) Very Small Quantity Generator (VSQG) and Underground Storage Tanks (USTs) for WVSOM (**Appendix H**). There were listings for off-site facilities as well in the following databases: RCRA Generators, Aboveground Storage Tanks (AST), USTs, and Leaking Underground Storage Tanks (LUST). However, research did not suggest any environmental conditions related to the project site. The following summarizes site-specific information provided by the regulatory databases and other information gathered by EnviroProbe to consider for the project:

- WVSOM is listed as a RCRA-VSQG due to spent laboratory chemicals being accumulated at the Science Building prior to transport and disposal at a licensed disposal facility. No violations were noted, and this listing has no effect on the project.

- The WVSOM facility was found to have records of four (4) USTs that are closed and have been removed from the site. No information associated with leaks or potential contamination was noted and this listing has no effect on the project.

- Asbestos containing material (ACM) was removed from buildings on the WVSOM campus during 2011, 2012, 2015, and 2016. Documentation is contained in the EDR Radius Map Report (**Appendix H**). Based on the date of construction and renovation, the Science Building is unlikely to contain ACM and this listing has no effect on the project.

3.0 SECTION 4(f)

Section 4(f) does not apply to this proposed project due to the funding and approvals not involving the U.S. Department of Transportation (DOT).

4.0 SITE RECONNAISANCE SUMMARY

A site reconnaissance including a tour of the Science building and the surrounding area was completed by EnviroProbe employees Neil Capper and Lucinda Kendall on February 24, 2025. Prior to the site visit, an Environmental Data Resources, Inc. (EDR) search was conducted for the WVSOM address as well. Due to the privacy and dignity of cadaver donors, photographs were limited to specific areas of the Science Building. Photographs were collected outside of the Science Building and in the allowed laboratory spaces (**Appendix I**).

De minimis oil staining on the floor near elevator hydraulic equipment was observed. Staining observed was consistent with drips or seeps that may have occurred during maintenance of the system when the union connecting the service piping to the hydraulic power unit was disconnected. The amount and severity of staining in this area is not considered to affect the project.

Small quantities of chemicals were found in all laboratories. The list of chemicals observed is included in **Appendix J**. All laboratories and chemical containers observed were in good condition.

There were no observations made during this site visit that would indicate a negative impact to environmental or socioeconomic resources.

5.0 LIST OF PREPARERS

This NEPA EA was prepared by Neil Capper and Lucinda Kendall of EnviroProbe Integrated Solutions, Inc. Resumes are included in **Appendix K**.

SURVEY NOTES:

1. TOPOGRAPHICAL INFORMATION IS BASED ON A FIELD SURVEY PERFORMED BY GAI CONSULTANTS IN JUNE 2024.
2. PLAN NORTH IS BASED ON WEST VIRGINIA STATE PLANE COORDINATE SYSTEM, NAD83(2011), SOUTH ZONE, US SURVEY FEET.
3. VERTICAL DATUM IS BASED ON NAVD88(GEOID 18).
4. CONTOURS ARE IN ONE (1) FOOT INTERVALS.
5. UNDERGROUND UTILITIES ARE SHOWN BASED ON SURFACE FEATURES, MARKED WV-811 MARKINGS AND AVAILABLE MAPPING AND MAY NOT BE COMPLETE AND/OR ACCURATE.
6. THE UNDERGROUND FIBER OPTIC LOCATION IS BASED ON PROVIDED MAPPING FROM EDWARD TUCKER ARCHITECTS AND WAS BEST PLACED AND DIGITIZED BASED ON THE SURVEY FEATURES FOR REPRESENTATION ON THE PLAN. THE FIBER OPTIC LINES WERE NOT SURVEY LOCATED/ FIELD VERIFIED.

Executive Summary

1 Existing Building Assessments 1-39

2 Enrollment and Demographic Assessment 40-43

3 Deferred Maintenance Projects 44-51

4 Existing Building Needs 52-55

5 Major Site Improvements 56-71

6 Infrastructure Improvements 72-75

7 Property Acquisition Boundaries..... 76-78

8 New Facilities and Building Sites 79-99

9 List of Capital Projects 100-101

10 Timing, Phasing and Projected Costs 102-106

11 Campus Interaction 107-108

12 Impact on Local Community 109-110

13 Sustainable Campus Planning 111-118

The West Virginia School of Osteopathic Medicine embarked on a campus master planning process to establish a framework for the orderly development of all capital improvements that support the mission, vision, values, and strategic initiatives of the school. The successful master planning process included a comprehensive look at the physical environment and how that helps the school succeed in its educational mission. The Campus Development Plan was prepared with support and input from the administration, as well as the faculty and staff. The consultant team acknowledges this important input and provides our thanks to the following:

Board of Governors

Steven C. Carver	Chair
Robert B. Holstein, D.O.	Vice Chair
J. Fred Earley, II, J.D.	Secretary
Randall Belt, D.O.	
Gregory A. Burton	
Fredrick D. Morgan, D.O.	
Gary L. Poling, D.O.	
David L. Ramsey	
Todd A. Smith, D.O.	
John Garlitz, D.O.	Faculty Representative
Sherri L. Miller	Staff Representative
Aaron T. Byczynski, B.S.	Student Representative

Administration

Dr. James W. Nemitz	President
Larry Ware	VP Finance and Facilities
Dr. Craig Boisvert	VP Academic Affairs and Dean
Leslie W. Bicksler	VP Human Resources
Dr. Edward Bridges	VP Administration & External Relations
Marilea Butcher	VP Communication & Administrative Affairs
Dr. Drema Mace	VP Community Engagement & Development
Jeffrey M. Shawver	VP Legal & Governmental Affairs and General Counsel

Programming Committee

Will Alder	Director of Physical Plant
Dr. Kristie Bridges	Chair Biomedical Sciences/Professor
Ronnie Collins	Director of Admissions
Belinda Evans	Director of Student Life
Dr. Jandy Hanna	Associate Dean Research
Cindi Knight	Bookstore Business Manager
Scott Mitchell	CEO Robert C. Byrd Clinic
Donette Mizia	Assistant Director Foundation
Kim Ransom	Chief Technology Offices
Lance Ridpath	Coordinator of Institutional Research

Dr. Roy Russ	Associate Dean of Preclinical Education
Danny Seams	Assistant Director of Admissions
Jennifer Seams	Registrar
Dr. Gail Swarm	Assistant Dean of Clinical Sciences
Adam Sydenstricker	Director of Food and Beverage
Shannon Warren	Director Alumni relations/CME

Design Team

Adam Krason	Vice President, ZMM Architects and Engineers
Rodney Pauley	Project Manager, ZMM Architects and Engineers
Sam Butzer	Mechanical Engineer, ZMM Architects and Engineers
Ian Haddox	Electrical Designer, ZMM Architects and Engineers
Greg Fox	Land Development Manager, Terradon Corporation
Kristen McClung	Senior Engineer, Terradon Corporation
Shawn Gray	Landscape Architect, Terradon Corporation
Alissa McFarland	Laboratory Consultant
Jill Watkins	Sustainability Consultant

Overview

The West Virginia School of Osteopathic Medicine (WVSOM) commenced the campus development (master) planning process in the Fall of 2020 with a review of previous master plan(s) and an assessment of the existing facilities located on the Lewisburg campus. As the site and building assessment process was being completed, ZMM Architects and Engineers facilitated discussions with the Administration and key stakeholder groups. Due to the ongoing Covid-19 pandemic many of the discussions were held virtually, which permitted more robust engagement and discussions with a broader group of participants. These discussions led to more detailed investigative and planning process to address specific concerns and recommendation. The iterative planning process led to the development of the attached plan, which is based on the following guiding principles:

- The WVSOM has recently undertaken several significant construction projects including the Student Center, improvements to the Lee Street entrance plaza, and the ongoing construction at the Testing Center. Since yearly enrollment to the school is limited (by accreditation) the focus of the current plan is on maximizing and maintain existing facilities (i.e. renovation and deferred maintenance projects).
- Although there is the potential for growth of program offerings (post baccalaureate and master's degrees) identified in a recent Tripp Umbach market opportunity assessment, the initial growth can be accommodated within existing facilities.
- The plan needs to address the Science Building – the most significant previously identified (and uncompleted) need from the last master plan, as well as the Admissions Building.
- The master plan needs to identify long-term boundaries for the WVSOM Lewisburg campus to facilitate the acquisition of adjacent property when appropriate. Completion of a loop road around the campus remains a priority.
- The WVSOM utilizes the master plan to help identify and budget for both maintenance and capital projects. The document needs to contain sufficient detail to help facilitate continued campus improvement.
- Proposed improvements to the campus will be developed and implemented utilizing sustainable design principles with the intent of reducing any negative environmental impact. Future building system replacement projects will focus on reducing energy consumption.

The attached Master Plan document provides the strategy to continue improving the landmark Lewisburg campus in a manner that supports the vision of the Administration, Board of Governors, and the WVSOM community. The plan responds to the existing campus environment, as well as the history, mission, demographics, academic and administrative organization, and student and academic life of the school. The existing campus grounds and facilities were evaluated to quantify and prioritize needs. Property acquisition was investigated to help establish the physical boundaries of the campus. Enrollment, demographics, and program offerings were examined to determine realistic requirements for improved and expanded facilities. The needs were then prioritized, and the proposed timing, phasing, and cost analysis for the plan was developed. The outcome of this process is a realistic strategy to guide the development of the West Virginia School of Osteopathic Medicine in a manner that supports the priorities and vision of the school.

*The following existing building assessments are numbered to match the WVSOM Campus Map

Admissions Center 01

History and Primary Function

The Admissions Center acts as a welcome center for students visiting the WVSOM campus. Perspective students can meet with an admissions counselor and receive a tour of the campus. The one-story building, which was completed in 2005, is comprised of business offices and meeting rooms. The 3,960 sf facility is a business occupancy with an occupant load of 40.

Exterior

The Admissions Center Building envelope is a red brick façade with white metal-clad wood windows and green standing seam metal roof topped with a cupola. The entrances on the north and south ends of the building are highlighted by covered porches with paired white columns. The east and west sides feature large arched windows that are recessed back from the main façade to create a distinctive feature.

The exterior materials, including the roof, appear to be in good condition. There are a few minor maintenance issues that need addressed around the building perimeter.

Interior

Upon entering the building, you arrive directly to a private sitting area for students and visitors. From there, corridors to the left and right lead back to perimeter offices which

surround meeting rooms in the center. The walls are a combination of paint and vinyl wallcovering with stained wood trim around the interior doors and windows.

The interior materials appear to be in satisfactory condition but are worn beyond their expected useful life and need to be updated.

Structural System

The foundation system is shallow cast-in-place concrete. There are no visible problems with the foundation system; however, the concrete slab-on-grade does appear to have settled or experienced some distress. The building has a structural steel framing system with metal studs on the exterior walls. There are no visible problems with the superstructure.

Mechanical Systems

The building is served by three (3) Trane, gas-fired, condensing furnaces with split-system condensing units. One (1) CU was replaced in 2018 with R-410A, other two (2) CU are 2005 vintage with R-22. Electric baseboard heating in entry ways. Building exhaust primarily served by ceiling mounted exhaust fans in toilet rooms. Andover DDC Building Automation System (Mason & Barry).

Plumbing System

The building has a 2" water service with backflow assembly and pressure reducing valve. Did not observe water meter (exterior vault). Primarily manually operated fixtures and flush valves, without thermostatic mixing valves (TMV) at lavatories. Fixtures are in good condition. One (1) AO Smith Cyclone vertical tank, high-efficient, modulating, gas-fired, condensing water heaters, making 120 deg. F water. There is a DHR recirculation pump.

Fire Protection System

Entire building is provided with a wet-pipe fire suppression system with indoor detector check, single zone, no FDC or hose connections observed. 4" service into building. Fire alarm panels and equipment are EST.

Electrical Systems

Electrical Service is 400 Amp, 120/240V, 1PH. Siemens brand service entrance and branch panels. Facility does not have emergency power generation. There is not sufficient physical space in the electrical rooms for any major upgrades. There is sufficient spare capacity in the electrical panels for minor upgrades and additions. Fluorescent interior lighting and HID exterior lighting throughout facility. fire alarm control unit and devices are Edwards EST Fireshield. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Main Building A (Quad) 02A

History and Primary Function

Part of the historic Main Building complex along Lee Street, this facility was once the barracks for the Greenbrier Military School. The facility is four stories tall and was originally constructed in the 1920's and has had several renovations over the years, with the last major one in 1993. It is currently being used for both administrative offices and PBL classrooms. The 40,485 sf facility is a business occupancy with an occupant load of 405.

Exterior

The exterior building envelope consists of brick on the outside perimeter and EIFS on the interior courtyard. The openings are aluminum windows and hollow metal doors. Overall, the envelope is in good condition; however, minor repairs are needed to several EIFS locations. The roofing system is a single-ply roof membrane and needs to be replaced.

Interior

The Quad Building's interior finishes are beyond their useful life. An interior renovation is recommended to remedy this and correct minor code deficiencies.

Structural System

The foundations are assumed to be shallow concrete spread footings. Review of exterior conditions around the perimeter revealed minor foundation cracking which is allowing water infiltration. Unless remedied, the freeze and thaw cycle will continue to escalate the deterioration of the concrete. Based on the type and configuration of the building, it is

assumed that the framing consists of structural steel. Observation of the exterior and interior did not reveal any issues related to superstructure.

Mechanical Systems

Entire building served by 4-pipe, chilled water, heating hot water fan coil units in each individual space. Building is not provided with any ventilation outdoor air. Heating and cooling equipment is at the B-Building. There are two (2) RBI model FB100, 85% efficient boilers (B-1 and B-2) with inline boiler pumps and starters only (HWP-3 and HWP-4), and two base-mounted heating hot water pumps (HWP-1 and HWP-2) with VFDs in the basement of the B-Building. There is one base-mounted chilled water pump (MSCHWP-1) with a VFD in the basement of the B-Building. A second chilled water pump is currently being added. There is one (1) 140-Ton (nominal) McQuay model AGS140 air-cooled chiller with R-134A refrigerant located on the roof of the B-Building.

Building exhaust primarily served by ceiling mounted exhaust fans in toilet rooms. Andover DDC Building Automation System (Mason & Barry). There are multiple electric wall heaters in corridors around open space at interior of building. Data rooms are provided with a DAIKIN VRV split-system with indoor, cooling units. Condensing unit sits on roof of B-Building. Second floor data room was hot, wall-mounted cooling unit was not functioning. Fourth floor data room provided with two (2) ceiling and one (1) wall mounted cooling unit, as well as a wall-mounted humidifier (non-operational).

Plumbing System

Domestic water is served from main service entrance in B-Building. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Domestic hot water served from the basement of the B-Building. Fixtures are in good condition.

Fire Protection System

Building is not provided with a sprinkler system but does have a fire alarm system. 4th Floor Data Room is provided with SIEMENS clean agent (waterless) fire suppression system. Fire alarm panels and equipment is EST. This building is connected to the fire alarm in the Library and Buildings B, and C.

Electrical Systems

Electrical power is provided by the electrical service located in the basement of Building B; GE brand branch panels. There is sufficient physical space and spare capacity in the electrical rooms and panels. Facility has a mixture of Fluorescent and LED interior lighting and LED exterior lighting throughout. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Main Building B 02B

History and Primary Function

Part of the historic Main Building complex along Lee Street, this facility was once part of the Greenbrier Military School. It three stories tall and was originally constructed in the 1925 and has had several renovations over the years, with the last major one in 2001. The building is currently being used for both administrative offices, classrooms and instructional lab space. The 60,376 sf facility is a business occupancy with an occupant load of 900.

Exterior

The exterior building envelope consists of brick and stone veneer. The openings are aluminum windows and hollow metal doors. Overall, the envelope is in good condition. A recent masonry restoration project and current roofing project should allow the exterior envelope to perform well for several years.

Interior

Many recent renovations have resulted in a variety of interior finishes throughout Building B. Some are in very good condition. Others are beyond their useful life and should be replaced. It is recommended that a major interior renovation be undertaken throughout the entire Main Building Complex to not only bring the interiors up to date, but also for consistency. Certain locations within the building appear to be under-utilized and could be converted to more appropriate student lab space or study areas.

Structural System

By all indications, the existing foundations are shallow concrete footings. The ground floor level consists of a concrete slab-on-grade. The review of areas inside the building did not reveal any significant foundation problems. Review of areas outside the building revealed several minor problem areas.

Existing structural drawings were not available. Evaluation of the existing architectural drawings show the structure consists of various systems. Of the floor systems that could be observed above ceilings, there appears to be cast-in-place flat concrete slabs. Other areas showed a cast-in-place concrete joist system. The columns appear to be cast-in-place concrete.

Mechanical Systems

Single-story tiered classrooms are served by two (2) AAON packaged DX (R410A), gas-fired rooftop air handling units. There are two split systems that serve the electrical room and A/V control room located between the classrooms.

The three-story front office area is served by Daikin Variable Refrigerant Volume (VRV) R-410A split systems. There are multiple condensing units installed on the roof, and there are separate indoor units (ceiling and wall cassettes) provided in most offices, conference rooms, and corridors for individual space temperature controls. There is a McQuay model MPS030 gas-fired and R-410A DX refrigerant Dedicated Outdoor Air System (DOAS / DOA-1) installed on the roof. There is an Addison Dedicated Outdoor Air System (DOAS / DOA-4) with a split system R-410A condensing unit and electric heater installed in the main basement mechanical room. There is a second Addison Dedicated Outdoor Air System (DOAS / DOA-3) with a split system R-410A condensing unit and electric heater installed in a small basement mechanical room. The DOAS units provide ventilation air to the corridors and the VRV ceiling cassettes, with the roof mounted DOAS serving the upper floors, and the split-system DOAS units serving the lower floors.

There are miscellaneous exhaust fans and one lab exhaust fan with stacked discharge located on the roof. There is a small DATA closet on the first floor near the old bookstore that is provided with a split-system cooling unit. There are multiple hot water and electric cabinet wall heaters in corridors and vestibules or building entrances.

Plumbing System

The building is served by one (1) Rheem/Ruud vertical tank, high-efficient, 250 MBH, 100 gallon, modulating, gas-fired, condensing water heaters, making 125 deg. F water. A 1" domestic cold water (DCW) main service enters the building and expands to 2" DCW piping provided with a backflow preventer assembly. This serves Buildings A, B, and C. Water meter is outside the building. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition.

Fire Protection System

There is a 50 HP fire pump with a jockey primer pump served by a dedicated 4" service located in the main basement mechanical room. The fire pump is not on emergency power. There are two separate, 4" FDC's located on the front of the building. There are sprinkler heads provided in all office spaces, there are risers with hose connections in the stairwells, there are hose cabinets in the corridors, but there are not sprinkler heads installed within the corridors. Fire alarm panel and equipment are EST Master. This building is connected to the fire alarm in the Library and buildings A, and C.

Electrical Systems

In the basement there are two separate electrical service points. Each service point is clearly marked as being one of two (for safety and shutdown). There is one (1) 2000 Amp, 208Y/120V, 3PH, 4W service Main Distribution Panel (MDP1) which primarily serves distribution and sub-panels. General Electric MDP, distribution, and Sub-Panels. This service is original/older. The other is an 800 Amp, 480Y/277V, 3PH, 4W service Main Distribution Panel (MDP2) which primarily serves the heating and cooling pumps, and the air-cooled chiller. General Electric MDP, distribution, and Sub-Panels. This service is much newer. All electrical gear has sufficient breaker space available.

The building does not have emergency power generation. LED interior and exterior lighting throughout. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Main Building C 02C

History and Primary Function

Part of the historic Main Building complex along Lee Street, this facility was once part of the Greenbrier Military School. The three-story building was originally constructed in the 1925 and has had several renovations over the years, with the last major one in 1997. It is currently being used for administrative office space. The 22,166 sf facility is a business occupancy with an occupant load of 222.

Exterior

The exterior building envelope consists of brick and stone veneer. The openings are aluminum windows and hollow metal doors. Overall, the envelope is in good condition. A recent masonry restoration project should allow the exterior envelope to perform well for several years. The roofing system is a single-ply roof membrane and needs to be replaced. Exact date of installation is unknown.

Interior

Most of Building C's interior finishes are beyond their useful life. An interior renovation is recommended to remedy this and correct code deficiencies.

Structural System

The foundations in Building C appear to be concrete shallow footings. The condition of the exterior walls indicates no significant problems with the foundations.

Some of the floors consist of steel bar joists and wire mesh-supported concrete slabs. Other areas used concrete joists with pre-cast concrete slabs. There were no problems observed with any of these major systems.

Mechanical Systems

The three-story front offices are served by Daikin Variable Refrigerant Volume (VRV) R-410A split systems. There are multiple condensing units installed on the roof, and there are separate indoor units (ceiling and wall cassettes) provided in most offices, conference rooms, and corridors for individual space temperature controls. There is a McQuay model MPS015 gas-fired and R-410A DX refrigerant Dedicated Outdoor Air System (DOAS / DOA-2) installed on the roof. The DOAS unit provides ventilation air to the corridors and the VRV ceiling cassettes.

The second floor and third floor DATA rooms are provided with ceiling cassettes connected to the main VRV system for supplemental cooling.

There are miscellaneous exhaust fans and one lab exhaust fan with stacked discharge located on the roof. There are multiple hot water and electric cabinet wall heaters in corridors and vestibules or building entrances. The elevator machine room is provided with a small, residential style cooling unit that rejects heat to above the ceiling. Should consider installing a DX split system.

Plumbing System

Domestic water is served from main service entrance in Building-B. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Domestic hot water served from the basement of Building-B. Fixtures are in good condition.

Fire Protection System

Building is not provided with a sprinkler system but does have a riser with hose connections, and hose cabinets installed in the corridors of each floor. The building also has a fire alarm system connected to Building B's fire alarm. Fire alarm panels and equipment are EST. This building is connected to the fire alarm in the Library and Buildings A, and B.

Electrical Systems

Building C shares an electrical service with Building B located in the main basement mechanical room of Building-B. It has GE brand branch panels. There is sufficient physical space and spare capacity in the electrical rooms and panels. Does not have emergency power generation. LED interior and exterior lighting throughout. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

James R. Stookey Library and OCS Lab 03

History and Primary Function

Originally constructed in 1962, with major additions in 1970 and 1999, this one-story facility has seen a number of different functions. It currently houses the James R. Stookey Library and the Osteopathic Clinical Skills Lab. The library has typical stack layout and staff services on the first floor and a mezzanine level which serves as an open study area. The OCS Lab is a large open room with exam tables and state-of the art monitoring equipment where students learn osteopathic manipulative medical clinical skills. The 23,960 sf facility is a business occupancy with an occupant load of 358.

Exterior

The exterior building envelope consists of brick veneer, aluminum windows and storefront system, and hollow metal doors. Weep holes are missing in some areas and some brick needs to be repointed on all sides. The roof over the Library is a standing seam metal roof which is good condition. The roof over the OCS Lab is a ballasted EPDM and needs replaced.

Interior

The interior finishes are in good condition and consistent with facilities of this type. There is some water damage around windows and signs of movement at Lab exterior wall.

Structural System

The existing foundations consist of shallow cast-in-place concrete footings. The perimeter footings are continuous wall footings with the interior columns bearing on square spread footings. Review of the general levelness of the interior floors revealed no noticeable problems in the floor slabs. The structural system consists of steel columns, roof beams, mezzanine beams, and steel roof joists. The exterior walls of the flat roof section consist of 8" masonry block as bearing walls for steel bar joists. The Library section of the building is a pre-engineered metal building. The mezzanine was added after the construction of the pre-engineered building.

Mechanical Systems

The building is served by six (6) Daikin indoor, split-system DX Variable Air Volume (VAV) Air Handling Units. AHU-1, 2, 5, 6 each provided with R-410A DX cooling coils with modulating heat pump condensing units, hot water heating coils in the reheat position, and a supply fan with VFD. AHU-3 & 4 are provided with R-410A DX cooling coils with dual circuit condensing units (on modulating and one fixed compressor), hot water heating coils in the reheat position, and a supply fan with VFD. AHU-1, 4 & 5 are single zone VAV. AHU-2, 3 & 6 are provided with modulating dampers and hot water reheat coils for individual zone control. Two (2) AERCO Benchmark 750 MBH condensing, high-efficiency boilers, and two (2) base-mounted heating water pumps (HWP-1 and HWP-2) with VFDs provides heating hot water to AHU's and reheat coils. Water softener provided for make-up water to heating hot water system. There are miscellaneous building and toilet exhaust fans located on the roof. Data room is cooled by an AHU. There is a split system cooling unit in the front printer room. Andover DDC Building Automation System (Mason & Barry).

Plumbing System

The facility has one (1) Bradford White 65 MBH, 40-gallon, gas-fired water heater. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition. A 2" water service (combined with Fire Protection) with indoor meter but no backflow preventer.

Fire Protection System

Entire building provided with a wet-pipe fire suppression system with one (1) zone, and an FDC. 4" service into building, serves 2" DCW and then 4" FP. EST fire alarm panels and equipment EST. This building is connected to the fire alarm in buildings A, B, and C.

Electrical Systems

Electrical service gear is 1200 Amp 208/120V, 3PH, 4W. Square-D brand MDP and branch panels. Facility does not have emergency power generation. There is sufficient physical space and spare capacity in the electrical rooms and panels. Facility has a mixture of Fluorescent and LED interior lighting and LED exterior lighting throughout. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry). A white noise speaker system was installed in 2017.

Fredric W. Smith Science Building 04

History and Primary Function

The Fredric W. Smith Science Building houses the modern gross anatomy lab that contains a state-of-the-art ventilation system, abundant natural light, and a multi-purpose anatomy demonstration room that enhances the student learning experience. The two-story facility also houses a variety of laboratories where basic science and clinical faculty carry out research projects. It was originally completed in 1991, with a major addition built in 2007. The 28,480 sf facility is a business occupancy with an occupant load of 402.

Exterior

The exterior building envelope is brick veneer with aluminum windows and doors. The building envelope appears in good condition. The original building had an EPDM roof replacement in 2013 and should perform well for the next several years. The EPDM roof on the addition is in good condition and most likely still under warranty - upon expiration it should be replaced.

Interior

Overall, the interior construction is in good condition and consistent with facilities of this type except for the entrance lobby which needs some attention. The laboratory and research

equipment appear to be in good condition. Currently, WVSOM is replacing specialized cabinetry and countertops throughout the facility.

Structural System

The foundation system consists of shallow spread concrete footings. There is no visible evidence of foundation settlement problems. The flooring in the lobby does having cracking in a pattern that suggests possible settlements or cracking of the concrete slab-on-grade. The building support system consists of masonry bearing on shear walls, steel columns, steel floor, and roofbeams, and joists. There was no evidence of problems with these structural elements.

Mechanical Systems

HVAC Equipment Serving 2-Story Building:

Two (2) 100% outside air, roof mounted, side-by-side, Variable Air Volume (VAV) Air Handling Units (AHU-1 and AHU-2), 100% redundant, each provided with heat recovery coils with glycol and associated pumps, hot water pre-heat coils with face & bypass dampers, steam humidifiers, cooling coils, exhaust fans with VFDS, and supply fans with VFDs. These AHU serve VAV Terminal units for individual zone control. Some VAV are provided with supplementary, low-temperature cooling coils, and some are provided with hot water reheat coils.

One (1) 210-ton (nominal) McQuay model AWS210A air-cooled chiller (CH-1) with R-134A refrigerant, and two (2) base-mounted chilled water pumps (CHP-1 and CHP-2) with VFDs, and three buffer tanks provide chilled water to AHU-1 and AHU-2. One (1) 20-ton (nominal) ArctiChill model PACVMV0200D4 air-cooled, sub temperature (35 deg. F) chiller with R-410A refrigerant and two (2) inline chilled water pumps (CHP-3 and CHP-4) receives chilled water supply from CH-1 and sub-cools that chilled water to serve the sub-temperature cooling coils (CC-3 thru CC-9) provided at the VAV terminal units serving Gross Anatomy, Cadaver Storage, and Embalming.

Three (3) AERCO Benchmark 1500 MBH condensing, high-efficiency boilers, and two (2) base-mounted heating water pumps (HWP-1 and HWP-2) with VFDs provides heating hot water to AHU-1 and AHU-2 and the VAV terminal unit reheat coils.

One (1) Fulton VMP-50, 1992 MBH, 1725 Lbs./Hr., vertical low-pressure steam boiler with make-up water softener system and chemical treatment provides low-pressure steam for the humidifiers in AHU-1 and AHU-2, the domestic hot water heater, cage washers, and the duct-mounted humidifiers at the VAV terminal units serving Animal Holding.

HVAC Equipment Serving 1-Story Building:

Two (2) stacked, indoor, Variable Air Volume (VAV) Air Handling Units (AHU-3 and AHU-4), 100% redundant, each provided with hot water preheat coil, chilled water-cooling coil, hot water reheat coil, steam humidifier, and a supply fan with VFD.

One (1) 150-ton (nominal) McQuay model ALS150C air-cooled chiller with R-22 refrigerant, and two (2) inline chilled water pumps (CWP-1 and CWP-2) with VFDs provide chilled water to AHU-3 and AHU-4.

Two (2) Lochinvar 1300 MBH, 87% efficient boilers with inline boiler pumps (BP-1 and BP-2), and two (2) inline heating water pumps (HWP-1 and HWP-2) with VFDs provides heating hot water to AHU-1 and AHU-2 and the VAV terminal unit reheat coils.

One (1) DRISTEEM steam generator serving AHU-3 and AHU-4 humidifiers (non-operational - OFF).

The General Anatomy Lab and the Anatomy Demonstration Classroom in the single-story addition suffer from temperature and humidity control issues. Consider replacing the existing chiller with a lower temperature unit.

Additional HVAC Equipment:

There is a dedicated, variable volume exhaust system with a roof-mounted utility set exhaust fan and stainless steel ductwork that serves both gross anatomy labs with customized stainless steel cadaver storage containers.

There are miscellaneous building and toilet exhaust fans located on the roof. There is a dedicated refrigerant system for the cadaver storage room (walk-in refrigerator). Andover DDC Building Automation System (Mason & Barry). Elevator machine room is provided with cooling from the AHU. First floor DATA room is provided with cooling from the AHU.

Plumbing System

The building is served by a 2-1/2" main water (combined FP service entrance) with reduced pressure backflow preventer and pressure reducing valve and water meter. Low-pressure steam, instantaneous domestic water heater producing 130 deg. F, no central thermostatic mixing valve. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition. An emergency eyewash station and drench shower was observed in the corridor of the second floor laboratory research spaces.

Fire Protection System

Entire building provided with a wet-pipe fire suppression system with vertical, indoor double check detector, one (1) zone, and an FDC. 6" service into building, serves 4" DCW and then reduces to 4". Fire alarm panels and equipment are Simplex.

Electrical Systems

Electrical service gear is 2000 Amp 208/120V, 3PH, 4W MSB (Main Switchboard), serves a 1000 AMP sub panel on the second floor and a 600 AMP motor control center (MCC). Square-D MDP and branch panels with some breaker space available. ONAN (model 45EM) 45 KW natural gas fired generator with one (1) 125 Amp, 120/208, 3PH automatic transfer switch. Facility has a mixture of Fluorescent and LED interior lighting and HID exterior lighting throughout. Facility has two fire alarm control units connected to each other, both Siemens, one located in the original building and the other in the addition. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Roland P. Sharp Alumni Conference Center 05
and Greenbrier Military School Museum 06

History and Primary Function

The Roland P. Sharp Alumni Conference Center, originally constructed in 1995, is the focal point on campus for alumni gatherings as well as for student, faculty and community activities. It houses the offices of Alumni Relations, Continuing Medical Education and the WVSOM Foundation, Inc. An addition in 2001 included the Greenbrier Military School Museum which contains a collection of donated military memorabilia related to the campus history. The 16,700 sf facility is an assembly occupancy with an occupant load of 1,464.

Exterior

The Alumni Conference Center and Greenbrier Military School Museum are residential style buildings that set on the eastern side of the parade field. The majority of the exterior envelope is brick veneer with white horizontal siding on the gable ends and dormers. Exterior openings consist of metal clad wood windows and doors. The roofing system is primarily asphalt shingles, with a small portion of single-ply roofing on the south side.

At the front of the Alumni Conference Center is a large, covered porch with paired white columns. On the northern end of the Greenbrier Military School Museum is a landscaped area featuring a cannon. A low brick veneer wall in the rear of the facility encompasses a generous concrete paved area for outdoor activities.

The exterior of the building appears to be in good condition, except for some small areas in need of repair. The low brick wall has several areas of damage that need restored.

Interior

There are a number of deficiencies with the interior construction and finishes, mostly due to items that have been heavily worn and are beyond their expected useful life. In addition, it is recommended that the interior finishes be updated to current and expected standards for facilities of this type.

Structural System

The foundation system is shallow cast-in-place concrete footings. Review of exterior and interior conditions did not reveal any foundation problems. The exterior slabs and retaining walls have experienced some problems. The buildings framing consists of wood framing studs, joists, and trusses. Review of the interior conditions and roof conditions (slope and alignment) did not reveal any potential structural problems.

Mechanical Systems

Majority of HVAC equipment serving the Alumni Conference Center was replaced in 2015. There are eight (8) Air Handling Units (AHU) with R-410A split system DX heat pump (HP) condensing unit and electric heaters. Full kitchen with Type-1 exhaust hoods, kitchen exhaust fan, gas-fired make-up air unit, and an Ansul fire suppression system. There are miscellaneous building and toilet exhaust fans located on the roof. A data rack is located in same room as electrical service and domestic water heater and does not have a supplemental cooling system. Andover DDC Building Automation System (Mason & Barry).

Greenbrier Military School Museum served by an existing AHU-9 with split system DX heat pump condensing unit, 20 KW electric heater, and a non-functioning humidifier.

Plumbing System

The building has a 2" incoming water service with backflow prevention device, pressure reducing valve and water meter with bypass. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition. Additional fixtures required for large events. 120-gallon, 15 KW electric water heater. Under floor grease trap in kitchen.

Fire Protection System

Entire building provided with a dry-pipe fire suppression system (routed within attic) with indoor detector check, single zone, compressor station, and an FDC. 4" service into building. Fire alarm panels and equipment are SIEMENS.

Electrical Systems

Electrical service gear is 800 Amp 208Y/120V, 3PH, 4W. General Electric brand MDP and branch panels. Does not have emergency power generation. There is not sufficient physical space in the electrical rooms or available breaker spaces in panels for any major upgrades; most panel breaker spaces are full. Majority of electrical cabling is routed in flexible MC

cabling (non-typical). Fluorescent interior lighting and HID exterior lighting throughout facility. The fire alarm control unit and devices are Siemens. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Center for Technology and Rural Medicine 07

History and Primary Function

The Center for Technology and Rural Medicine (Tech Building), completed in 2006, is a one-story facility on the back portion of campus. Its primary function is to provide 1st and 2nd year students modern lecture hall space for learning. Along with lecture hall support space, the building also houses the campus' main data center and offices for the IT Department and Pre-Clinical Education. The 21,410 sf facility is an assembly occupancy with an occupant load of 537.

Exterior

The lecture halls are set into the slope of the hill with the main entrance lobby and support space on the low side of the building facing towards the main campus. The office space is located on the high side facing the back of campus. The building has a predominately brick façade with cast stone coping and banding. The majority of the roof is flat with an EPDM membrane covering while standing seam, gabled metal roofs highlight the entrances. A relatively new facility on campus, its size, scale and architectural features respond well to both the historic campus and the nearby residential neighborhood.

The exterior materials and roofs appear to be in very good condition.

Interior

The symmetrical interior of the Tech Center is highlighted by a wide, double-loaded hall that runs from front to back with lecture halls on each side and a switchback ramp to allow students to transverse the change in elevation. Exposed steel roof trusses are featured at

the main entrance lobby while the focus above the ramp is a large skylight which allows natural light to pour into the main circulation path. The entrance lobby and ramp have exposed brick on the walls whereas the upper lobby is more consistent with typical office finishes.

The interior materials appear to be in good condition and are consistent with typical classroom and office finishes. Minor problems were noted such as water damage at the window sill near the front entrance, damaged guard rail system at lobby ramp and water damage above a few ceiling tiles. Penetrations need sealed through all fire-rated partitions.

Structural System

The foundation system is shallow cast-in-place concrete. There are no visible problems with the foundation system. The building framing consists of masonry bearing/shear walls, steel columns, and roof joists. The center entry is supported by a large tubular truss. There are no visible problems with the superstructure.

Mechanical Systems

The building is served by four (4) packaged roof top air conditioning units (RTU-1, 2, 3, 4), that are R-410A DX refrigerant, with natural gas heating serve the two auditoriums, operating as single zone variable air volume units. One (1) packaged roof top air conditioning unit (RTU-5), that is R-410A DX refrigerant, without heat, serves VAV terminal units with hot water reheat coils in the front office areas. Equipment was replaced in 2017/18. There is an indoor McQuay Air Handling Unit (AHU-1) with a split-system R-22 DX cooling coil, a hot water heating coil, and a supply fan with VFD. This is original and serves the lower level and lobby spaces. Two (2) RBI model DB 0300 85% efficient gas fired boilers, each provided with an inline boiler pump and starter. Two (2) inline hot water system pumps with starters. Liebert/Emerson Computer Room Air Conditioning (CRAC) unit in main data/server room with raised floor supply and served by cooling via VAV terminal units and AHU. There are two (2) abandoned (non-operational) split system cooling units with ceiling cassettes. There are miscellaneous building and toilet exhaust fans located on the roof. There are two (2) split-system A/C units serving the classroom A/V rooms. Several electric wall and ceiling heaters. Andover DDC Building Automation System (Mason & Barry).

Plumbing System

The building is served by a 3” water service with reduced pressure backflow preventer and pressure reducing valve. Did not observe water meter (exterior vault). One (1) AO Smith vertical tank, electric water heater making 130 deg. F water. There is a DHR recirculation pump. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition.

Fire Protection System

The entire building provided with a wet-pipe fire suppression system with vertical, indoor double check detector, one (1) zone, and an FDC. 6” service into building reduces to 4”. Data room provided with a SIEMENS clean agent (waterless) fire suppression system. EST-3 fire alarm panels and equipment.

Electrical Systems

Electrical service gear is rated 1200 Amp, 208Y/120V, 3PH, 4W MDP with a 1000 Amp Main Principal breaker. General Electric brand MDP and branch panels. Facility has a Cummins (model 250GFBC, 2013 date) 250 KW natural gas fired emergency power generator with 1200 Amp circuit breaker, serving a 1000 Amp emergency transfer switch. There is sufficient physical space and spare capacity in the electrical rooms and panels. The MDF for WVSOM is located in this facility with an Eaton brand UPS sized to keep servers running for two hours in the event of power loss. Facility has a mixture of Fluorescent and LED interior lighting and HID exterior lighting throughout. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Clinical Evaluation Center 08

History and Primary Function

The Center for Clinical Evaluation (CEC), originally constructed in 2009, is another one-story facility on the back portion of campus. The CEC possesses several exam rooms, dedicated patient simulation rooms, as well as debriefing areas and classrooms specifically designed for the multifunctional needs of students, faculty and the local community. Clinical skills courses, electronic medical records training and clinical encounters involving standardized patients and patient simulators take place in the CEC. A large addition in 2014 almost doubled the size of the building and included a Grand Hall used for lectures & labs and a large robotics suite. The 37,855 sf facility is a mixed occupancy (business & assembly) with an occupant load of 657.

Exterior

The building has a predominately brick façade and aluminum windows with cast stone coping and banding. The main entrance is highlighted by angled, standing seam metal roof features supported by round metal columns while the main roof is flat with an EPDM roof membrane covering. A relatively new facility on campus, its size, scale and architectural features respond well to both the historic campus and the nearby residential neighborhood.

Interior

The interior layout of the CEC is very utilitarian with a small entrance lobby and several small medical rooms off single- and double-loaded corridors. The conference rooms are located on the north end of the building well away from the main entrance.

The interior materials all appear to be in good condition and are consistent with typical exam, classroom and office finishes. The lobby seems somewhat awkward for community visitors.

Structural System

The foundation system is shallow cast-in-place concrete. There are no visible problems with the foundation system. The building framing consists of masonry bearing/shear walls, steel columns, and roof joists. There are no visible problems with the superstructure.

Mechanical Systems

The main building is served by two (2) RBI Futera model FB750, 750 Mbh, non-condensing (85% efficient) boilers, each provided with an inline boiler pump. Two (2) inline heating hot water system pumps (HWP-1 and HWP-2) with starters only. Five (5) packaged AAON, R-410A DX Roof Top Units (RTU). RTU-1 and RTU-2 provided with single stage natural gas heat. All units are constant volume. RTU-1, 2, 3, and 4 provided with Constant Air Volume (CAV) Terminal Units with hot water reheat coils for zone control. RTU-5 provided with a single, duct-mounted hot water reheat coil. Hot water unit heaters and cabinet heaters. There are three (3) split-system A/C wall-mounted units for supplemental cooling in the DATA room. There are miscellaneous building and toilet exhaust fans located on the roof. Andover DDC Building Automation System (Mason & Barry).

The addition is served by two (2) DAIKIN packaged roof top air handling units (RTU-6 and RTU-7), that are R-410A DX refrigerant, with natural gas heating. Units serve variable air volume terminal units with hot water reheat coils. Units are plenum return. One (1) AERCO MLX-EXT-641, 160.5 MBH, condensing, high-efficiency boilers, with two (2) in-line heating hot water system pumps (HWP-5 and HWP-6) with starters. Hot water cabinet heaters. Data room is provided with two (2) wall-mounted split-system cooling units. There are miscellaneous building and toilet exhaust fans located on the roof. Andover DDC Building Automation System (Mason & Barry).

Plumbing System

The main building has a 2-1/2" water service with reduced pressure backflow preventer and pressure reducing valve. Did not observe water meter (exterior vault). One (1) AO Smith Cyclone vertical tank, high-efficient, modulating, gas-fired, condensing water heaters, making 120 deg. F water. There is a DHR recirculation pump. There is an ASSE 1017 centrally located thermostatic mixing valve (TMV). Primarily sensor-operated fixtures and flush valves. Fixtures are in good condition.

The addition has a 2-1/2" domestic cold water (DCW) main is served from existing 2-1/2" riser in CEC original water service entrance room. One (1) Bradford White EF Series high-efficient, 150 MBH, 100-gallon, modulating, gas-fired, condensing water heaters, making 115 deg. F water. There is a DHR recirculation pump. Domestic hot water return has heat trace, but no recirculation pump. Primarily sensor-operated fixtures and flush valves with ASSE 1070 thermostatic mixing valves (TMV) provided at lavatories. Fixtures are in good condition.

Fire Protection System

The entire building is provided with a wet-pipe fire suppression system with vertical, indoor double check detector, two (2) zones, and an FDC. 6" service into building reduces to 4".

EST master fire alarm panel and equipment, also serves the addition. Data room provided with a SIEMENS clean agent (waterless) fire suppression system.

In the addition a new 4" line with valves and accessories connected to the existing FP riser in the CEC original fire service entrance room. Data room is provided with a SIEMENS clean agent (waterless) fire suppression system. EST fire alarm sub panel connected to existing main fire alarm panel in original CEC building.

Electrical Systems

Electrical service gear in the main building is rated 1600 Amp, 208Y/120V, 3PH, 4W (provided with a 1200 Amp TR160 main breaker). GE brand MDP and branch panels. Facility does not have emergency power generation. There is sufficient physical space and spare capacity in the electrical rooms and panels. A 600 Amp 208/120V, 3PH, 4W SDP in the addition is served from 1600 Amp MDP in original CEC. Mixture of Fluorescent and LED interior lighting and HID exterior lighting throughout original facility and LED interior and exterior lighting throughout addition. The fire alarm devices are Edwards EST; the CEC addition was added to the original Fire Alarm Control Unit (Edwards EST). This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

History and Primary Function

The new Maintenance Building was completed in 2005. It is two stories tall with approximately 13,490 SF. It primarily houses the Campus Maintenance Department along with Central Storage. The south half of the facility contains work & storage spaces on the lower level with support offices above. The north half of the building is a high-bay open room where large equipment and materials are stored. The facility is classified as a storage occupancy, with an occupancy load of 50.

Exterior

The Maintenance Building envelope is EIFS with a brick wainscot and few windows. The upper level has hollow metal doors and the lower level is highlighted by several overhead coiling doors leading into the high-bay spaces. The building is covered by a standing seam metal roof.

The exterior of the building, along with the roof, appears to be in very good condition. The EIFS caps on the wainscot are damaged in several areas and need repaired. A few downspouts appear to have been hit and are in need of repair. Touching-up the sealants around the EIFS control joints and connections to other materials would be recommended.

Interior

The interior materials appear to be in good condition and are consistent with typical industrial type facility finishes. The restrooms and door hardware on the first floor are not ADA compliant. There needs to be a clearly defined path of travel / egress in the

receiving/maintenance areas. The paint room on the lower level needs an appropriate exhaust system.

Structural System

The foundation system consists of shallow continuous and isolated spread footings. The lower floor is partially below grade and has a retaining wall supporting 12 feet of backfill. There are minor shrinkage problems with the interior ground level slab-on-grade, but, otherwise, there are no visible problems with the foundation system. The building framing consists of steel tube columns, beams, and bar joists. The 2nd level is 4" thick concrete on metal deck. There are no visible problems with the superstructure.

Mechanical Systems

Service bays are provided with multiple Reznor gas-fired unit heaters, ventilation exhaust fans, and roof-mounted intake hoods. There are issues with the sizing of the exhaust air system and the gas-fired make-up air system serving the paint booth and paint storage areas. The system does not adequately ventilate the space. One (1) Trane, gas-fired, condensing furnace with split-system condensing unit, and one (1) HEIL, gas-fired, non-condensing furnace with split system condensing unit. One (1) CU is R-410A, the other CU is R-22. There are miscellaneous building and toilet exhaust fans located on the roof. There are two (2) split-system A/C units for the data rooms. The building has programmable wall thermostats and Andover DDC Building Automation System (Mason & Barry).

Plumbing System

The building is served by one (1) AO Smith vertical tank, electric water heater making 120 deg. F water. There is a DHR recirculation pump. It has a 2" water service with backflow assembly and pressure reducing valve. Did not observe water meter (exterior vault). Primarily manually operated fixtures and flush valves, tank type toilets, without thermostatic mixing valves (TMV) at lavatories. Fixtures are in good condition. There is an Oil Water Separator serving trench drains in service bays but the baffles appeared to have been removed.

Fire Protection System

Entire building provided with a dry-pipe fire suppression system with indoor detector check, single zone, compressor station, no FDC or hose connections observed. 4" service into building. Fire alarm panels and equipment are EST.

Electrical Systems

Electrical service is 600 Amp, 120/240V, 1PH. GE brand MDP and branch panels. Facility does not have emergency power generation. There is sufficient physical space and spare capacity in the electrical rooms and panels. Fluorescent interior lighting and HID exterior lighting throughout facility. The fire alarm control unit and devices are Edwards EST 3. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

WV State Police – Lewisburg Detachment 10

History and Primary Function

The building is a 3,817 SF, one-story residential structure with an attic and a full basement. The WV School of Osteopathic Medicine currently leases this building to the Lewisburg Detachment for the WV State Police, and is now classified as a business occupancy, with an occupant load of 46.

Exterior

The WV State Police Building exterior envelope is brick veneer with wood windows and doors. It is similar in size and style to surrounding residential properties. Although residential in nature, attempts have been made to “blend” the building into the campus architecture with such features as the green metal roof which appears to be in good condition. Overall, the exterior materials appear to be in good condition.

Interior

With the facility being a residential structure, there are a few code-required renovations that need to be undertaken to provide commercial compliance. There needs to be a fire-rated wall installed separating the garage from the remainder of the facility. The restrooms need to be renovated to meet accessible codes (ADA). The basement needs renovated to provide safe egress to the exterior. In addition, moisture protection needs to be provided along the basement walls.

Structural System

This is a typical wood-framed residential structure with concrete block foundation walls and overall appears to be in good condition. The basement walls show some minor stair-step cracking indicating slight foundation settlement. The corners of the basement are wet indicating underperforming foundation drain systems, if any, are present. The exterior of the house showed a few deficiencies. The steps to the basement on the rear of the building are badly broken and should not be considered safe.

Mechanical Systems

The building is served by a Heil gas fired furnace installed in basement with R-22 condensing unit installed out back which needs replaced.

Plumbing System

The facility has a 3/4" water service with no backflow preventer. All new PEX domestic water piping. Rheem 40 gallon, 36 MBH gas-fired water heater (2013). Primarily manually operated tank-type toilets and lavatories. Fixtures are in fair condition. Residential kitchen sink and dishwasher. There is a W/D in the basement.

Fire Protection System

The building does not have a fire protection system but does have a SIEMENS fire alarm system.

Electrical Systems

Electrical service is a typical residential size 100 Amp, 120/240V, 1PH service, with no spare capacity. Separate 100 Amp main disconnect located outside the building, not at the panel.

Founders' Activity Center 11

History and Primary Function

The Founders' Activity Center serves as WVSOM's on-campus workout facility which offers a regulation basketball court, multi-purpose space for cardiovascular machines, resistance machines and weights along with lockers and shower facilities for the campus community and their families. It was originally constructed in 2002 with a significant addition completed in 2009. The 21,410 sf facility is an assembly occupancy with an occupant load of 660.

Exterior

The majority of the Founders' Activity Center is covered in EIFS with a brick veneer wainscot and green standing seam metal roof. Openings are aluminum storefront system and painted hollow metal doors.

The brick veneer and metal roof are still in good condition. The greater part of the EIFS wall panels appear to be in good condition but some wainscot caps, quoins, door trim and gutters & downspouts have ice and water damage. Vegetation was visible growing up the EIFS panels in some locations around the building while weep holes in brick veneer have been covered up by landscape mulch.

Interior

The interior finish materials are all in good condition and are consistent with those typically found in similar weight room and gymnasium facilities. Some ceiling tiles in the free-weight area appear to have some water damage. The east end of the gym floor is buckled showing signs of water damage. This needs immediate attention.

Structural System

The original building is a pre-engineered metal building. The addition is a conventional steel structure with steel columns and roof joists. The foundations consist of two distinct systems. The original building has shallow cast-in-place spread footings while the addition has deep foundations. These drilled piers are 30" diameter and are under each column. The perimeter walls are supported on continuous footings and grade beams. The ground floor in both sections consists of a 5" thick cast-in-place concrete with wire mesh reinforcing. The interior exposed masonry walls also did not show any cracks related to foundation problems. Review of interior gymnasium floor revealed the slab has dropped slightly in the SE corner allowing water infiltration which has caused damage.

Mechanical Systems

In the workout room, there are two (2) YORK, split-system AHU with DX cooling and then there are two (2) separate Reznor gas-fired, 85% efficient ducted heaters. This equipment is suspended from the building structure and the equipment and ductwork is exposed within the space. In the gymnasium there are two (2) YORK, split-system AHU with DX cooling and a Reznor gas-fired, 85% efficient duct heater. This equipment is suspended from the building structure and the equipment and ductwork is exposed within the space. There are four (4) large ventilation louvers. There is an exhaust fan in the room containing an electrical transformer. All split-system condensing units are R-22 refrigerant. There are three (3) split system AHU with electric heaters and condensing units serving the front lobby, the locker rooms. This building requires an HVAC upgrade.

Plumbing System

The building has a 2" incoming water service with backflow prevention device, pressure reducing valve and a full-size bypass. Water meter located outside. Primarily manually operated fixtures and flush valves, lavatories, and showers. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition. Maxim model 27P125A-MX, 270 MBH, 125-gallon, modulating gas-fired domestic water heater making 120 deg. F water.

Fire Protection System

Entire building provided with a wet-pipe fire suppression system with one (1) zone, and an FDC at front of building. 6" service into building reduces to 4" FP system. Fire alarm panels and equipment are SIEMENS.

Electrical Systems

A newer 400 Amp, 480Y/277V, 3PH, 4W Panelboard (main service) was installed with the latest gymnasium addition. A 480V to 240V transformer back-feeds the original 400 Amp, 120/240V, 1PH MDP. Most panel spaces are full. Eaton MDP and branch panels for newer service; Square-D MDP and branch panels for original service. Does not have emergency power generation. Data equipment is installed in same room as water service entrance and water heater, no supplemental cooling provided. Facility has LED interior and exterior lighting. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

History and Primary Function

The Robert C. Byrd Clinic is a comprehensive not-for-profit Rural Health Clinic committed to providing primary health care to residents of the Greenbrier Valley. The clinic not only provides a site for WVSOM faculty to practice but also allows WVSOM to conduct research and offer clinical training opportunities for future osteopathic physicians. Located across Silo Lane from the main WVSOM campus, it was originally constructed in 1997 and has seen several additions, the most recent of which was completed in 2005. The 54,820 sf facility is an business occupancy with an occupant load of 549.

Exterior

The buildings are comprised of simple, brick rectangular forms with large projections regularly spaced around the perimeter. The flat roofs are covered with EPDM roof membranes and the original building features a hipped, standing seam metal roof topped with a large cupola. The projections are highlighted by large arched windows and gabled standing seam metal roofs, both trimmed in cast stone.

Interior

The interior finishes in the addition are in good condition. However, they are inconsistent with the finishes in the original building. The original building's finishes are beyond their useful life and need to be updated to match the addition. It is recommended to re-design the entrance lobby when updating finishes in the original building.

Structural System

The foundations consist of cast-in-place concrete shallow footings. The perimeter footings are continuous. Individual columns are supported on square footings. The superstructure

consists of steel columns, steel beam floor, and roof framing. The secondary roof members are steel bar joists. There are no visible signs of superstructure problems.

There was no brick cracking seen neither near the ground nor at the corners of wall openings, which would be a clear sign of foundation settlement. There were no noticeable floor problems due to settling or cracking.

Mechanical Systems

The main building is served by two (2) indoor Variable Air Volume (VAV) Air Handling Units, each provided with chilled water-cooling coils, hot water heating coils, and a supply fan with VFD. These AHU serve VAV Terminal units with hot water reheat coils for individual zone control. Two (2) 55-ton (nominal) Daikin model number AGZ055 air-cooled chillers with glycol and R-410A refrigerant. Two (2) Bryan flexible tube boilers, model CL75-W-FDG, 750 MBH 80% efficient boilers. Two (2) base-mounted chilled water pumps with VFDs and two (2) base-mounted heating hot water pumps with starters. There are miscellaneous building and toilet exhaust fans located on the roof. There is data equipment located in the main mechanical room and that space is not provided with any cooling. There is a second data closet that is provided with cooling from the AHU. Andover DDC Building Automation System (Mason & Barry).

The addition is served by two (2) indoor, split-system DX Variable Air Volume (VAV) Air Handling Units, each provided with DX cooling coils (R-410A condensing units were recently replaced), and hot water heating coils in the reheat position, and a supply fan with VFD. These AHU serve VAV Terminal units with hot water reheat coils for individual zone control. Each AHU provided with a ducted, inline return fan. One return fan clearly has bearing issues and needs to be addressed. Two (2) PK Modu-Fire 85% efficient boilers making 175 deg. F heating hot water, with two (2) base-mounted heating hot water pumps with starters only. There are miscellaneous building and toilet exhaust fans located on the roof. DATA room is provided with a split-system cooling unit and also served by the central AHU. Andover DDC Building Automation System (Mason & Barry).

Plumbing System

The building is served by one (1) Rheem/Ruud vertical tank, high-efficient, 199 MBH, 100-gallon, modulating, gas-fired, condensing water heaters, making 115 deg. F water. Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition.

The addition has two (2) AO Smith Cyclone vertical tank, high-efficient, 120 MBH, 60-gallon, modulating, gas-fired, condensing water heaters, making 115 deg. F water. There is a DHR recirculation pump. There is an ASSE 1017 centrally located thermostatic mixing valve (TMV). Primarily manually operated fixtures and flush valves, lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition. Trap primers observed for floor drains in mechanical rooms. 2” DCW served from main riser in original building.

Fire Protection System

The main building is provided with a wet-pipe fire suppression system with two (2) zones, and an FDC. The 8" service into building, serves 2" DCW and then reduces to 4" for FP. The addition is provided with a wet-pipe fire suppression system served by main FP riser in original building. Fire alarm panels and equipment are EST.

Electrical Systems

Electrical service gear is 1200 Amp, 480Y/277V, 3PH, 4W switchgear serves both buildings. General Electric brand MDP and branch panels. Most panels do not have additional breaker space, but the emergency power panels do have available space. Facility has a Cummins model GGHE-56654227 60 KW natural gas generator with Cummins Automatic Transfer Switch (ATS). Facility has a mixture of Fluorescent and LED interior lighting and HID exterior lighting throughout. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens). This facility has a separate/independent Access Control System from the rest of the school.

History and Primary Function

The WVSOM Student Center is a freestanding, two-story structure, completed in 2016, that sits on the edge of the historic parade ground. As the heart of the school, the building features an iconic clock tower that anchors the center and serves as a beacon to the surrounding community. The 67,000 sf facility is an assembly occupancy with an occupant load of 537.

Exterior

The main portion of the Student Center facing the parade ground to the north is a large 3-story elevation highlighted on the first two floors by curved curtainwall windows. The windows are recessed slightly creating a covered patio on the lower level with stone columns supporting an exterior terrace on the upper level. A large hipped standing seam metal roof anchors the top of the facility enclosing mechanical equipment.

The west end of the Student Center is the main entrance from the Main Building complex and parade ground anchored by the clock tower. The east end features an entrance from the back of campus and is highlighted by a flat, steel-framed canopy supported by stone columns. The northeast corner facing the parade ground is anchored by the President's Parlor, a brick square in plan interlocked by curved windows and very distinctive brick gable parapets covered in standing seam metal roofing. The rear of the facility is virtually all brick with stone banding accents. The dominant feature on the back are the curved glass windows on the second floor looking out from the stage above.

Interior

The building's two levels include food preparation and dining spaces for breakfast and lunch service, a two-story campus store, technology support spaces, and a recreation center. It also includes a multimedia conference hall with a full-size stage, perfect location for large meetings, ceremonies and celebrations. The center caters to students by providing space for student government offices, student mailboxes, and open and quiet study areas.

Structural System

The Student Center Building foundation consists of a series of drilled shaft caissons and grade beams. The floor is a concrete slab on grade. The lower level of the building consists of reinforced concrete construction with concrete walls, columns and beams that support the second floor. The second floor is a 12" thick, one-way concrete reinforced floor slab. Above the first floor the framing changes to steel construction with steel beams and columns. The lateral resisting system for the building is a combination of ordinary steel moment frames and ordinary steel concentrically braced frames. The mechanical mezzanine is a reinforced concrete floor slab on metal deck that is supported by steel beam framing. The flat sections of roof are framed with steel beams that support metal roof deck. The pitched roof is constructed with cold formed metal roof trusses and joists, while the curved sections rely on curved steel tubes for support. The tower on the north-west corner is framed with a combination of reinforced concrete, concrete masonry and steel.

Mechanical Systems

Building is served by one (1) 265-Ton (nominal) Daikin model AWH265CDP air-cooled chiller, chilled water with 30% glycol and R-134A refrigerant. Three (3) AERCO Benchmark 1000 condensing, high-efficiency boilers with boiler pumps, with glycol. Two (2) base-mounted heating hot water supply pumps, two (2) base-mounted chilled water supply pumps. Four (4) indoor air handling units (AHU 2, 3, 4, 7) with chilled water coil, hot water coil, supply and return fans with VFDs. Three (3) indoor air handling units (AHU-1, 5, 6) with chilled water coil, hot water preheat coil, hot water reheat coil, total energy recovery wheel, supply and return fans with VFDs. VAV Terminal Units and Fan-Powered VAV Terminal Units, Fan Coil Units, Unit Heaters. HHWS and CHWS routed outdoors to clock tower AHU-7. Andover DDC Building Automation System (Mason & Barry).

There are miscellaneous building and toilet exhaust fans located on the roof. Multiple split-system A/C units for data rooms, supplemental cooling. Elevator machine room is provided with cooling from the AHU.

Plumbing System

The building has a 3" water service with indoor water meter, backflow preventer and pressure reducing valve (fully open). Primarily sensor-operated fixtures, flush valves, with ASSE 1070 thermostatic mixing valves (TMV) at lavatories, lavatory sensors are plug-type. Fixtures are in good condition. Two (2) AO Smith Cyclone vertical tank, high-efficient, modulating, gas-fired, condensing water heaters, producing 125 deg. F water. Domestic hot water return has heat trace, but no recirculation pump.

Fire Protection System

Entire building provided with a wet-pipe fire suppression system with indoor detector check, three zones, FDC and hose connections. 6" service into building reduces to 4". Data room provided with waterless fire suppression system. EST and SIEMENS fire alarm panels and equipment.

Electrical Systems

Electrical Service is 1600 Amp, 480Y/277V, 3PH, 4W MDP. Eaton brand MDP and branch panels. Building does not have emergency power generation. There is sufficient physical space and spare capacity in the electrical rooms and panels. LED lighting throughout the facility. The fire alarm control unit and devices are Edwards EST. This facility is part of the campus wide Mass Notification System (Siemens) and Access Control System (Mason and Barry).

Clinical and Translational Science Center 15

History and Primary Function

The Clinical and Translational Science Center's exact date of construction is unknown. It is one-story tall residential structure and is approximately 1,638 SF. The CTSC serves as a catalyst to support biomedical research projects by providing services and resources to investigators, staff, scholars and trainees, and community partners. The CTSC provides centralized resources dedicated to facilitating biomedical research through innovation, collaboration, and expertise.

Exterior

The CTSC's building envelope is brick veneer over wood studs with a large, enclosed porch facing the back yard. The entrance is highlighted by a large gable projection with vinyl siding and decorative columns. The garage door has been removed and infilled with wood siding and a single door. The exterior has aluminum windows and an asphalt shingle roof. Its size and scale complement the adjacent residential properties. The exterior materials are in good condition. We recommend reroofing the CTSC if it is to remain in use for a significant length of time.

Interior

The interior, while still very residential in nature, uses the living room for a waiting area and the three bedrooms as exam rooms. The garage has been turned into a laboratory with limited space. The materials are in fair condition and are consistent with typical residential finishes. Some repair work is needed for the building to remain in continued residential use. The facility would need a complete interior renovation for continued use as a commercial exam and lab space.

Structural System

This is a typical wood framed residential structure on a crawl space with concrete block foundation walls. Review of the walls did not reveal any distress or visible settlement. The garage is a poured concrete slab-on-grade.

Mechanical Systems

Residential home converted to office space with exam rooms. Gas fired furnace installed in crawlspace with American Standard R-410A heat pump condensing unit installed out back (2011). Electric heater in the garage.

Plumbing System

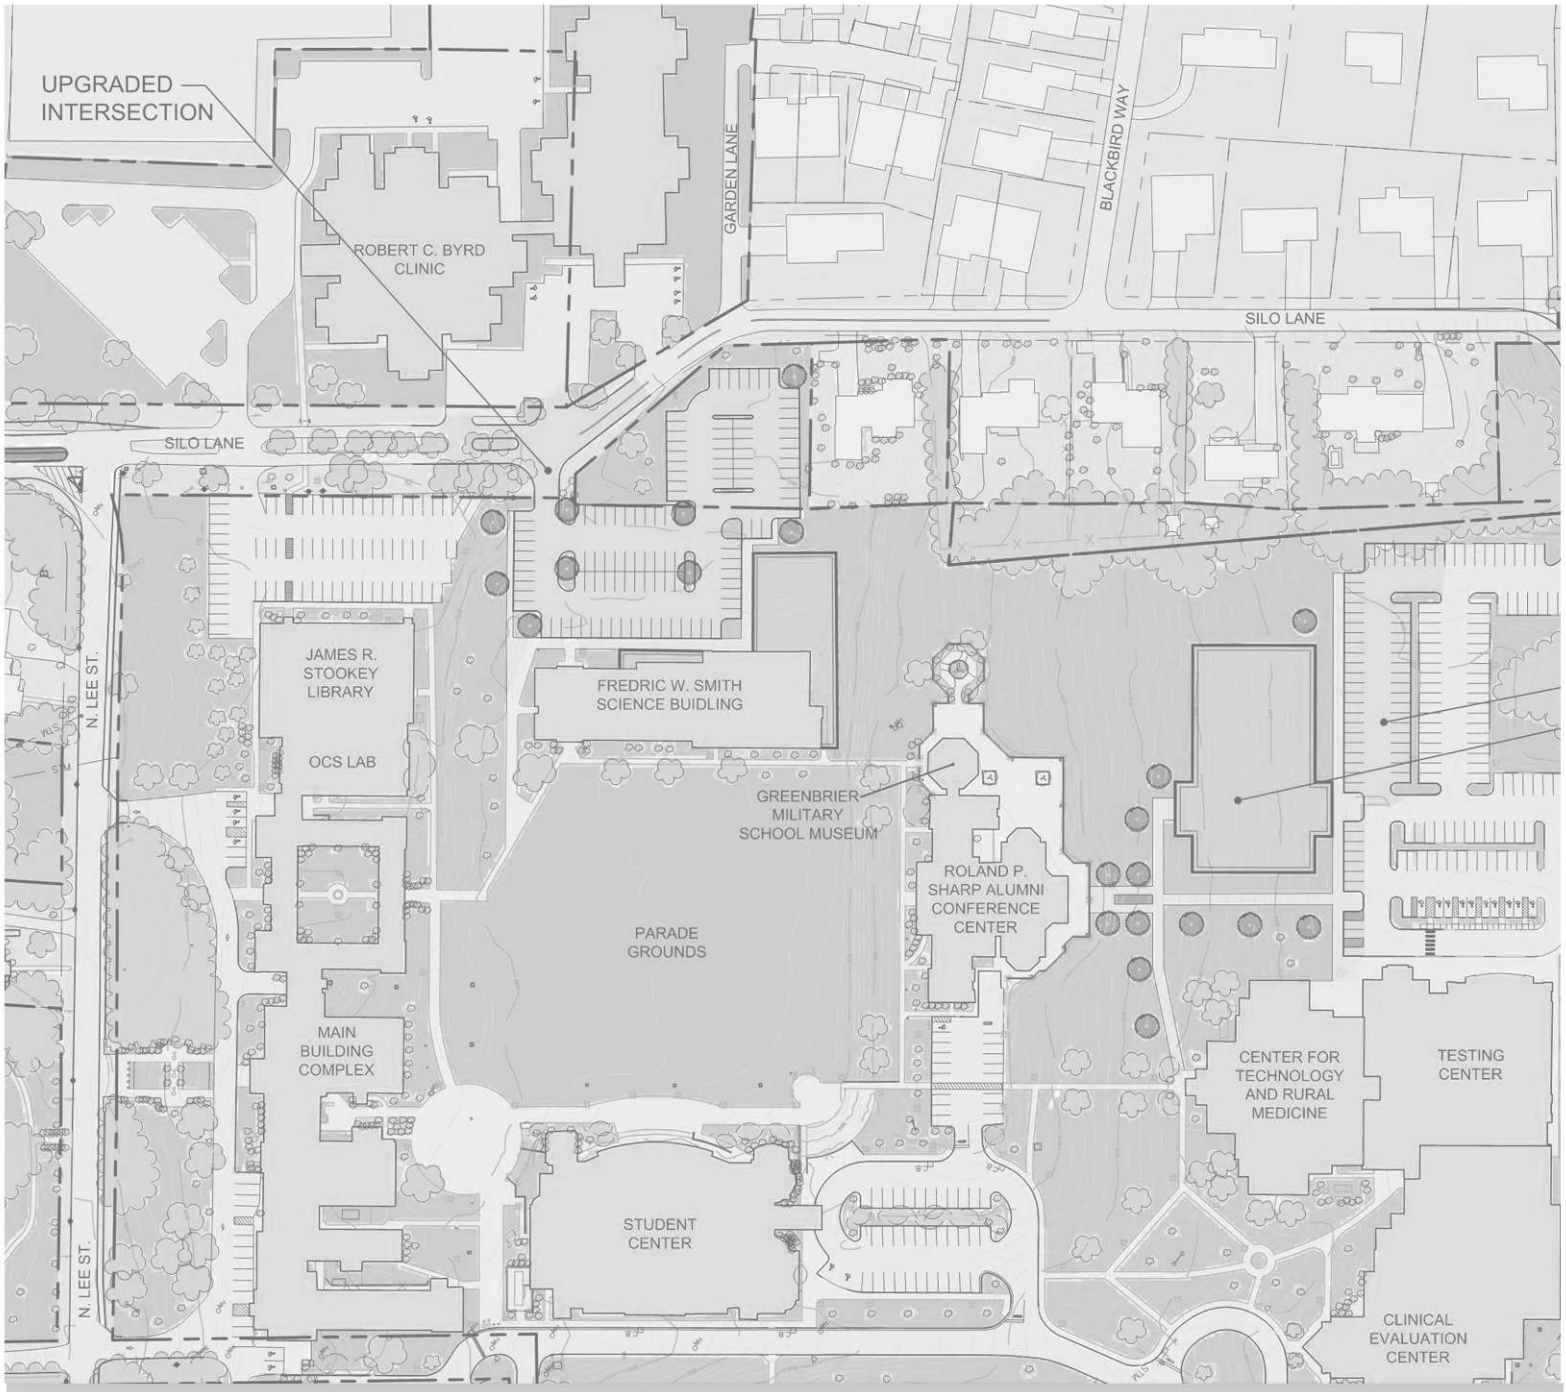
The house has a 3/4" water service provided with backflow assembly with bypass. Whirlpool 40-gallon electric water heater with two (2) 4.5 KW elements. Primarily manually operated tank-type toilets and lavatories. No thermostatic mixing valves (TMV) observed at lavatories. Fixtures are in good condition. Residential kitchen sink and dishwasher. There are W/D hook-ups.

Fire Protection System

Building does not have a fire protection system or a fire alarm system.

Electrical Systems

Electrical service is a typical residential size 200 Amp, 120/240V, 1PH service, with room for spares. DATA closet, data is routed from Tech building through this building to the Clinic. Facility has fluorescent interior lighting and HID exterior lighting. No Fire Alarm system installed, only standard residential style smoke alarms. No known major electrical issues or anticipated facility upgrades.



Section 2

ENROLLMENT AND DEMOGRAPHIC ASSESSMENT

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Overview

As noted below, the enrollment at the West Virginia School of Osteopathic Medicine is very steady, and generally ranges from 800-850 students. First year enrollment is limited to 200 students, and repeating students causes the total number to slightly increase. The 200 first-year students are selected from more than 5,000 applicants. Typically, 22-25% of the student are from West Virginia, and the WVSOM has students from every state. Approximately half of the students attend WVSOM immediately after completion of their undergraduate degree.

Due to the steady enrollment the Master Plan (Campus Development Plan) does not anticipate a significant expansion of the Lewisburg Campus. A recent study completed by Tripp Umbach recommended the establishment of various new programs at WVSOM. One program that is likely to be implemented at the Lewisburg campus in the next ten years is the post-baccalaureate program in medicine. It is anticipated that the enrollment in this program would be 30-60 students, and that the existing campus can support the increased enrollment. The report also recommended a variety of master's degree programs. Since the development of these programs on the Lewisburg Campus in the near term appears less likely, any additional enrollment and related space requirements are not addressed in the plan.

Tripp Umbach also recommended that WVSOM establish an additional campus with an extra 60 students per class (increasing to 120 students per class) be developed at a new campus in the Charleston area – associated with the Charleston Area Medical Center. This potential enrollment growth and future campus are also not addressed in the current Master Plan.

General Employee and Faculty Data

Employees:
WVSOM has 267 full-time employees, which includes the following faculty:

23 full-time, tenured, tenure-track or non-tenured faculty in the Department of Biomedical Sciences. These include faculty in all the major basic biomedical sciences, including Anatomy, Physiology, Biochemistry, Microbiology, Immunology and Pharmacology.

32 tenured, tenure-track or non-tenured faculty members in the Department of Clinical Sciences, 30 of which are full-time and 3 of which are part-time. These are comprised of D.O.s and M.D.s who have board certification in their area of expertise. This department also includes several Ph.D.s, a Psy.D. and a master-level faculty member. These faculty members provide expertise in the areas of educational psychology, clinical psychology, medical education, medical informatics, continuous quality improvement and program development.

9 tenured or tenure-track faculty members (all D.O.s) who are Board Certified in OMM (Osteopathic Manipulative Medicine), NMM (Neuromusculoskeletal Medicine), Physical Medicine & Rehabilitation, and/or Family Medicine/OMT. These faculty teach in the Department of Osteopathic Principles and Practice.

In addition, the faculty includes:
- 9 part-time temporary instructors who assist in Osteopathic Principles and Practice labs,
- 32 visiting lecturers who provide occasional lectures in Years 1 and 2 of the curriculum,
- 22 instructors for Clinical Skills labs,
- 21 off-campus preceptors for Clinical Skills labs,
- 164 adjunct clinical faculty for Year 3 and Year 4 clinical rotations,
- 10 Graduate Teaching Assistants (GTAs); and
- approximately 2,500 preceptors who accept students for elective clinical rotations.

Tuition & Fees

$21,472 - In-state tuition
$52,710 - Out-of-state tuition

General Student Demographics

839 total students (average age is 26)
233 in-state students
606 out-of-state students
415 females
424 males
209 minority students

WVSOM Graduates

WVSOM grads practice medicine in 47 states and the District of Columbia.
There are 756 licensed osteopathic physicians practicing medicine in West Virginia; 657 of those physicians are WVSOM alumni.
WVSOM graduates practice medicine in 46 of West Virginia's 55 counties.

DEFERRED MAINTENANCE PROJECTS

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Below is a comprehensive list of deferred maintenance projects for The West Virginia School of Osteopathic Medicine. The items listed under *Deferred Maintenance* were specifically indicated by the Director of the Physical Plant. The items listed under *Immediate Needs* and *Long-Term Needs* were categorized by the ZMM staff once existing building assessments were completed.

Admissions Center

Deferred Maintenance (per WVSOM)

- Upgrade HVAC system

Immediate Needs

- Repair unstable railing on exterior stairs
- Concrete walk appears to be settling at connection to porch on north side of building
- Extend boot up to meet downspout on northeast corner
- Remove and re-seal around perimeter of all exterior windows and doors
- Remove and replace self-leveling sealant where concrete walks meet building
- Seal around gas pipe where it enters the building
- Remove and replace faded green shutters
- Remove moss and repair water damage on west side of building at large window
- Provide accessible parking and signage and accessible path to building

Long-Term Needs

- Raise drop inlet on east side of building
- Provide ADA access between parking lot and front door of facility
- Provide pushbuttons on main entrance doors for ADA compliance
- Upgrade interior and exterior lighting to LED

Main Building A (Quad)

Deferred Maintenance (per WVSOM)

- Foundation cracking / water infiltration
- Interior renovation and new interior finishes

Immediate Needs

- Repair open drain line in Room 135
- Repair EIFS damage
- Sprinkler system
- Address HVAC Ventilation

Long-Term Needs

- Upgrade remaining fluorescent interior lighting to LED
- Provide a wet-type fire sprinkler system

Main Building B

Deferred Maintenance (per WVSOM)

- Main electrical upgrade
- Possibly remove existing fire pump with written approval from fire marshal

Immediate Needs

- Address fire pump (remove or upgrade)

Long-Term Needs

- Renovate third floor and interior finishes
- Provide accessible route to building and provide pushbuttons on main entrance
- Provide a complete wet-type fire sprinkler system

Main Building C

Deferred Maintenance (per WVSOM)

- Main electrical upgrade

Immediate Needs

- New EPDM roof
- Address elevator machine room HVAC

Long-Term Needs

- Interior renovation and finish upgrades
- Provide pushbuttons on south entrance adjacent to accessible parking
- Provide a complete wet-type fire sprinkler system

James R. Stookey Library / OCS Lab

Deferred Maintenance (per WVSOM)

- Remove and replace ballasted EPDM roof on OCS Lab

Immediate Needs

- Clean, repoint and reseal cast stone accents and trim
- Seal joints between exterior concrete paving and building
- Clean moss from building and repair downspout boot connections around perimeter
- Repair water damage above selected ceiling tiles and electric ceiling heaters in Lobby
- Repair grading on edges of equipment pads where concrete is visible
- Repair gypsum board damage at large, arched doors in Lobby
- Repair damaged vinyl wallcovering in Lobby and corridors
- Clean acoustical ceiling tiles adjacent to mechanical diffusers in Library
- Provide domestic water backflow preventer

Long-Term Needs

- Update Restrooms
- Provide ADA access from the north parking lot into the Library and OCS Lab
- Clean steel at gable entrances on north end and replace exterior gypsum board soffits
- Install new acoustical ceilings and LED light fixtures in OCS Lab
- Upgrade remaining fluorescent interior lighting to LED

Fredric W. Smith Science Building

Deferred Maintenance (per WVSOM)

- Increase the size of generator on roof
- Elevator upgrades

Immediate Needs

- Install ADA controls on main entrance doors from parking and parade grounds
- Clean, repoint and reseal cast stone coping and banding
- Seal joints between exterior concrete paving and building
- Repair grading on NW corner of building where concrete foundation is visible below exposed brick
- Repair grading on NW corner of building where edges of concrete walks are visible
- Repair asphalt cracks in north parking lot
- Repair water damage above selected ceiling tiles throughout
- Repair damaged vinyl wallcovering in Lobby.
- Repair structural crack in concrete floor below VCT in entrance lobby
- Repair structural wall cracks in CMU & brick on east end of skylight in gross anatomy lab
- Repair structural wall cracks in CMU at intermediate landing of Stair J232
- Repair roof leak at second floor landing of Stair J232
- Upgrade aged chillers
- Address humidification issues in the animal holding
- Address humidification systems for AHU-3 and AHU-4
- Address dehumidification and cooling issues in the large laboratory classroom

Long-Term Needs

- Upgrade Entrance Lobby design and finishes
- Install new acoustical ceilings and LED light fixtures in corridors and labs
- Paint curbs along exterior drive
- Upgrade Fire Alarm system to replace the two FACP's with a single control unit.
- Maintain chemical treatment of make-up water for steam systems

Roland P. Sharp Alumni Conference Center and Greenbrier Military School Museum

Deferred Maintenance (per WVSOM)

- New interior finishes package, including provisions for replacing bar, lighting and acoustical panels in Assembly Room

Immediate Needs

- Patch and repair drywall joints in ceilings and soffits of museum
- Re-attach loose crown moulding above display cabinets
- Seal around perimeter of windows, doors and louvers
- Remove and replace self-leveling sealant where concrete walks meet building and low brick wall
- Repair damage to downspout boots around building perimeter
- Remove and replace damaged downspouts
- Insulate and seal around penetrations through brick veneer walls
- Several weep tubes above windows appear to be clogged with mortar
- Repair unstable metal railing on ramp
- Clean mildew from gutters
- Install insulated pipe boots on under-counter sanitary lavatory drains in restrooms

Long-Term Needs

- Replace missing fixture on exterior of museum
- Repair cracked wood panels on corners between doors on museum
- Concrete walk appears to be settling near low wall on west side of museum
- Repair damage to low brick walls
- Remove and replace damaged shutters
- Repair large gap between risers on concrete stairs at main entrance
- Provide ADA pushbuttons on main entrance doors
- Upgrade all interior and exterior lighting to LED

Center for Technology and Rural Medicine

Deferred Maintenance (per WVSOM)

- None

Immediate Needs

- Repair spalling concrete on exterior stairs
- Seal bottom of storefront on main entrance sidelites
- Clean, repoint and reseal cast stone coping, banding and window trim
- Seal around louvers
- Seal joints between exterior concrete paving and building
- Install insulation on piping under restroom lavatories
- Repair water damage above selected ceiling tiles
- Upgrade lower-level mechanical room equipment (split-system AHU, boilers, pumps)

Long-Term Needs

- Remove and replace exterior concrete patios on each side of main entrance
- Clean brick and cast stone banding under round signage on front of building
- Repair damaged and bent stainless steel railing on interior ramp
- Repoint mortar on selected interior cast stone bands and window trim units
- Update breakroom off Entrance Lobby
- Replace carpet in lecture halls
- Upgrade remaining interior and exterior lighting to LED

Clinical Evaluation Center

Deferred Maintenance (per WVSOM)

- None

Immediate Needs

- Repair spalling concrete on exterior stairs
- Clean, repoint and reseal cast stone coping, banding and window trim
- Seal joints between exterior concrete paving and building
- Seal joints between exterior hollow metal door frames and brick
- Repair loose flashing under cast stone coping in selected locations
- Repair grading along sloped sides of exterior stairs where concrete is visible

Long-Term Needs

- Provide ADA access between parking lot and front door of facility
- Provide pushbuttons on main entrance doors for ADA compliance
- Upgrade remaining fluorescent and HID lighting to LED

Maintenance Building

Deferred Maintenance (per WVSOM)

- Expand open bays and storage
- Construct storage mezzanine in open bay

Immediate Needs

- Repair grading on west side of building where concrete foundation is visible below exposed brick
- Remove and replace sealant in EIFS control joints
- Address paint booth exhaust and make-up air

Long-Term Needs

- Provide ADA compliant parking and signage
- Install ADA controls on main entrance door from parking on upper level
- Provide ADA compliant restroom on upper level
- Repair damaged downspouts
- Repair damage to EIFS wainscot caps
- Upgrade all interior and exterior lighting to LED

WV State Police – Lewisburg Detachment

Deferred Maintenance (per WVSOM)

- None

Immediate Needs

- Repair stair to basement on back of building
- Upgrade R-22 HVAC equipment

Long-Term Needs

- Install fire-rated wall between living area and garage
- Renovate restrooms to comply with ADA
- Relieve moisture issues in basement
- Upgrade all lighting to LED

Founders' Activity Center

Deferred Maintenance (per WVSOM)

- Upgrade HVAC systems

Immediate Needs

- Repair valley/gutter at northwest corner where water appears to be by-passing drainage system
- Repair EIFS damage around building perimeter
- Repair light fixtures on east end of free-weight area
- Remove and re-seal around perimeter of all exterior windows, doors and louvers
- Seal penetrations in brick veneer wainscot
- Remove and re-seal control joints in EIFS
- Remove and replace insulation on mechanical lines
- Remove and replace self-leveling sealant where concrete walks meet building

Long-Term Needs

- Repair concrete slab in gym and replace damaged floor
- Consider removing EIFS cap on brick wainscot and covering with metal flashing
- Paint the CMU walls in the multi-purpose room
- Renovate to increase number of plumbing fixtures

Robert C. Byrd Clinic

Deferred Maintenance (per WVSOM)

- Remove and replace ballasted EPM roofing on original building

Immediate Needs

- Clean, repoint and reseal cast stone coping
- Seal joints between exterior concrete paving and building
- Remove and replace vertical control joint sealant around building perimeter
- Clean, repoint and reseal cast stone sill trim at all large, arched windows
- Remove and replace sealant at window/brick joint around building perimeter
- Seal around perimeter of louvers
- Remove and replace rust-damaged hollow metal doors and frames around building

- Repair grading in some recessed areas around building where water is trapped
- Repair grading around drop inlets on back of building. Inlets are too high.
- Repair damaged gutters allowing water to run down building face on back of building at inside corners
- Repair/seal old holes in brick veneer where devices have been removed
- Repair sheet metal trim on large, arched windows around building
- Repair water damage to brick veneer under window/wainscot trim around building
- Upgrade return fan with bearing issues

Long-Term Needs

- Upgrade Entrance Lobby design and finishes
- Install new acoustical ceilings and LED light fixtures in corridors and exam rooms
- Raise height of asphalt paving at walks at South entrance to prevent tripping hazard
- Upgrade the Generator and ATS

Student Center

Deferred Maintenance (per WVSOM)

- Repairs to Clock Tower

Immediate Needs

- None

Long-Term Needs

- None

Clinical and Transitional Science Center

Deferred Maintenance (per WVSOM)

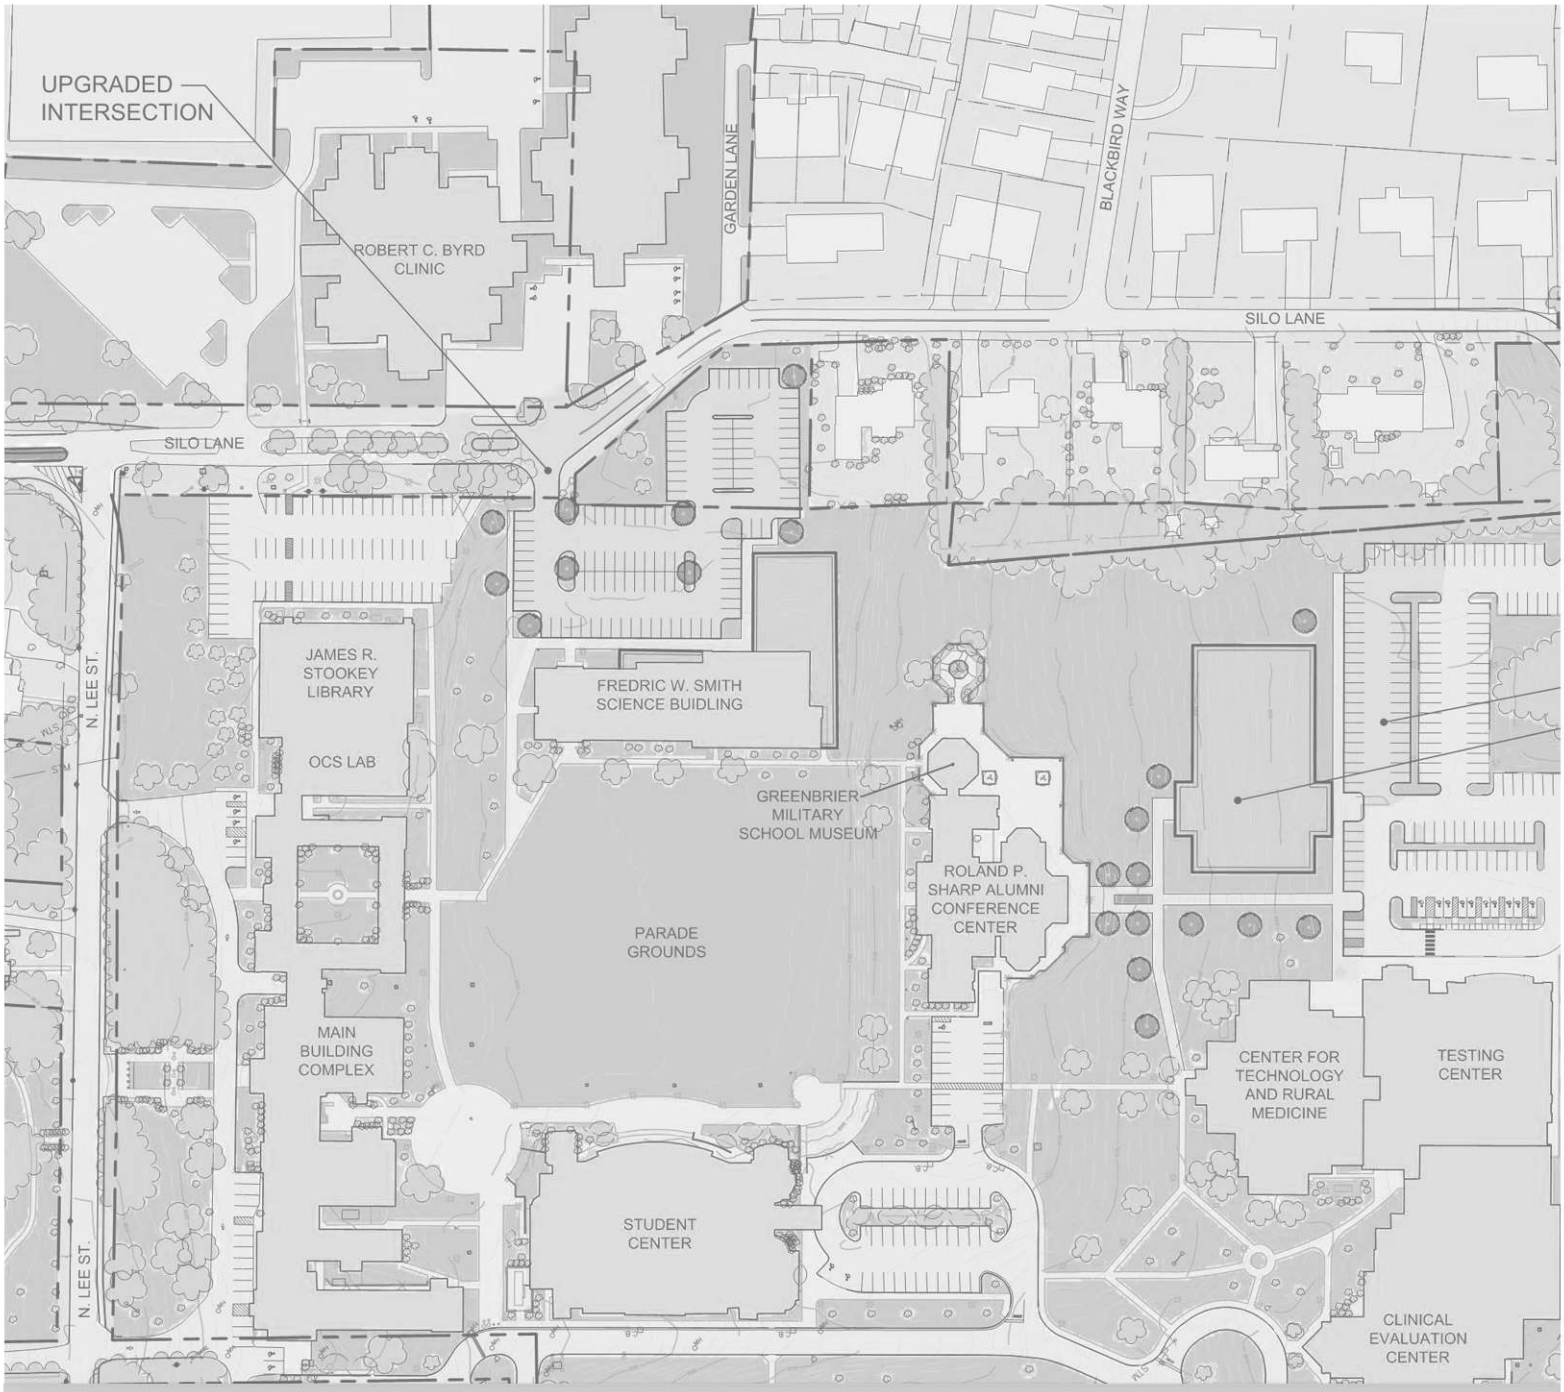
- None

Immediate Needs

- Install a commercial grade fire alarm system

Long-Term Needs

- Upgrade all lighting to LED



Section 4

EXISTING BUILDING NEEDS

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Below is a list of existing building and facilities at The West Virginia School of Osteopathic Medicine in need of renovation, additions or any combination thereof.

Admissions Center

Renovation

- Upgrade HVAC system
- ADA Renovations: Parking, accessible route to building and entrance door upgrades
- Interior renovation and new interior finishes
- Various exterior repairs and preventative maintenance

Main Building A (Quad)

Renovation

- Foundation cracking / water infiltration
- Install wet-type fire sprinkler system
- HVAC Ventilation
- Interior renovation and new interior finishes
- Various exterior repairs

Main Building B

Renovation

- Main electrical upgrade
- Remove existing fire pump (need written approval from WV State Fire Marshal)
- Install wet-type fire sprinkler system
- Renovate third floor and interior finishes

Main Building C

Renovation

- Main electrical upgrade
- New EPDM roof
- Install wet-type fire sprinkler system
- Provide elevator machine room HVAC
- Interior renovation and new interior finishes

James R. Stookey Library / OCS Lab

Renovation

- Remove and replace ballasted EPDM roof on OCS Lab
- Expand Mezzanine to full Second Floor
- Provide domestic water backflow preventer
- Update Restrooms
- Various exterior repairs and preventative maintenance
- Install new acoustical ceilings and LED light fixtures in OCS Lab

Fredric W. Smith Science Building

Renovation and Addition

- New addition
- Increase size of roof generator
- Elevator upgrades
- Install ADA controls on main entrance doors from parking and parade grounds
- Various exterior repairs and preventative maintenance
- Various structural repairs
- Various HVAC upgrades, humidification and dehumidification issues
- Interior renovation and new interior finishes
- Upgrade Fire Alarm system to replace the two FACP's with a single control unit.

Roland P. Sharp Alumni Conference Center and Greenbrier Military School Museum

Renovation

- Interior renovation to Assembly Room, Bar and Kitchen
- New interior finishes
- Various exterior repairs and preventative maintenance
- Repair damage to low brick walls around terrace perimeter
- Upgrade all interior and exterior lighting to LED

Center for Technology and Rural Medicine

Renovation

- Various exterior repairs and preventative maintenance
- Upgrade lower-level mechanical room equipment (split-system AHU, boilers, pumps)
- Update Break Room off Entrance Lobby
- Replace carpet in lecture halls
- Upgrade remaining interior and exterior lighting to LED

Clinical Evaluation Center

Renovation

- ADA Renovations: Accessible route from parking to building and entrance door upgrades
- Various exterior repairs and preventative maintenance
- Upgrade remaining fluorescent and HID lighting to LED

Maintenance Building

Renovation

- Construct storage mezzanine in open bay
- Various exterior repairs and preventative maintenance
- Address paint booth exhaust and make-up air
- ADA Renovations: Parking, door upgrades and restroom renovations
- Upgrade all interior and exterior lighting to LED

WV State Police – Lewisburg Detachment

Renovation

- Install fire-rated wall between living area and garage
- Repair stair to basement on back of building
- Upgrade R-22 HVAC equipment
- Renovate restrooms to comply with ADA
- Relieve moisture issues in basement
- Upgrade all lighting to LED

Founders' Activity Center

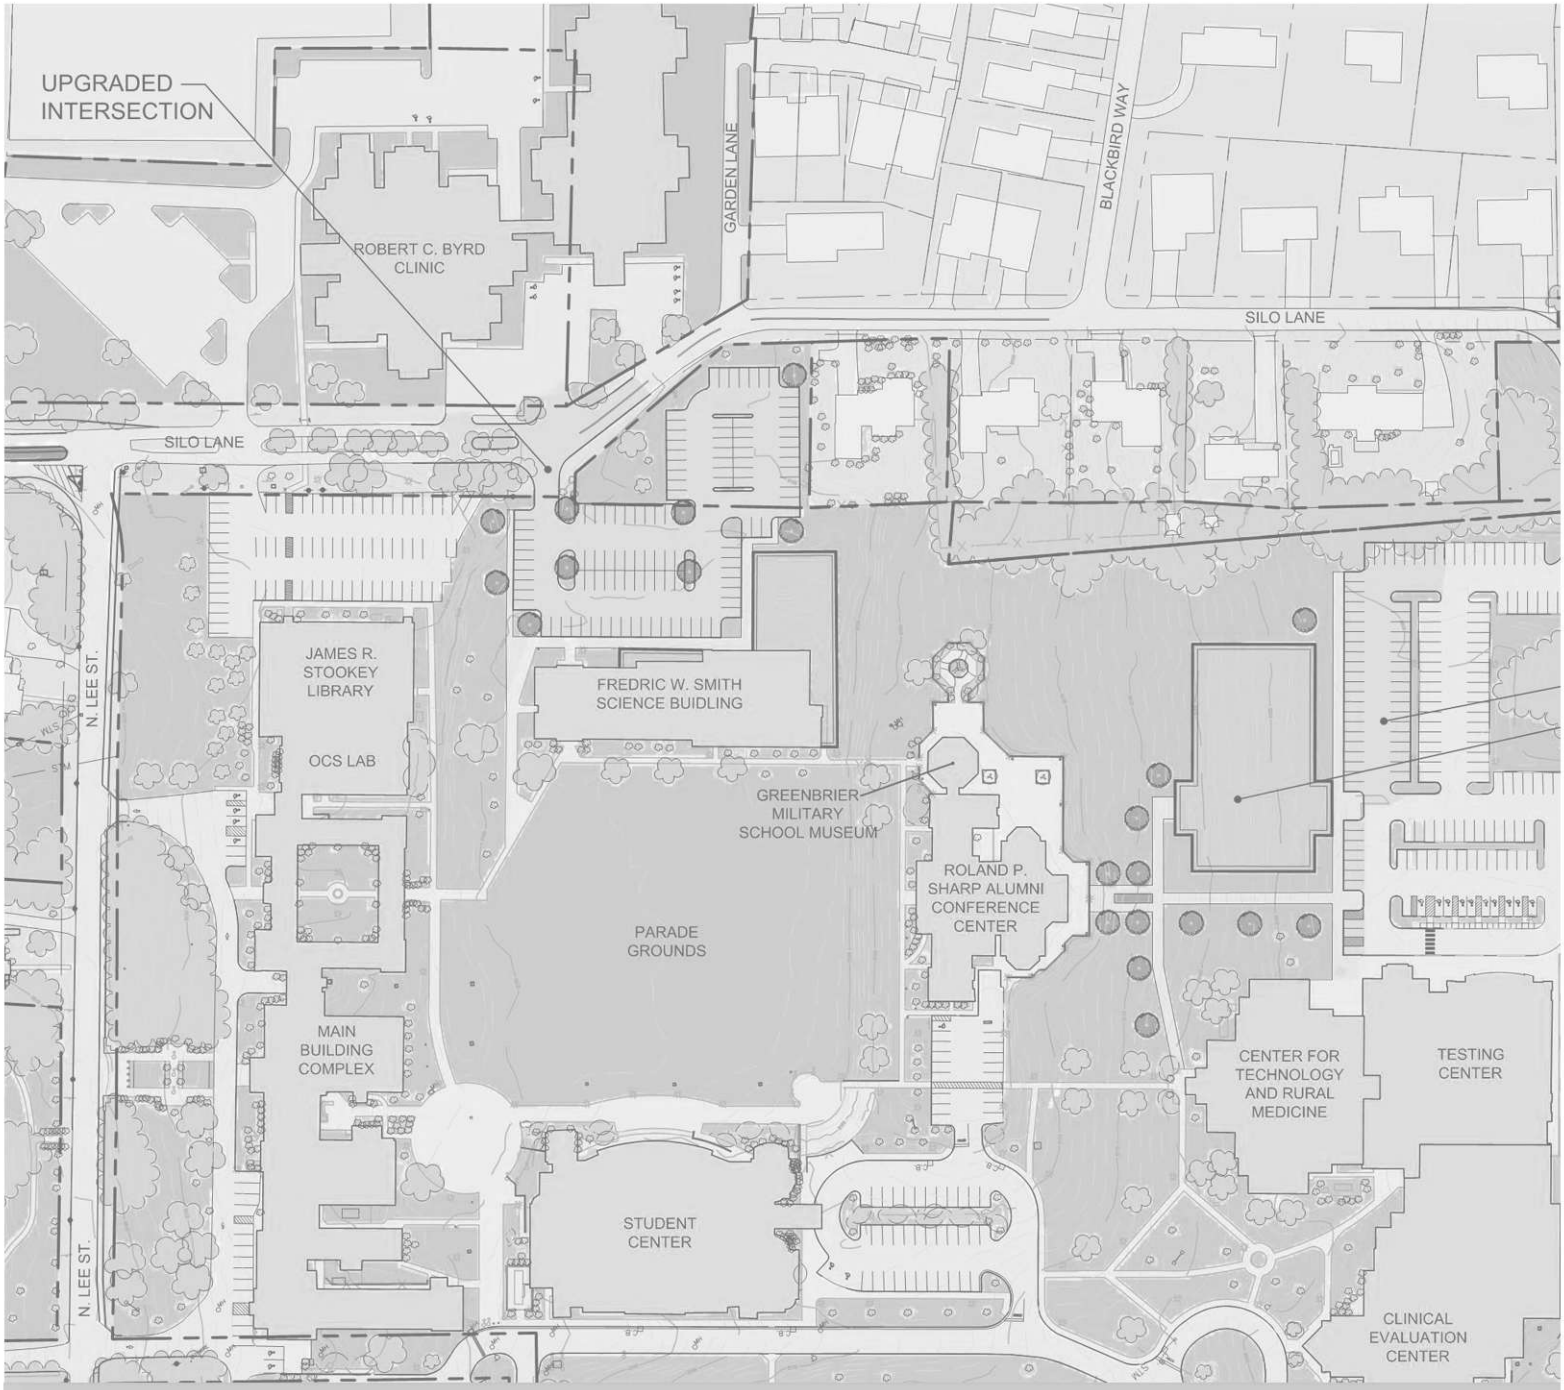
Renovation

- Upgrade HVAC systems
- Repair valleys and gutter on perimeter drainage system
- Repair EIFS damage around building perimeter
- Various exterior repairs and preventative maintenance
- Repair concrete slab in gym and replace damaged floor
- Renovate to increase number of plumbing fixtures

Robert C. Byrd Clinic

Renovation

- Remove and replace ballasted EPM roofing on original building
- Repair, repoint and reseal cast stone coping, banding and trim around building perimeter
- Various exterior repairs and preventative maintenance
- Repair water damage to brick veneer under window/wainscot trim around building
- Upgrade return fan with bearing issues
- Upgrade Entrance Lobby design and finishes
- Upgrade the Generator and ATS

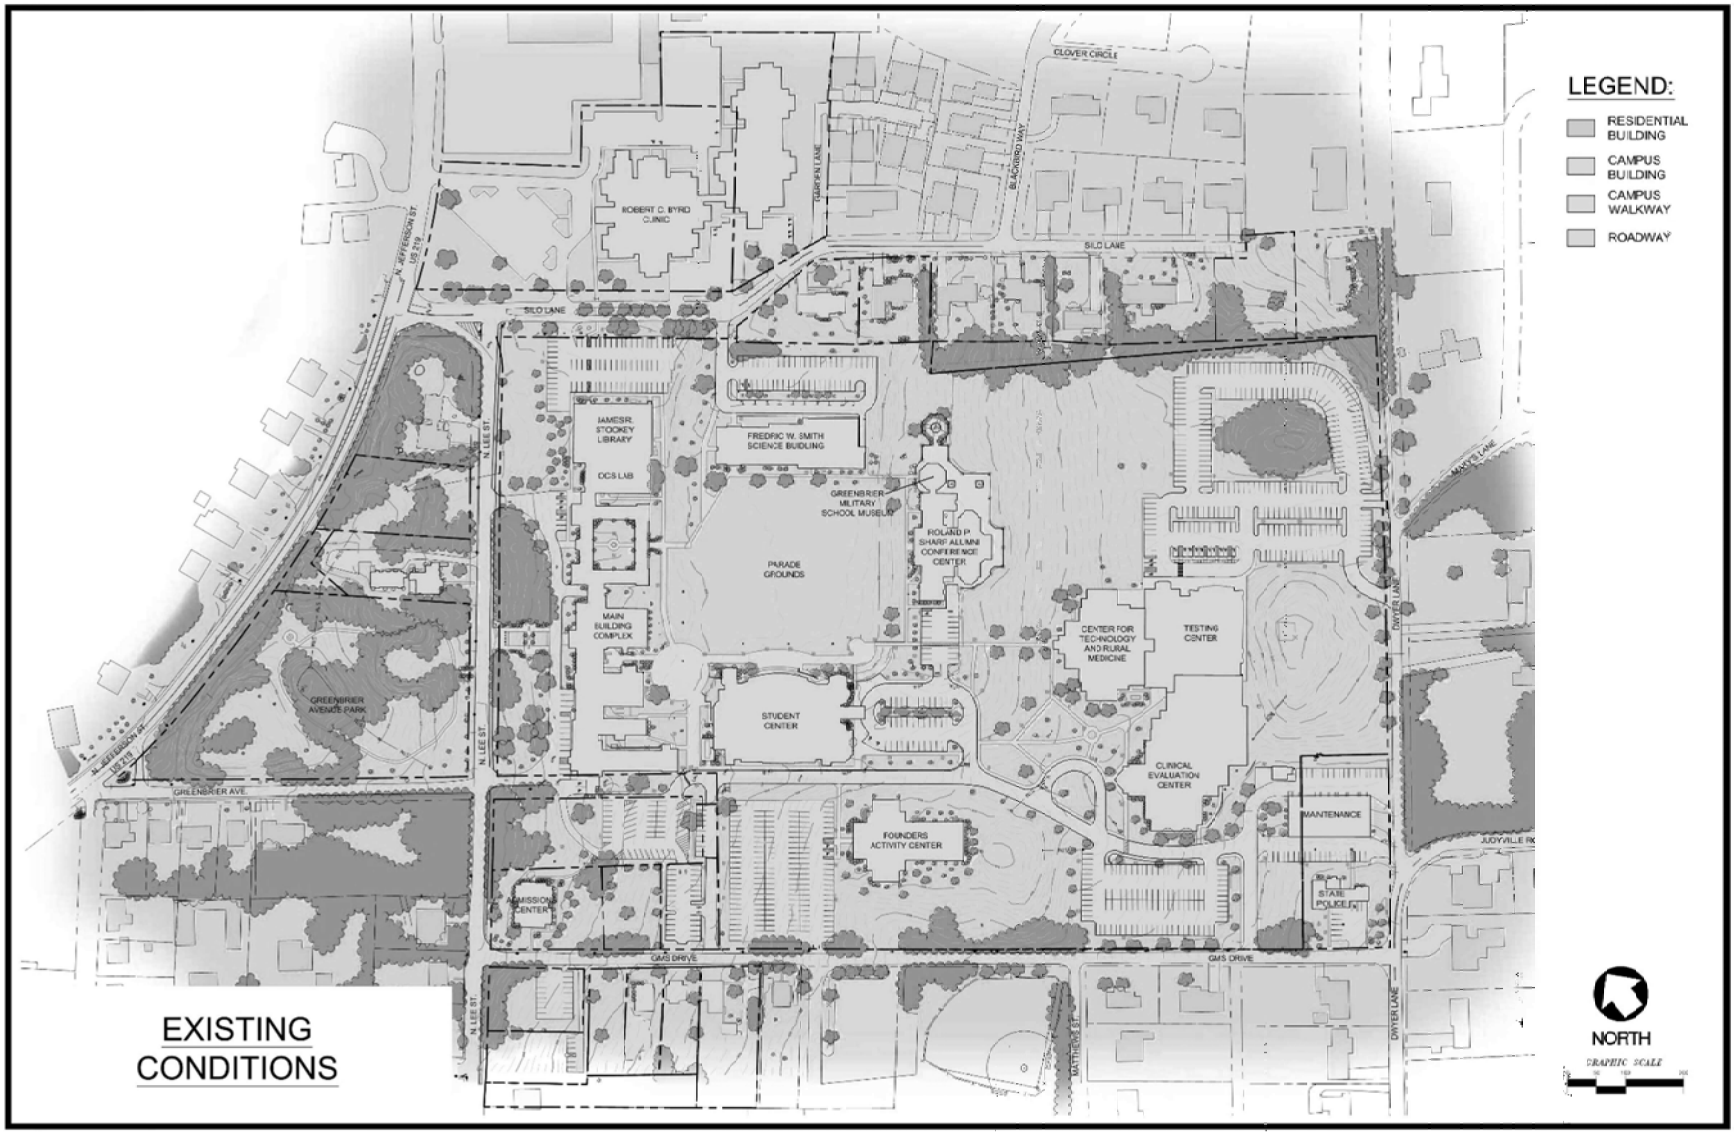


Section 5

MAJOR SITE IMPROVEMENTS

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

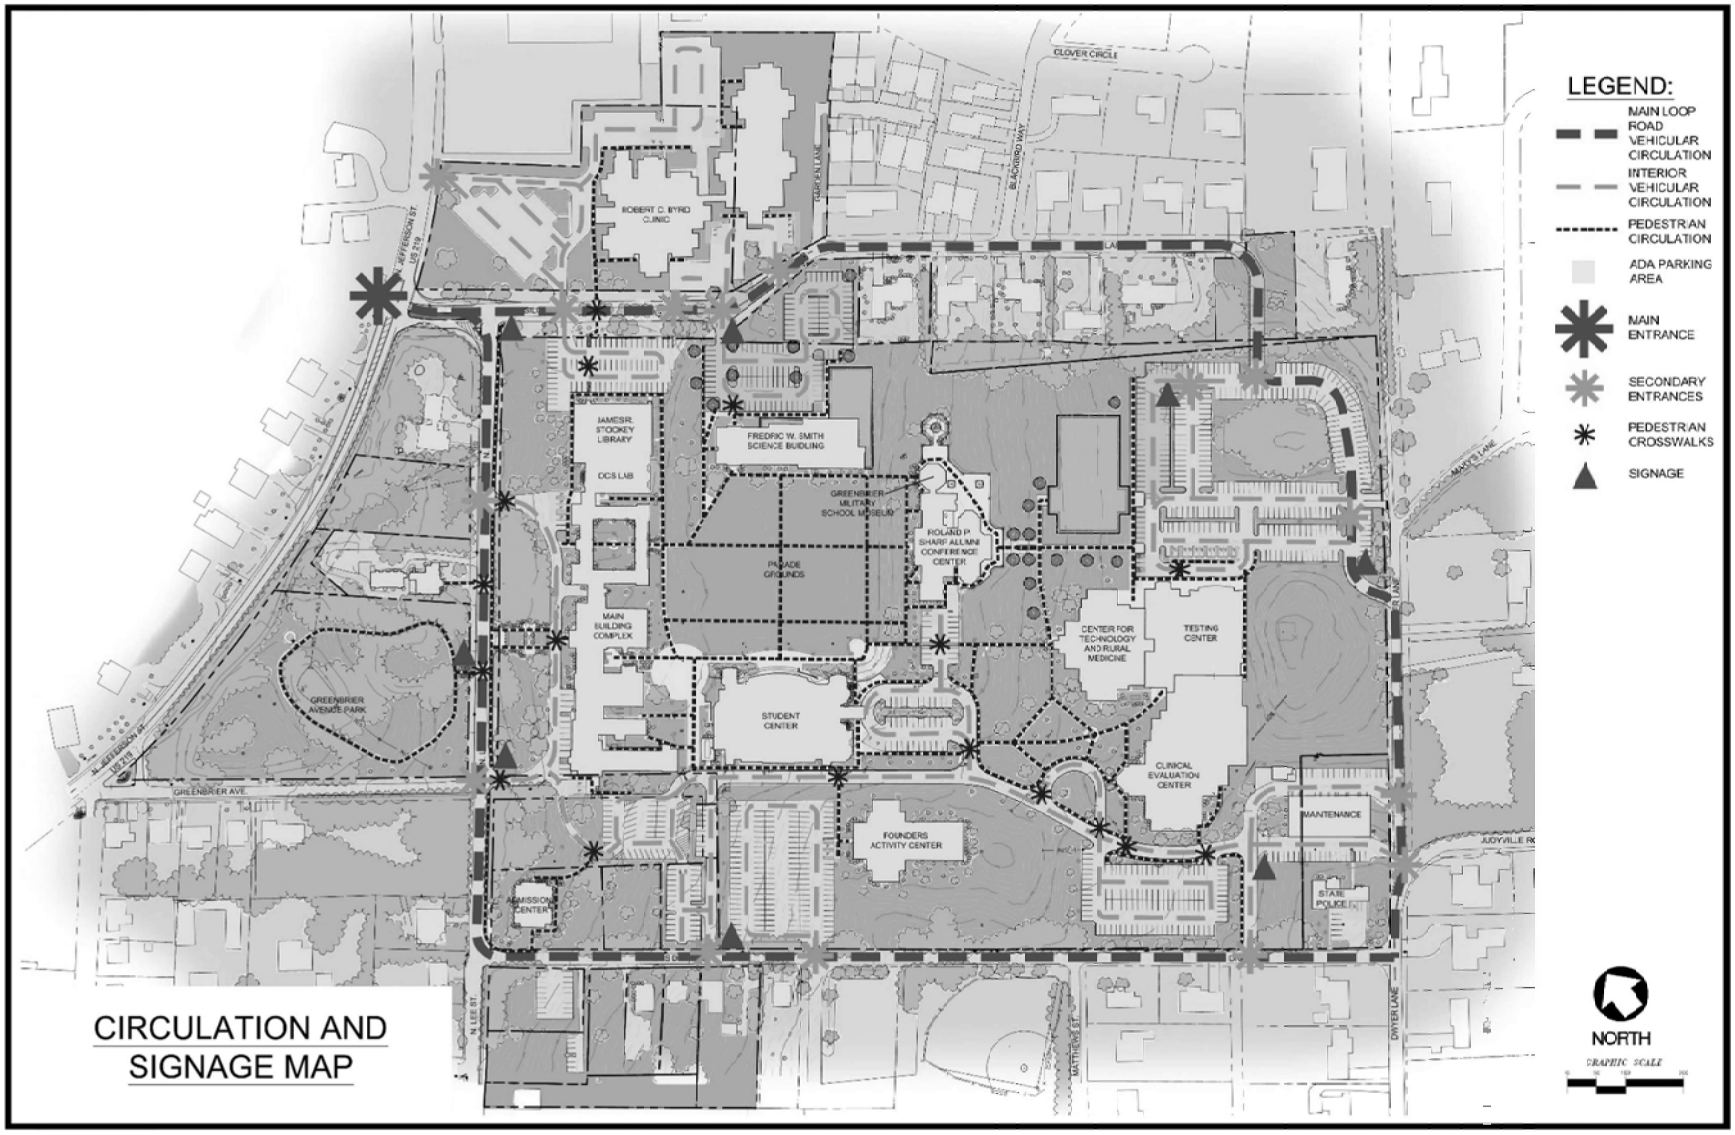


MAJOR SITE IMPROVEMENTS

Circulation Overview

The West Virginia School of Osteopathic Medicine (WVSOM) is located within the City of Lewisburg, West Virginia. It is bound by Collector Roads and Local Streets that form the perimeter of the campus: Silo Lane to the north, a local street; Dwyer Lane to the east, a hybrid between a collector road and a local street; GMS Drive to the south, a local street; and North Lee Street to the west, a collector road. Collector Roads are defined as roadways that serve internal traffic within an urban area and connect it with the Arterial system. Local Streets provide access to adjacent residential areas.

The overall intent of the circulation master plan is to create obvious and safe pedestrian and vehicular circulation on the WVSOM Campus. Pedestrian circulation should take priority wherever possible.



MAJOR SITE IMPROVEMENTS

Vehicular Circulation

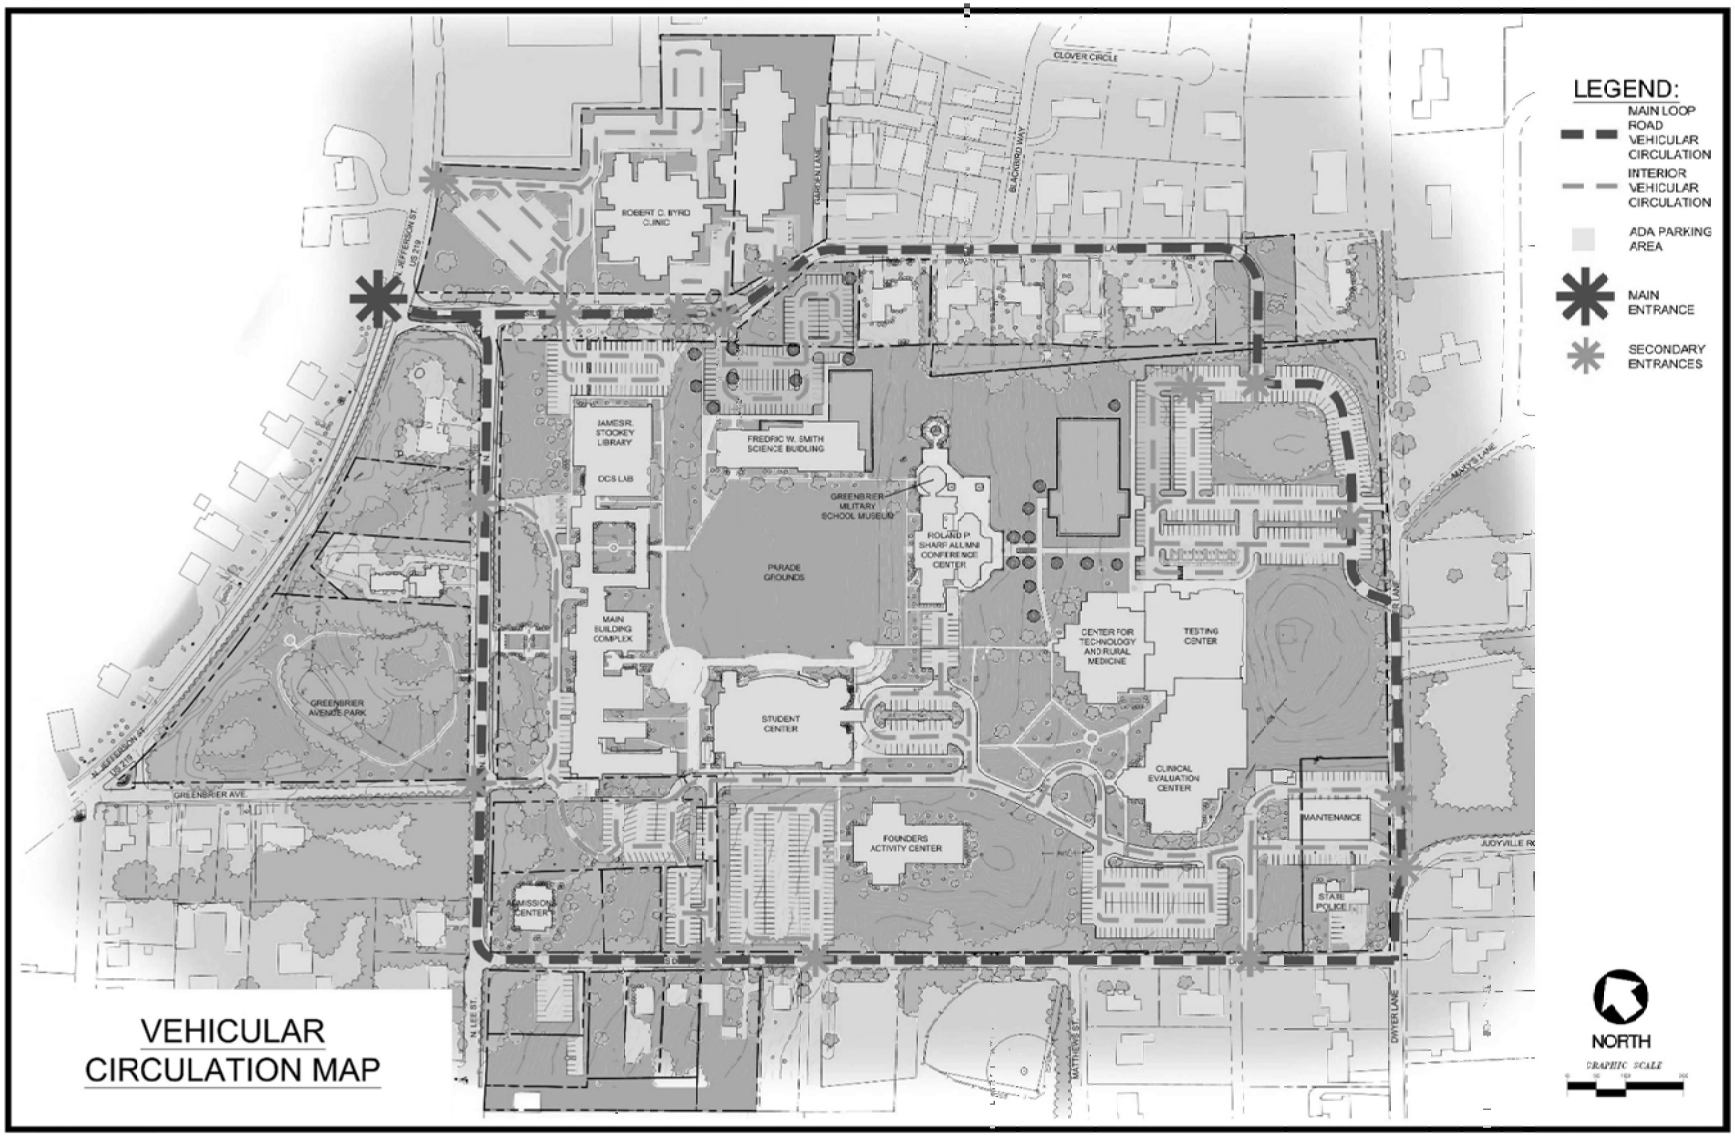
There are nine (9) access/egress points off these perimeter roads. There are two (2) entrances along North Lee Street, providing access to the Main Building Complex. There are three (3) entrances along GMS Drive, providing access to the Student Center, the Founders Activity Center, and the Clinical Evaluation Center. There are two (2) entrances along Dwyer Lane, providing access to the Maintenance Building, the Center for Technology and Rural Medicine, and the Testing Center (currently under construction). There are two (2) entrances along Silo Lane providing access into the Robert C. Byrd Clinic, the Frederic W. Smith Science Building, and the James R. Stookey Library.

There is one intersection with an Arterial Roadway, the intersection of US Highway 219 and Silo Lane. An Arterial Roadway serves primarily to move traffic between principal traffic generators, i.e., commercial traffic, with little to no residential access. US Highway 219 is one of two Arterial Roadways providing access and egress into and out of downtown Lewisburg, providing direct access from Interstate 64. This entrance is specifically targeted within this mater plan for upgrade to create a Gateway Feature into campus and give direct campus visibility along US Highway 219. The Gateway Feature would include roadway widening to contain an island for new signage and landscaping.

Dwyer Lane also provides access to US Route 60, the other Arterial Roadway providing access and egress into and out of downtown Lewisburg. Dwyer Lane can be defined as a cross between a Collector Road and a Local Street. It provides access for internal traffic to an arterial roadway (US Route 60), but it also serves residential properties.

There are currently, two hundred and seventy-five (275) faculty and staff and four hundred (400) students, totaling six hundred and seventy-five (675) possible persons on campus at one time. Accommodating six hundred and seventy-five (675) persons, plus visitors, into and out of the WVSOM can be problematic at peak travel times, i.e., 8 AM and 5 PM with only one (1) access to an Arterial Roadway. Traffic is known to cause long wait times at peak travel times along North Lee Street and Dwyer Lane as people try to gain access or egress to US Highway 219 and Route 60.

Possible thought should be given to creating a tenth (10) campus entrance at the end of Silo Lane, bisecting the residential lot owned by the WVSOM. While this would not increase the number of accessible points to Arterial Roadways, it would give a third alternate to entering/exiting a large parking lot, and perhaps direct a small percentage of traffic away from Dwyer Lane and North Lee Street.
In addition to the Gateway Feature improvements described above, a second intersection is proposed for upgrades, Silo Lane at the Robert C. Byrd Clinic entrance and the Science Building parking lot entrance. The 3-way intersection would be improved to accommodate the following: (1) a new parking lot with the demolition of the existing residential dwelling; (2) the reconfiguration of the existing parking lot at the Science Building; (3) a building addition to the Science Building; and (4) an interior connector drive, parallel to Silo Lane at the rear of the residential properties. The new connector drive would connect the parking lots at the Science Building and at the Testing Center Building.



MAJOR SITE IMPROVEMENTS

Pedestrian Circulation and Open Space

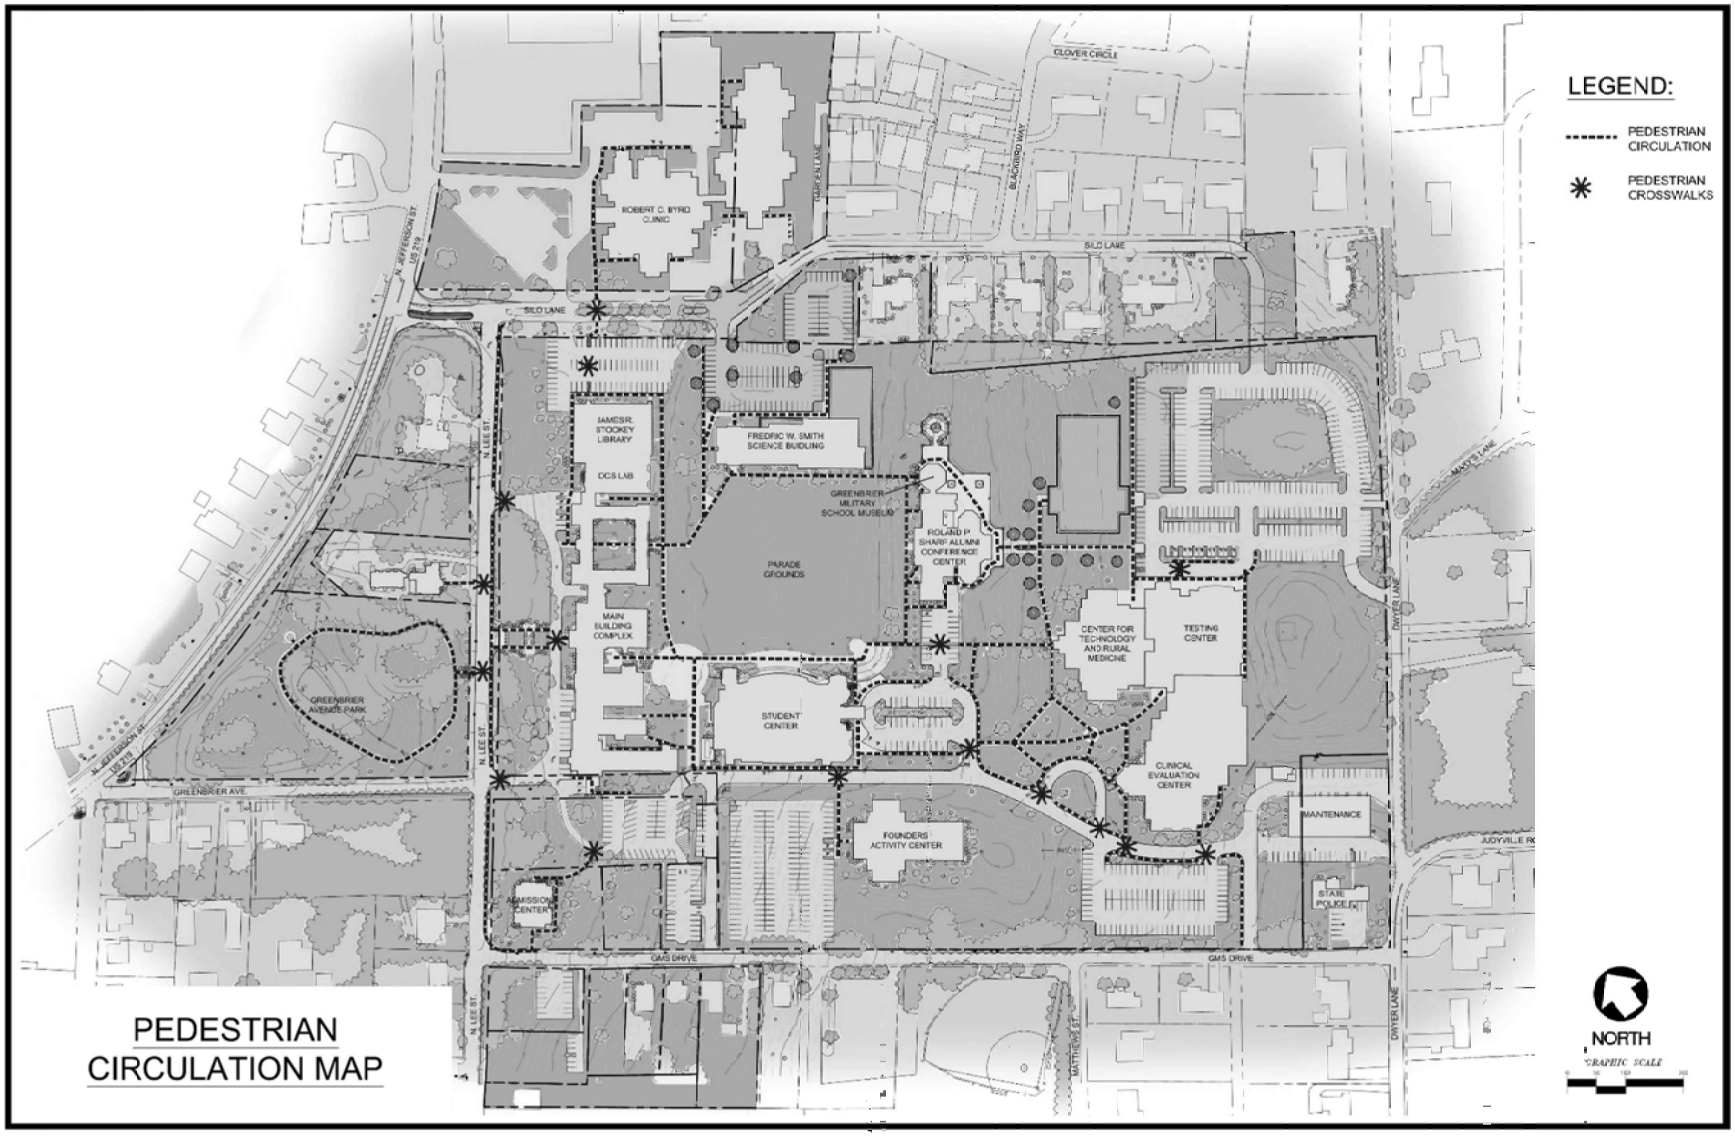
The main core of any campus are pedestrian only zones, outside of WVSOM service vehicles. Pedestrian zones allow for students, faculty, and staff to walk and access buildings without any conflict with vehicles. The main core of the WVSOM Campus is the Parade Ground, which is a historic component of the campus from when the campus was the Greenbrier Military School. The Parade Ground is a very large green space, with perimeter sidewalk. It is encircled by the Main Building Complex, the Student Center, the Alumni Conference Center, Science Building, and the Library.

The Quad Area is a second, minor area of pedestrian circulation. It currently allows for pedestrian circulation between the Activity Center, the Student Center, the Center for Technology and Rural Medicine, the Testing Center (currently under construction), and the Clinical Evaluation Center. The Master Plan proposes additional sidewalk with the construction of a new building behind the Alumni Center.

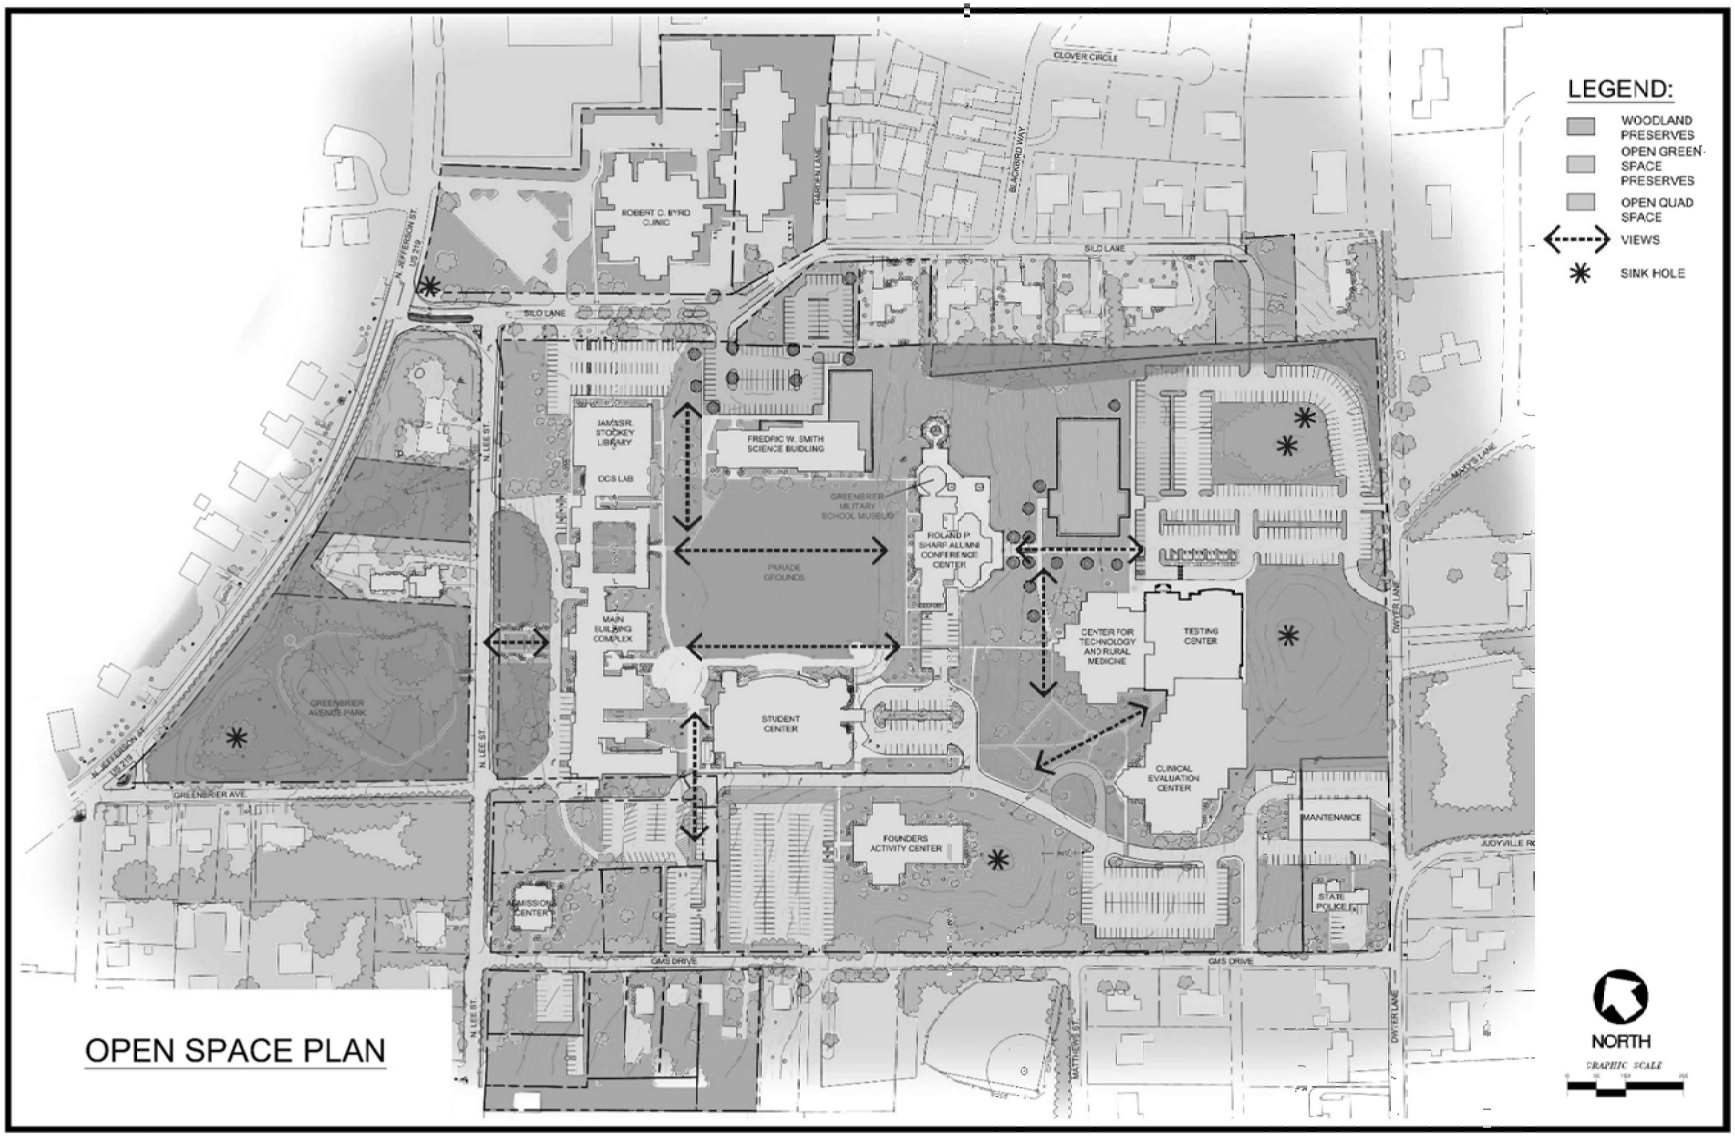
The Parade Ground and the Quad Area provide outdoor gathering space. They both serve as a multipurpose lawn for casual passive activities as well as planned events in conjunction with the Main Building Complex, the Student Center, and the Alumni Center.

Outdoor areas will be enhanced through new sidewalks and landscape areas to encourage continued use of the outdoor spaces for studying, relaxing, small gatherings, and planned events. Landscaping is used to emphasize the form of the campus and pedestrian circulation while enhancing buildings. Large deciduous trees provide shade during the warm growing season, and allow sunlight in the winter months. A minimalist approach to plant materials is suggested in anticipation of future limitations to the annual maintenance budget.

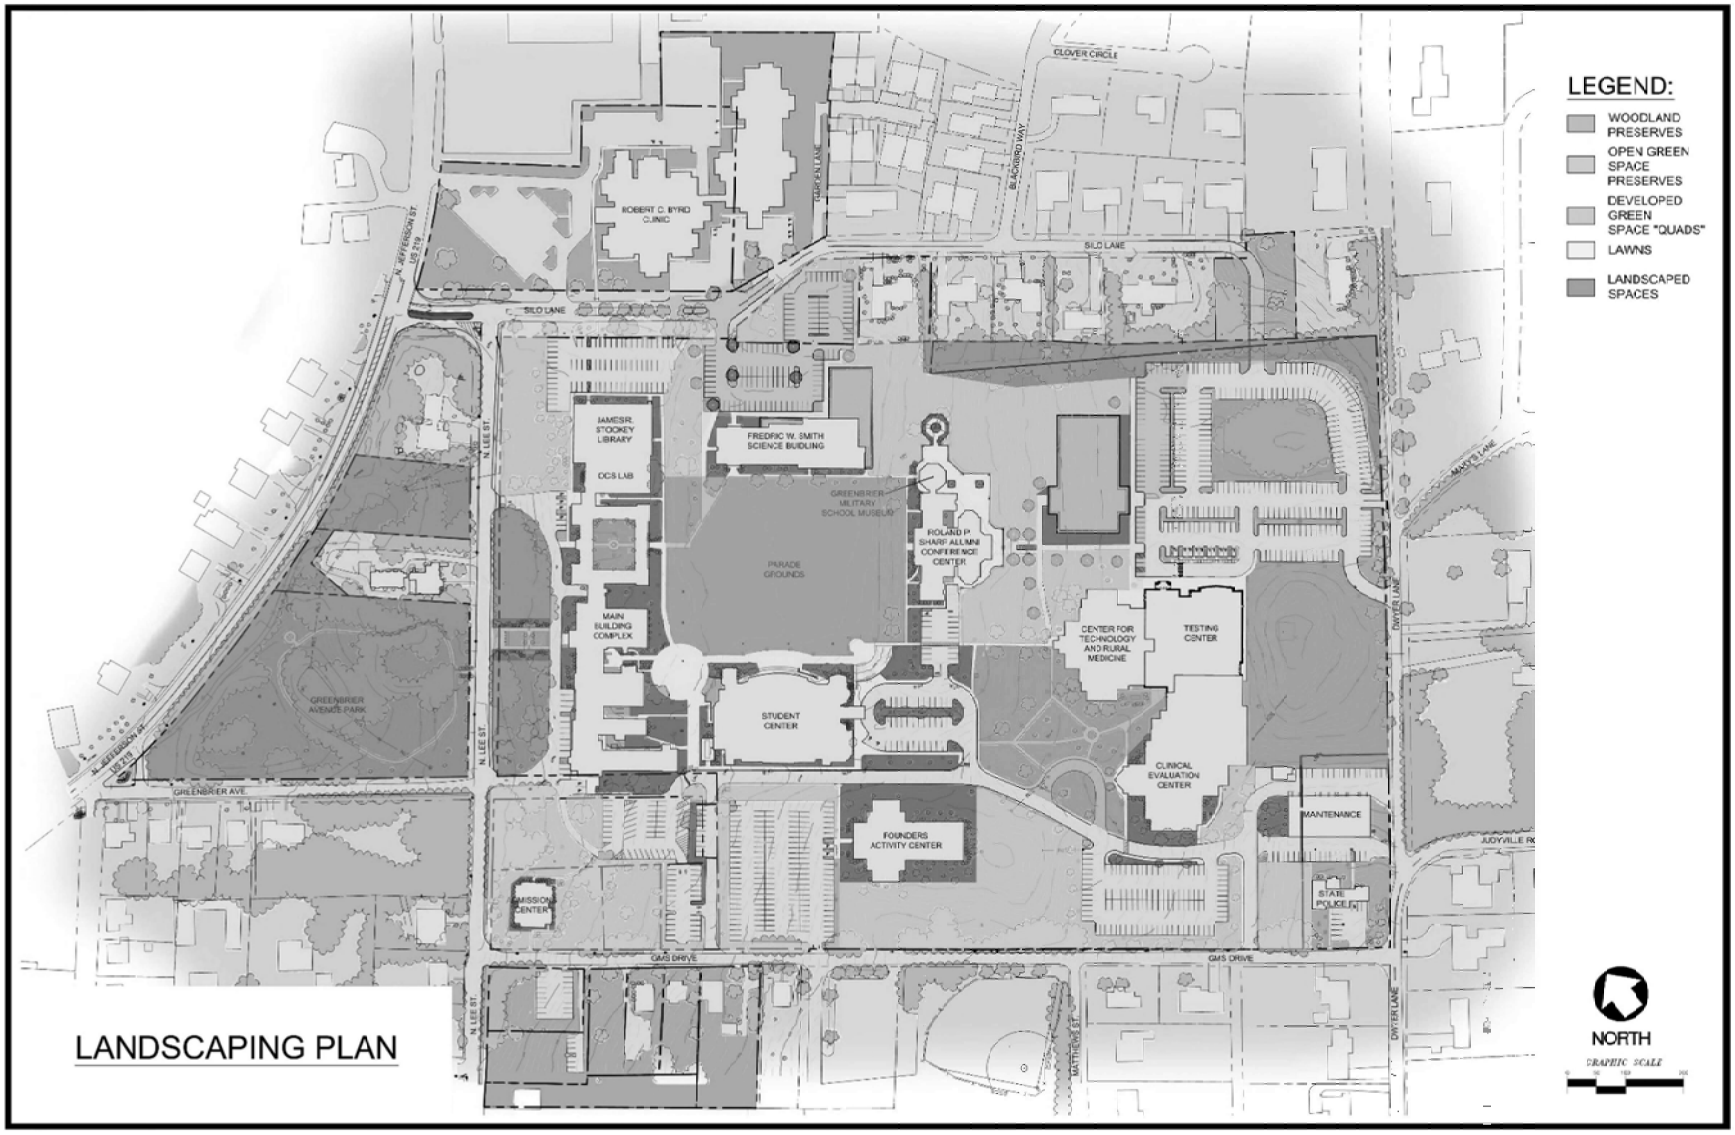
The Master Plan also recommends the installation of bicycle racks at academic buildings, the student center, and the activity center. The installation of benches throughout the greenspace is also recommended to encourage continued use.



MAJOR SITE IMPROVEMENTS



MAJOR SITE IMPROVEMENTS



MAJOR SITE IMPROVEMENTS

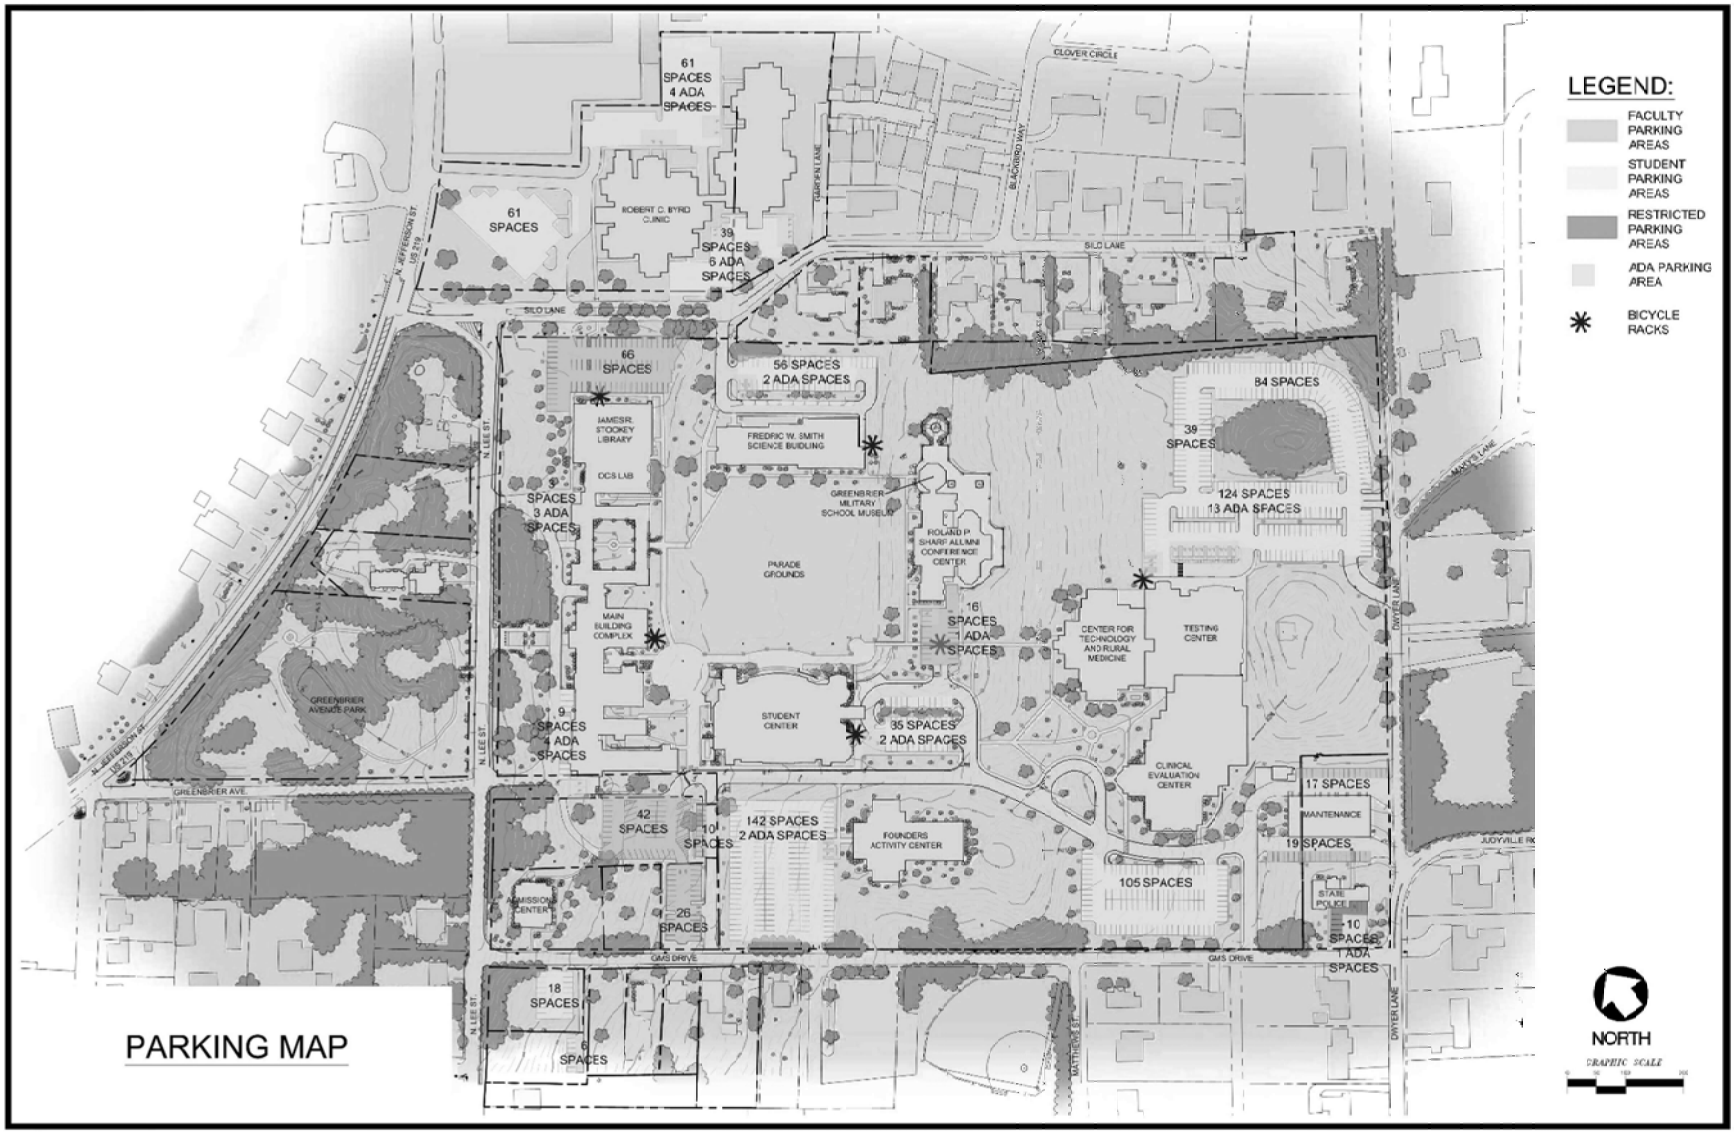
Parking

There are currently over eight hundred (800) parking spaces and approximately thirty-two (32) handicap accessible parking spaces within the WVSOM Campus. With approximately six hundred and seventy-five (675) possible persons on campus at one time, the existing eight hundred (800) parking spaces, the current parking plan provide adequate parking to accommodate faculty, staff, students, and visitors. As new buildings are added additional parking will also be included in the building design.

Parking Lots P5, P6, P10, and P11 are reserved for faculty and staff only. Lot P5 is the lot off Silo Lane at the James R. Stookey Library. Lot P6 is off GMS Drive to the south of the Main Building Complex and to the east of the Admission Center. It is comprised of two (2) small parking lots off the driveway to GMS Drive. Lot P10 is immediately adjacent to the Alumni Conference Center. Lot P11 is accessed off Dwyer Lane and is immediately adjacent to the Maintenance Building.

Students are allowed to park in Parking Lots P7, P12, and the back half of P8. Lot P7 is the large lot off GMS Drive immediately adjacent to the Student Center. Lot P12 is the large parking lot off Dwyer Lane. Lot P8 is off GMS Drive immediately adjacent to the Clinical Evaluation Center.

Parking Lots P1, P2, and P3 encircle the Robert C. Byrd Clinic and are reserved for patients and staff of the clinic.



MAJOR SITE IMPROVEMENTS

Building Improvements

The Master Plan calls for the construction of two (2) new buildings within the next ten years (10 YR) as demand increases for the existing academic programming or the addition of a new academic program. A new building is proposed within the greenspace immediately to the east of the Alumni Conference Center. The existing parking lot adjacent to Dwyer Lane would be enlarged to accommodate the new building. In addition, an expansion of the Science Building extending towards the Greenbrier Military School Museum is also proposed herein. This could coincide with the proposed intersection and parking lot improvements along Silo Lane between the Science Building's parking lot and the Robert C. Byrd Clinic.

INFRASTRUCTURE IMPROVEMENTS

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Gas Service

The WVSOM Campus is serviced by the Mountaineer Gas Company. The majority of all the buildings have natural gas service lines. Any proposed buildings will be designed to receive a gas service.

Water Service

Domestic water service to the WVSOM Campus is provided by the City of Lewisburg, with a system that encircles the campus perimeter and interior lines feeding each building.

Electrical and Telecommunications

Extensive electrical and telecommunication systems have been extended through out the WVSOM Campus. In addition, several buildings have emergency generators. For those buildings that don't have emergency generators, thought should be given to the installation of transfer switches and emergency power hookups for emergency generator connections.

Sanitary Sewer Collection

The WVSOM is serviced by the Greenbrier Public Service District #1 (GPSD #1), with perimeter sewage trunk lines along the perimeter of campus and interior services lines to all buildings.

Storm Drainage Collection and Discharge

The WVSOM Campus is in Lewisburg, WV, Greenbrier County, which is known to be a karst area. The term karst refers to a type of landform or terrain that is characterized by the presence of sinkholes, caverns, irregular bedrock surface, and springs. The development of karst terrain is a result of the present of soluble bedrock such as limestone, dolomite, marble, or gypsum. Any landscape that is underlain by soluble bedrock has the potential to develop a karst terrain landform.

The most prevalent type of karst feature observed at the ground surface are sinkholes. Sinkholes fall into two (2) broad categories, termed vault collapse or cover collapse sinkholes. Vault Collapse sinkholes are usually characterized by a cavern vault roof that has failed catastrophically and are relatively rare in karst topography.

Cover Collapse sinkholes, which are more common, are developed by the raveling of overburden into solution channels within a bedrock mass. Water is the transport medium for the movement of sediment fines. The natural raveling process is generally slow such that sinkhole development generally occurs over a long-time span. However, various changes at a site can lead to the sudden and unanticipated development of sinkholes.

The most common changes that may initiate sinkhole development are described below.

1. Increase or redirection of overland or subsurface water flow paths, which accelerates the raveling of fines.
2. Removal of vegetation cover and topsoil, i.e., stripping and grubbing, which can reduce the cohesive strength of overburden that overlies a conduit.
3. The sudden changes in the elevation of the water table, such as drought, over pumping of wells, or quarry dewatering, which alters the natural buoyance of the surrounding water table.

There are six (6) known sinkholes within the WVSOM Campus. One is located at the intersection of US Highway 219 and Silo Lane in the greenspace area adjacent to the Robert C. Byrd Clinic parking lot. It is a permitted injection well through the West Virginia Department of Environmental Protection (WVDEP). There are two (2) small sink holes just off Dwyer Lane in a wooded area behind the residential lots fronting Silo Lane. Another sink hole area is behind the Founders Activity Center, which receives collected stormwater runoff from three (3) pipe outfalls.

The second largest area of sink hole activity is located adjacent to Dwyer Lane behind the Center for Technology and Rural Medicine, the Testing Center, the Clinical Evaluation Center, and the Maintenance Building. This is an area of concern as it receives collected stormwater runoff from large impervious areas such as the surrounding buildings and parking lots. With the construction of the Testing Center and the enlarging of the parking lot to accommodate the Testing Center, an underground detention system was installed beneath the existing parking lot off Dwyer Lane.

All new storm drainage associated with the Testing Center building and parking lot expansion was designed to collect stormwater runoff and direct it to the underground detention system. In addition, an effort was also made to collect and/or redirect the existing storm drainage system in this area into the underground detention system to keep it from directly out falling into the existing sink hole.

This effort to collect existing and new storm drainage systems was made due to the continued subsidence being experienced in an around this sink hole from the increase in stormwater runoff as the campus has developed with new buildings and parking lots, all impervious surfaces. Previous work to stabilize the sink hole subsidence has included the removal of loose soils down to bedrock and the installation of geotextile fabric and gravel in place of the removed soils.

While the underground detention stormwater detention does not reduce the peak stormwater runoff to at or below the Pre-Development Conditions of 2004 is does provide for some reduction in peak runoff. The underground detention system reduces the peak stormwater runoff on average thirty-eight percent (38%).

To try and provide stormwater detention to at or below the 2004 conditions would become cost prohibitive. In addition, expanding the detention system into the greenspace between the newly expanded parking lot would encroach into the sink holes in the wooded area. The chance of encountering voids and/or fissures associated with the karst geology is high during the excavation required to install the proposed underground detention system.

Should this sink hole continue to experience subsidence, even with the newly provided upstream detention system, an injection well with drilled piping and an oil/water separator will need to be designed and permitted through the WVDEP.

The largest area of sink hole activity is at the intersection of US Highway 219 and Greenbrier Avenue. There are three (3) permitted injection wells at this location including an upstream detention pond to control the amount of stormwater runoff entering the injection wells through an interconnected storm piping system. This area formerly saw frequent flooding and/or ponding of stormwater runoff, thereby creating three (3) large subsidence areas. The newly installed injection wells and detention system have been controlling runoff and allowing for the safe injection of the stormwater runoff back into the water system.

PROPERTY ACQUISITION BOUNDARIES

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Current WVSOM Property

The WVSOM currently owns eleven (11) properties along the perimeter of campus proper. These include three (3) of the four (4) properties along North Lee Street between US Highway 219, Silo Lane, and Greenbrier Avenue. The school does not own the lot at the corner of Silo Lane and North Lee Street. Along Silo Lane, the WVSOM owns two (2) properties. The first is immediately across from Garden Lane and the second is the un-developed lot at the end of Silo Lane. The school does not own any properties along Dwyer Lane. Along GMS Drive, the WVSOM owns six (6) properties Beginning at the intersection of North Lee Street and GMS Drive, the first five (5) lots belong to the school, with the sixth property fronting North Lee Street.

Properties Targeted for Acquisition

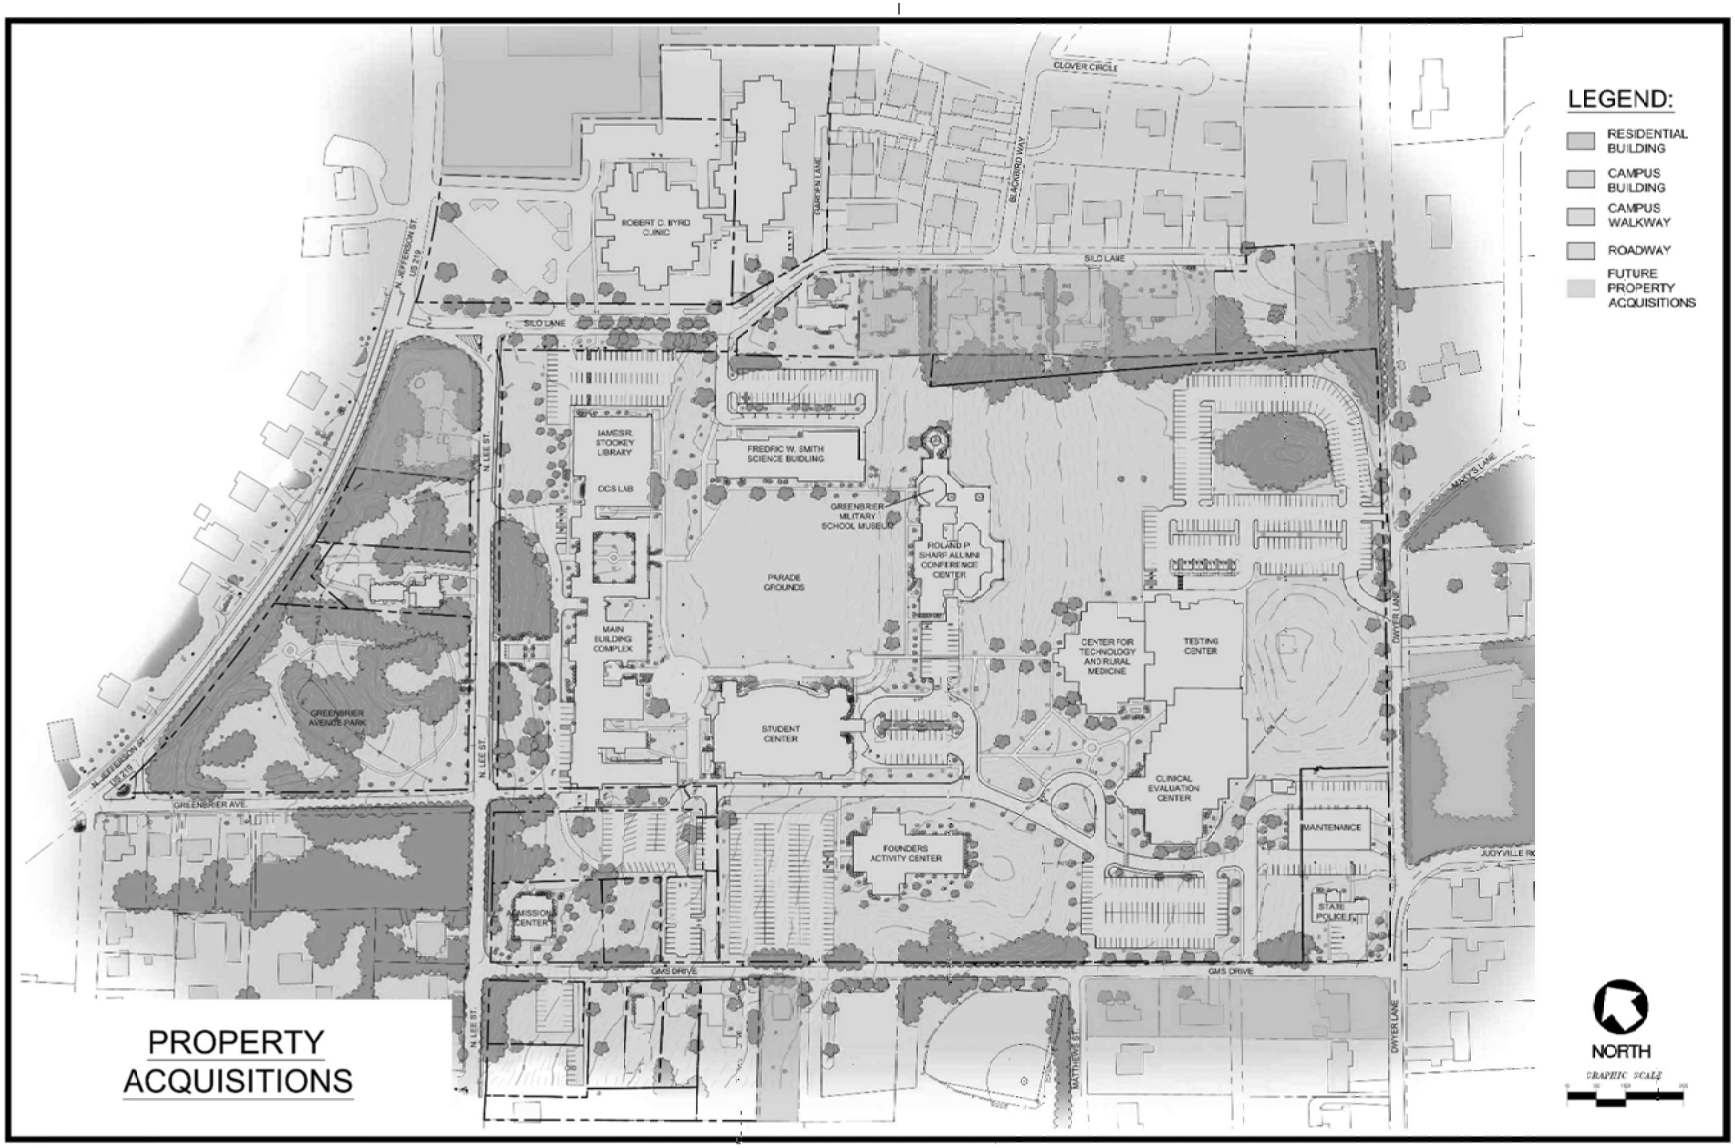
Proposed herein is the targeted acquisition of perimeter properties that would allow for the future expansion of the campus as the school enlarges to accommodate the increase in existing programming and/or the addition of new program(s). There are thirteen (13) properties along the perimeter of campus that should be considered for acquisition. The first would be the property at the intersection of Silo Lane and North Lee Street. This would complete the acquisition of all properties between the school and US Highway 219.

Another property that should be targeted is the parcel fronting GMS Drive, immediately adjacent to the City Parking Lot at Hollowell Park. This would complete the acquisition of all properties along GMS Drive between North Lee Street and Hollowell Park. Additional properties along GMS Drive include the three (3) parcels between Matthews Street and Dwyer Lane. Again, completing ownership of all parcels, with the exception of Hollowell Park along GMS Drive.

Another property for possible acquisition is the three and five tenth acres (3.5 AC) property at the intersection of Dwyer Lane and Judyville Road, directly across from the Maintenance Building. This is a large parcel of property for a residential area and is believed to be vacant.

Another targeted area would be the six (6) lots along Silo Lane adjacent to the WVSOM Campus. This would tie in well with the herein, proposed access drive through the vacant lot at the end of Silo Lane.

The largest piece of property for possible acquisition is the approximately six-acre (6 AC) parcel fronting US Highway 219 to the north of the Robert C. Byrd Clinic. It is currently comprised of Greenbrier Chevrolet.



PROPERTY ACQUISITION BOUNDARIES

NEW FACILITIES AND BUILDING SITES

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Observations and Recommendations by Program

CannonDesign and ZMM toured the Fredric W. Smith Science Building with Dr. Jandy Hanna and Dr. Kristie Grove Bridges on June 3, 2021. This report was developed through discussions and observations made during the tour and previous discussions with ZMM. Information is intended to capture conditions and projected needs based on the best available information at this point in time. As a project progresses into design, the program and program requirements must be reviewed with users at the programming and concept design through construction document stages to confirm that all program requirements have been met.

ADA Accessibility

The Department of Justice published revised regulations for Titles II and III of the Americans with Disabilities Act of 1990 "ADA" in the Federal Register on September 15, 2010. These regulations adopted revised, enforceable accessibility standards called the 2010 ADA Standards for Accessible Design "2010 Standards" or "Standards". The 2010 Standards set minimum requirements – both scoping and technical – for newly designed and constructed or altered State and local government facilities, public accommodations, and commercial facilities to be readily accessible to and usable by individuals with disabilities.

While a full review of the Science Building for compliance with the ADA Standards for Accessible Design is beyond the scope of this planning study and was not completed by the ZMM and CannonDesign team, it was observed that there are some spaces accessed by students that did not have accommodations to be readily accessible to and usable by individuals with disabilities.

As a state-funded public institution, West Virginia School of Osteopathic Medicine must follow the 2010 Standards for State and local governments, which consist of the Title II regulations at 28 CFR 35.151 and the 2004 ADAAG at 36 CFR part 1191, appendices B and D for new construction or alterations. It is recommended that a full review of requirements for alterations be completed as part of a detailed study prior to the commencement of a renovation project and before decisions are made regarding considerations of renovation versus expansion or new construction.

Specific to laboratories, the 2010 Standards require a percentage of the following within each space accessed by students to be accessible:

- Fume hoods
- Sinks
- Workstations
  - This can be accomplished with flexible adjustable height laboratory casework if deemed an equal and reasonable accommodation.
- Safety accommodations such as but not limited to emergency showers and eyewashes.
  - It is recommended that an accessible emergency shower and eyewash combination unit be provided where required.
- Laboratory service fixtures
- Biological Safety Cabinets

Laboratory Safety

The Occupational Safety and Health Act of 1970 was enacted to assure that workers are provided with "safe and healthful working conditions." OSHA has adopted several regulations that refer to the use of emergency eyewash and shower equipment. The primary regulation is contained in 29 CFR 1910.151, which requires that, "...where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use." Due to the ambiguity of the OSHA regulation, the American National Standards Institute (ANSI) has established standard ANSI Z358.1 to cover emergency eyewash and shower equipment. The standard, which is a guideline for the proper design, certification, performance, installation, use and maintenance of emergency equipment, has been adopted by the International Plumbing Code (IPC).

Laboratories where corrosives are used or stored require an emergency shower and eyewash. The emergency equipment must be installed within 10 seconds walking time from the location of a hazard (approximately 55 feet) and the path of travel from the hazard to the equipment should be free of obstructions (a door is considered an obstruction) and as straight as possible. It is recommended that where the emergency equipment is required, the emergency shower and at least one eyewash be ADA accessible. While eyewash/drench hoses provide immediate protection for the eyes, face, or body when a spill involves a relatively small amount of hazardous material, they are considered as supplemental non-accessible units and under ANSI/ISEA Z358.1, cannot replace a shower unit.

There is currently one emergency shower and eyewash on each level. On the first floor, they are located within room J102 which is a lab that has been converted to offices and therefore, is not always accessible by all laboratory users. On the second floor they are located within the hallway. The operable control of the emergency shower and eyewash is not located at an ADA accessible height and the emergency eyewash is not an ADA accessible type. For laboratories currently utilizing corrosives and for future alterations or expansion, West Virginia School of Osteopathic Medicine's Environmental Health and Safety personnel should deem a solution appropriate for the hazard based on the ANSI Z358.1 Standard.

Infrastructure

The facility is currently in process of upgrading select finishes, such as counter tops from laminate to epoxy resin, to achieve a Biosafety Level 2 as defined in *Biosafety in Microbiological and Biomedical Laboratories.* It is recommended that any wet lab within the building, altered or new construction be provided with finishes to achieve Biosafety Level 2. It is unlikely that there will be a need for Biosafety Level 3 in the future.

Modern laboratory facility designs utilize modular planning concepts that provide a basis for flexibility and adaptability of the space during design, construction, and throughout the occupancy of the facility. Standardized planning modules serve as an organizing basis for building structure, walls and partitions, as well as the distribution of building ventilation, utilities and services. To improve overall space efficiency and improve future flexibility and adaptability, it is recommended to use modular planning principles in a renovation or expansion of the building. The existing facility utilizes mostly structural concrete masonry units with some columns in the Gross Anatomy Labs. A 10.5 FT by 10.5 FT module is recommended to be the most efficient for newly designed spaces. The planning module is based on the bench area as a workplace for staging, procedures, instrumentation and equipment, along with the aisle space in front of the bench to allow for personnel and material movement. In the renovated facility, wall benches of 30-inch depth and island benches of 60-inch depth, are proposed to maintain minimum 60-inch aisles for safety and ADA accessibility. Generally, larger planning modules are less space efficient than smaller modules. While some laboratories are close to a 10.5 FT by 10.5 FT module or larger, others

are smaller and have problems with clearances between equipment and work surfaces. The 10.5 FT by 10.5 FT planning module leads to a structural module based on 21 FT and 31.5 FT dimensions; coordinating the planning module and the structural module reduces the number of situations where structural columns can interfere with efficient space utilization while providing for an efficient structural system.

The existing facility does not have a central natural gas system, and while it is understood that it is desired for the use of Bunsen burners and other functions, a plumbed system is not recommended due to the hazards it presents. For the limited use, it is recommended that alternative methods be considered. See Bunsen Burner Alternative Products: https://ehs.stanford.edu/wp-content/uploads/Bunsen-Burner-Alternative-Products.pdf

The existing building also does not meet current needs for emergency power. It is recommended that a generator be provided to serve the needs of the Vivarium and Research Labs as well as for the Gross Anatomy Support spaces, including the Cadaver refrigerators and desired new Cadaver Freezer. Full loads should be analyzed as part of the design.

The existing building has some point of use polishers to provide pure water within select research labs. Other labs fill carboys in these locations that are utilized within the labs. A new system to provide 1 megaohm water to provide a loop to research labs which can utilize point of use polishers to provide 18 megaohm water may be desirable.

Several spaces utilized local tanks for carbon dioxide and oxygen. These could be located in a closet on each floor and manifolded to the labs depending on how they are funded, shared source or by the various research programs.

References, Guidelines and Standards

Many aspects of the references, standards, and guidelines listed below are not addressed in the applicable building codes. The standards and guidelines listed provided minimum requirements and may be exceeded:

- Biosafety in Microbiological and Biomedical Laboratories (BMBL) CDC/NIH Publication 6th Edition – June 2020
- Guide for the Care and Use of Laboratory Animals, Institute of Laboratory Animal Resources, Commission on Life Sciences, National Research Council, National Academy Press, Washington, D.C., 8th Edition – 2011

Program

In general, there was a lack of collaboration space and write-up space outside of the laboratories for faculty and student interaction. There is no break room or dedicated location for eating or drinking which is not permitted in the laboratories. It is the expectation that this type of space will be provided within a renovation or expansion in addition to the upgrade of research space. Dr. Hanna suggested that the faculty be polled to determine the optimal location for office spaces to determine the level of office accommodation within a renovation or expansion. Additional program considerations for the Science Building are for a STEM lab space for teaching and research outreach to support several programs related to STEM Education or Research of middle school through college students.

It is desired that natural lighting be provided to the greatest extent possible in all areas regularly occupied by faculty and laboratory personnel. Internal windows are recommended to enhance infiltration of borrowed light from exterior spaces, and to enhance visibility of

laboratory personnel for safety and security. Natural lighting is not required in support labs and other areas where programmatic or scientific considerations would not support windows, such as Animal Holding Rooms. The skylights into the Gross Anatomy Labs are preferred.
Research Laboratories

Most existing research labs are undersized and do not have enough storage or work areas. Currently the labs can only accommodate two to three students with each research faculty and larger labs would facilitate increased research opportunities for students. Because there are many small labs, and a general space deficit, there are equipment in locations and adjacencies that are not ideal rather than being collocated with similar equipment or research use. For instance, J108 houses microscopes in addition to storage, and if larger, the microscopes could be combined with those in the Imaging Suite on the second floor to create a shared Microscopy core facility. Similarly, a lab being used as a shared equipment and freezer farm is located within the Gross Anatomy Suite in J112. The lab has a pure water system to support the building and is accessed by researchers on the second floor. Many labs have aisles that are two narrow and do not comply with accessibility or code requirements and present safety concerns.

It is projected that in the next 10-15 years that 10 faculty private investigators (PI) will require wet lab research space. A recommended allocation of research laboratory and laboratory support space per PI is 660 square feet. PIs that are less equipment intensive may require less space. It is recommended that compatible research be co-located in open research labs to maximize space efficiency and use of sinks, safety equipment, fume hoods, etc. This will also help to foster collaboration between researchers and students as well as the sharing of scientific tools. Labs planned on the recommended module can be more easily adapted as research needs change over time.

Some research labs require the one-way use of animals. It is recommended that dedicated research laboratories be provided directly adjacent with access into the Vivarium where possible. These could be provided in addition to the individual PI research allocations so that they can remain flexible to support growth and changing research needs over time.

There are two existing functional morphology research/innovation research labs within the Main Building. One lab has a chemical fume hood, used for processing dental samples. The other is a dry lab with some prototyping tools. It is recommended that both labs be relocated to an expansion of the Science Building to allow for connectivity between teaching and research as well as to facilitate the collaboration between the research faculty and programs, and the ability for students to observe all the various types of research within the facility.
Gross Anatomy

The Gross Anatomy Suite consists of an office space; bathroom and locker facilities for men and women; an Embalming Room, Plastination Lab; Cadaver Storage; Supply Storage; Anatomy Demonstration; and Gross Anatomy Lab with 44 down-draft dissection tables which can be sectioned into two labs (one original to the building and the other in the addition) with a mobile partition.

The existing office space requires adjustment to the HVAC system which was very loud. Locker rooms should be maintained for changing into scrubs, but does not need to be expanded to accommodate all students as most come to the lab and leave in their scrubs. More storage is required for the Embalming Room as the area planned for storage is used for Plastination. Expansion of the Plastination Lab is also desirable. The Cadaver Storage is within two adjacent rooms and provides an adequate amount of storage and refrigeration with two refrigeration units for two cadavers each, however, it is desired that the mortuary racks on wheels be replaced with fixed racks. The Gross Anatomy Lab was

generally found to be adequate and was confirmed to have appropriate ventilation and downdraft exhaust at the Lipshaw tables with covers. In the existing building portion of the lab, clearances around tables are much tighter than in the addition. It is recommended that this lab be expanded into J108 with tiers removed and expanded to the north to align with the addition to achieve similar clearances and layout of tables and downdraft to the addition portion of the space. Both Gross Anatomy spaces could benefit from the addition of surgical lights that can be repositioned which could also have cameras with increased AV capabilities to showcase cameras on the individual monitors and larger display within the room. It is desired that all sinks be hands-free. There is a need for an additional space to perform fresh prep and autopsy demonstrations which could also accommodate the request for a freezer unit for two cadavers. It is recommended that the shared equipment lab in J112 be relocated into an expansion for this space to be located within the Gross Anatomy Suite close to the Anatomy Labs and Cadaver Storage rooms. It is critical that the Suite be near the loading/receiving space for discrete delivery and pick up of cadavers. Additional storage within an expansion near the Suite and receiving space for bulk storage of gloves and other supplies. The Suite must be secure from the rest of the building. See diagrams.

Vivarium

The current Vivarium houses rodents and is configured with a 'clean corridor' and 'dirty corridor'. Clean cages enter the holding rooms along the clean corridor directly from the clean cage washroom and dirty cages exit the rooms from a separate door along the dirty corridor to the soiled cage washroom. The current washroom accommodates a cage and bottle washer and has an area for washdown with a floor drain and hose rack. When the Autoclave was added to the former Clean Cage Storage Room, the separated flow of clean and dirty materials was impacted. The clean cages now must be moved across the dirty corridor outside of the clean perimeter, increasing chances of contamination. Research faculty and personnel that may not have a need to access the Vivarium must now enter the facility to access the Autoclave which would be more properly located by the research labs and microtome equipment. The dirty corridor is also traversed by research faculty and personnel on the second floor requiring access to the service elevator. This being the only elevator in the building, at times it may also have a need to function as a passenger elevator.

New Vivarium facilities typically utilize one secure corridor and a cagewash facility that is separated into clean and dirty areas like the existing. Because the rest of the floor will likely need to maintain access to the service elevator at times, it is recommended that the clean and dirty corridors are maintained and that a renovation optimize the flow of materials and access control and maximize efficient use of space to increase census capacity and flexibility within the existing Vivarium square footage. It is recommended that the renovation of the facility be designed, as a minimum, to the requirements for ABSL-2 as defined in *Biosafety in Microbiological and Biomedical Laboratories* and the *Guide for the Care and Use of Laboratory Animals* to obtain Association for Assessment and Accreditation of Laboratory Animal Care International (AAALAC) accreditation.

There are a total of 9 animal holding rooms, each with hand washing sink and two doors accessed off of internal corridors. Doors currently meet the minimum recommended width of 42 inches. The rooms sizes vary, averaging approximately 130 square feet, and due to the configuration of doors, the capacity for racks is limited. Due to a deficit of storage space, some are currently being used for storage. Utilizing one rack system with double-sided and single-sided racks as a basis for analysis, it is estimated that the existing facility has a maximum capacity of approximately 1,900 cages. It is recommended that the internal corridors be eliminated to increase the square footage for holding rooms and that holding rooms be renovated to combine two rooms north to south with access directly from the north

and south corridors. This would result in four to five holding rooms, depending on options for support space, of approximately 12'-0" x 26'-0" and over 300 square feet. With each holding room maintaining a handwashing sink as required for ABSL-2 and space for a mobile animal transfer station, size to be verified, each could accommodate seven 6'-0" cage racks yielding a total of 588 cages, over double the average existing holding room capacity at 288 cages. Five holding rooms as proposed would provide a 55% increase in total capacity for cages. It is recommended that a 6'-0" double egress door be added to the south corridor at the service elevator to control access into the Vivarium as well as to reduce noise. Refer to diagrams.

It is recommended both for the protection of the animals and personnel within the vivarium to utilize individually ventilated caging systems (IVC racks). IVC systems are designed to minimize the spread of airborne particles, thus reducing the spread of infectious disease within a rodent colony while protecting research personnel and animal care staff from harmful levels of animal allergens, when compared with static microisolation systems. IVC use a direct, continuous exchange of air, which slows the buildup of ammonia within the cages and allows for an extended time interval between cage change outs, as compared with static cages. IVC systems also help to stabilize environmental conditions, at the microenvironment (cag)e level. Direct connection of the exhaust blower to the HVAC exhaust system is recommended to reduce heat load, macroenvironmental (room) contamination, and odor. 110v electrical weatherproof outlets on emergency power should be provided for IVC racks and animal transfer stations.

Ventilation should be provided in accordance with the *Guide for the Care and Use of Laboratory Animals*. HVAC systems should be reliable providing redundancy where required for research. One hundred percent filtered outside air should be supplied at 10 (minimum) to 15 fresh air changes/hour and exhaust air should be discharged to the exterior without being recirculated to other rooms. In general, holding rooms shall be negative to the corridor, whereas areas for surgery or clean storage should be kept under relative positive pressure with clean air. Room temperature for small animal (Mouse and rat): 70°-74ºF +/- 2°F at 30% to 70% relative humidity. Temperature and humidity are best regulated by having thermostatic control for each holding space.

Lighting in holding rooms should be dimmable up to 100 FC for cleaning or serving rooms with manual override switches and timers. Lighting control will allow for astronomical diurnal lighting.

For a census and facility of this size, it is also recommended to consider disposable (single use) caging versus polycarbonate caging. Washrooms are generally sized for a certain census which can change over time. When a washroom is underutilized, the cost per cage change will increase as the fixed cost amortizes over fewer cage changes. If a census increases over what is planned, other spaces will need to be utilized to stage soiled and clean cages. A disposable caging system can be scaled with research needs and PI demand to increase flexibility, reduce fixed infrastructure, and minimize fixed costs. With disposable cages, it is possible to save up to 60% on utilities and reduce water consumption by 90% and reduce husbandry and cage processing labor by as much as 75%. There are other benefits to consider. Disposable cages have significantly less ammonia after 9 days compared to polycarbonate which also require replacement every three to four years. For mice, if keeping the same two animals in a cage in an IVC system, instead of a full cage change on day 14, this system allows for a change of the cage bottom and water bottle while keeping the lid, food tray and cage card until day 28 for a full cage change, which can save 30% of the cage cost. When eliminating cage washing processes, activities commonly associated with repetitive strain injuries are also reduced, since disposable cages weigh less, 1.3 pounds with animal versus 8 pounds with animal. Racks can be decontaminated

utilizing a vaporized hydrogen peroxide (VHP) biodecontamination system. By removing the washroom, space can be freed for other functions to optimize flow of animals and materials as well as connection to a future expansion. If the polycarbonate caging and washroom is maintained, it is recommended that the Autoclave be relocated, and the Clean Cage Wash be expanded for storage and staging of clean cages with direct access to the clean corridor.

Clinical and Translational Science Center

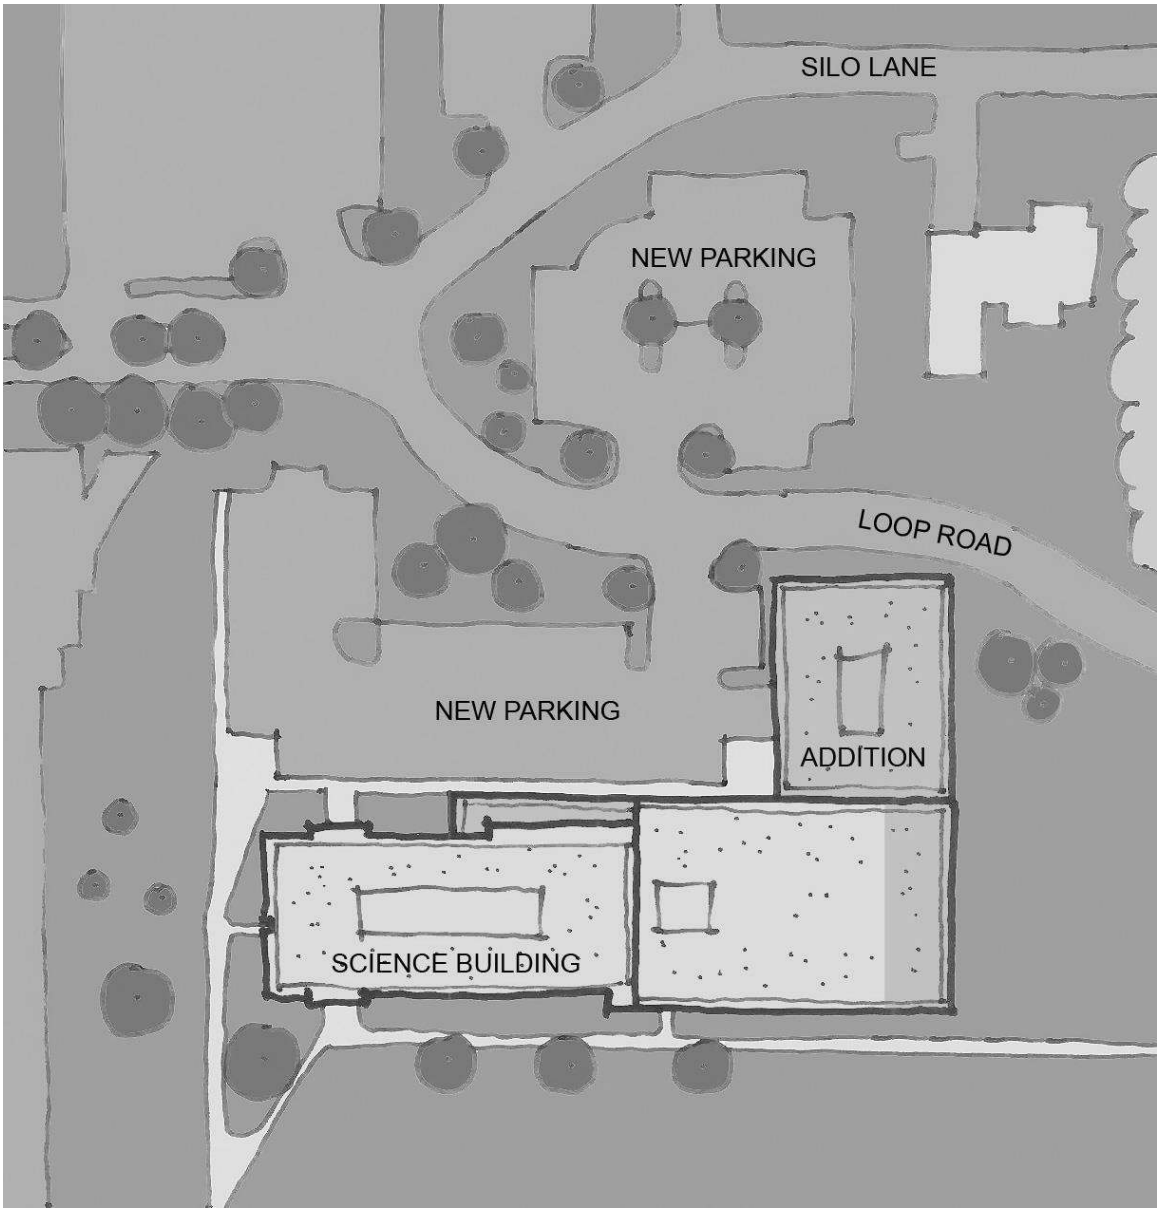
The Clinical and Translational Science Center is located within a three-bedroom house adjacent to the parking lot of the Science Building. Each bedroom serves as a clinical exam room, where clinical research interventions or follow-ups may occur. The living room serves as a patient (research participant) waiting area. Other spaces, such as the dining area are serving as storage areas. An enclosed garage is serving as a research lab for exercise physiology with motion capture and above ground force plate.

It is recommended that these spaces be relocated to an expansion of the Science Building to increase collaboration and utilization between various programs. The expansion could accommodate a more public entry for patients (research participants) on the first floor. The research lab for exercise physiology should also be located on the first floor for vibration isolation and should include slab depressions and trenches as required for the flush installation of force plates. A minimum of 2 x 4 lab modules is recommended to achieve the required minimum length of the gait testing area of 35 feet. A length of 40-45 is desirable.

Summary

A two-story expansion is recommended to accommodate new state of the art research labs as well as the more public needs of the Clinical and Translational Science Center and STEM Outreach Lab. The existing lobby space is recommended to be increased to accommodate pre-function space for students and informal collaboration between students and faculty. Existing research space on the first and second floors can be converted to shared collaboration, conference, break and write-up spaces, (or offices if desired), while maintaining some dedicated lab space for animal research directly adjacent to the Vivarium. Additional storage, receiving/loading space including waste collection and cylinder storage and building support spaces should be located within an expansion. It is recommended that the Vivarium be renovated within its current square footage to provide larger holding rooms for increased cage capacity and increased procedure space and a better flow of materials. A one-story expansion of the original Gross Anatomy Lab is recommended to provide better table layout with increased clearances. The current Shared Equipment Lab within the suite should be relocated into the expansion to provide a space for fresh prep and autopsies.

Fredric W. Smith Science Building
Renovation Option A

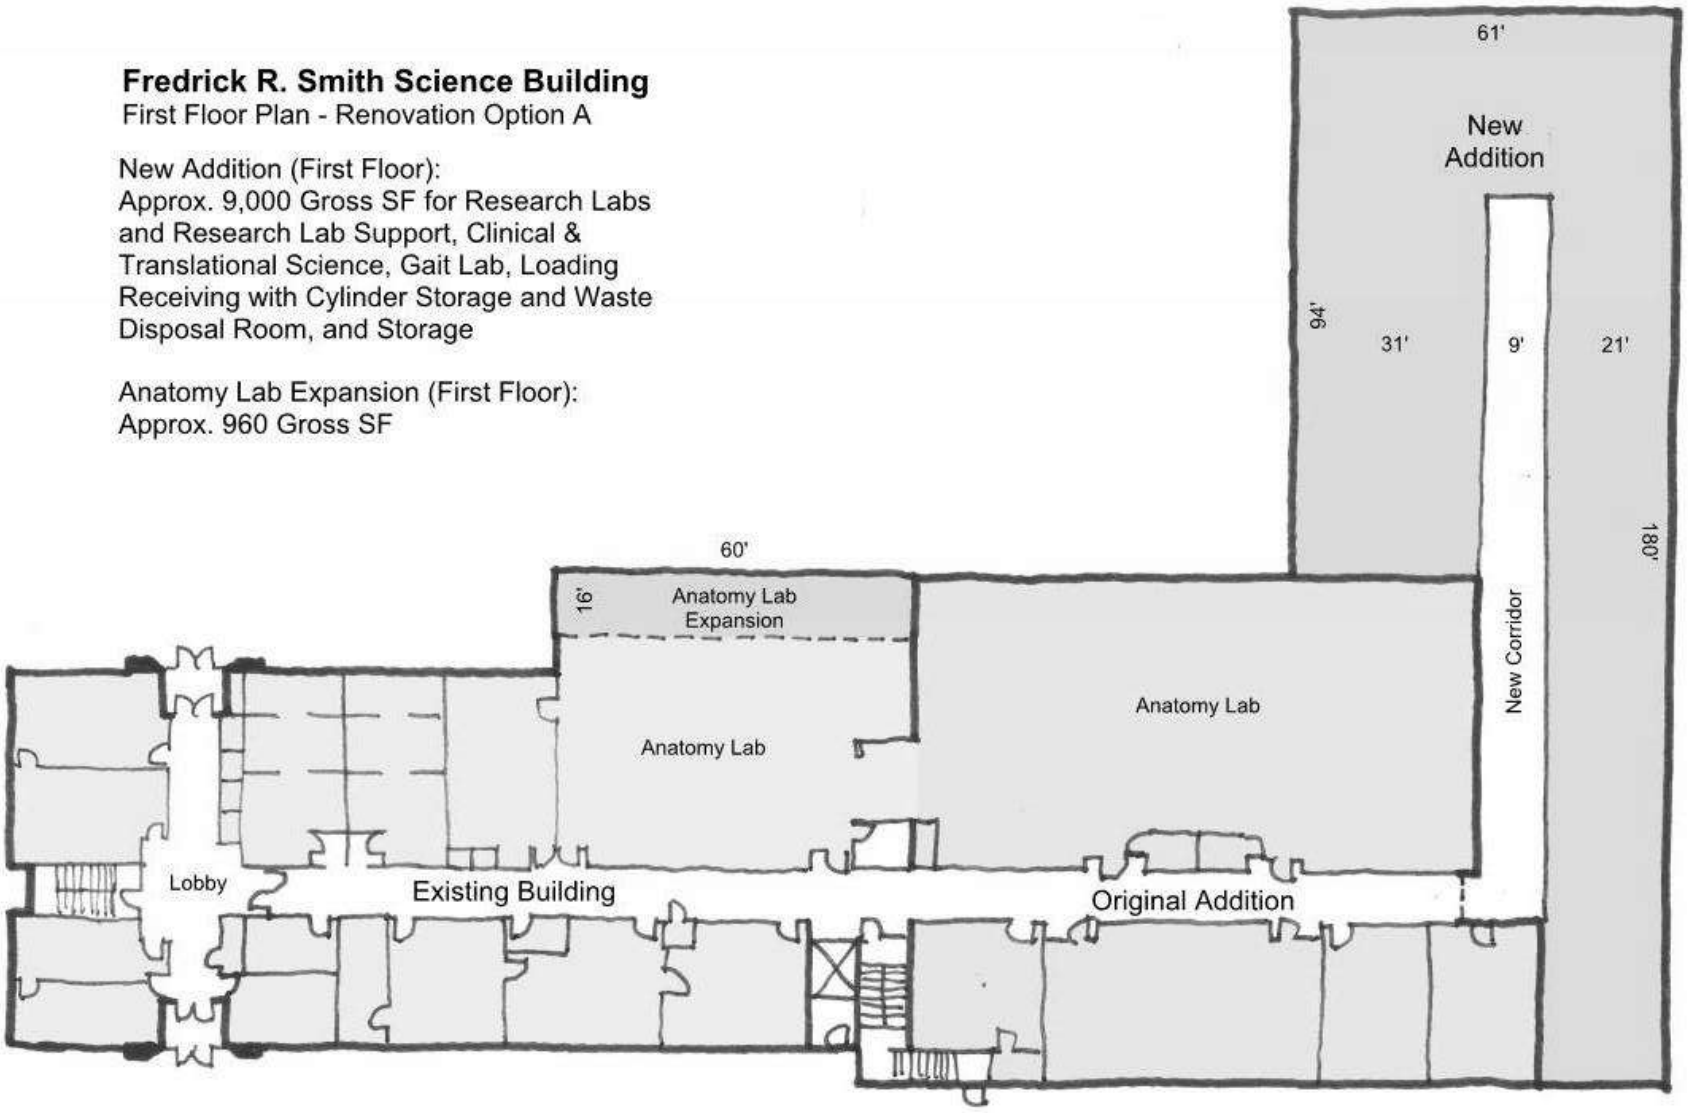


Proposed Site Plan

Fredrick R. Smith Science Building
First Floor Plan - Renovation Option A

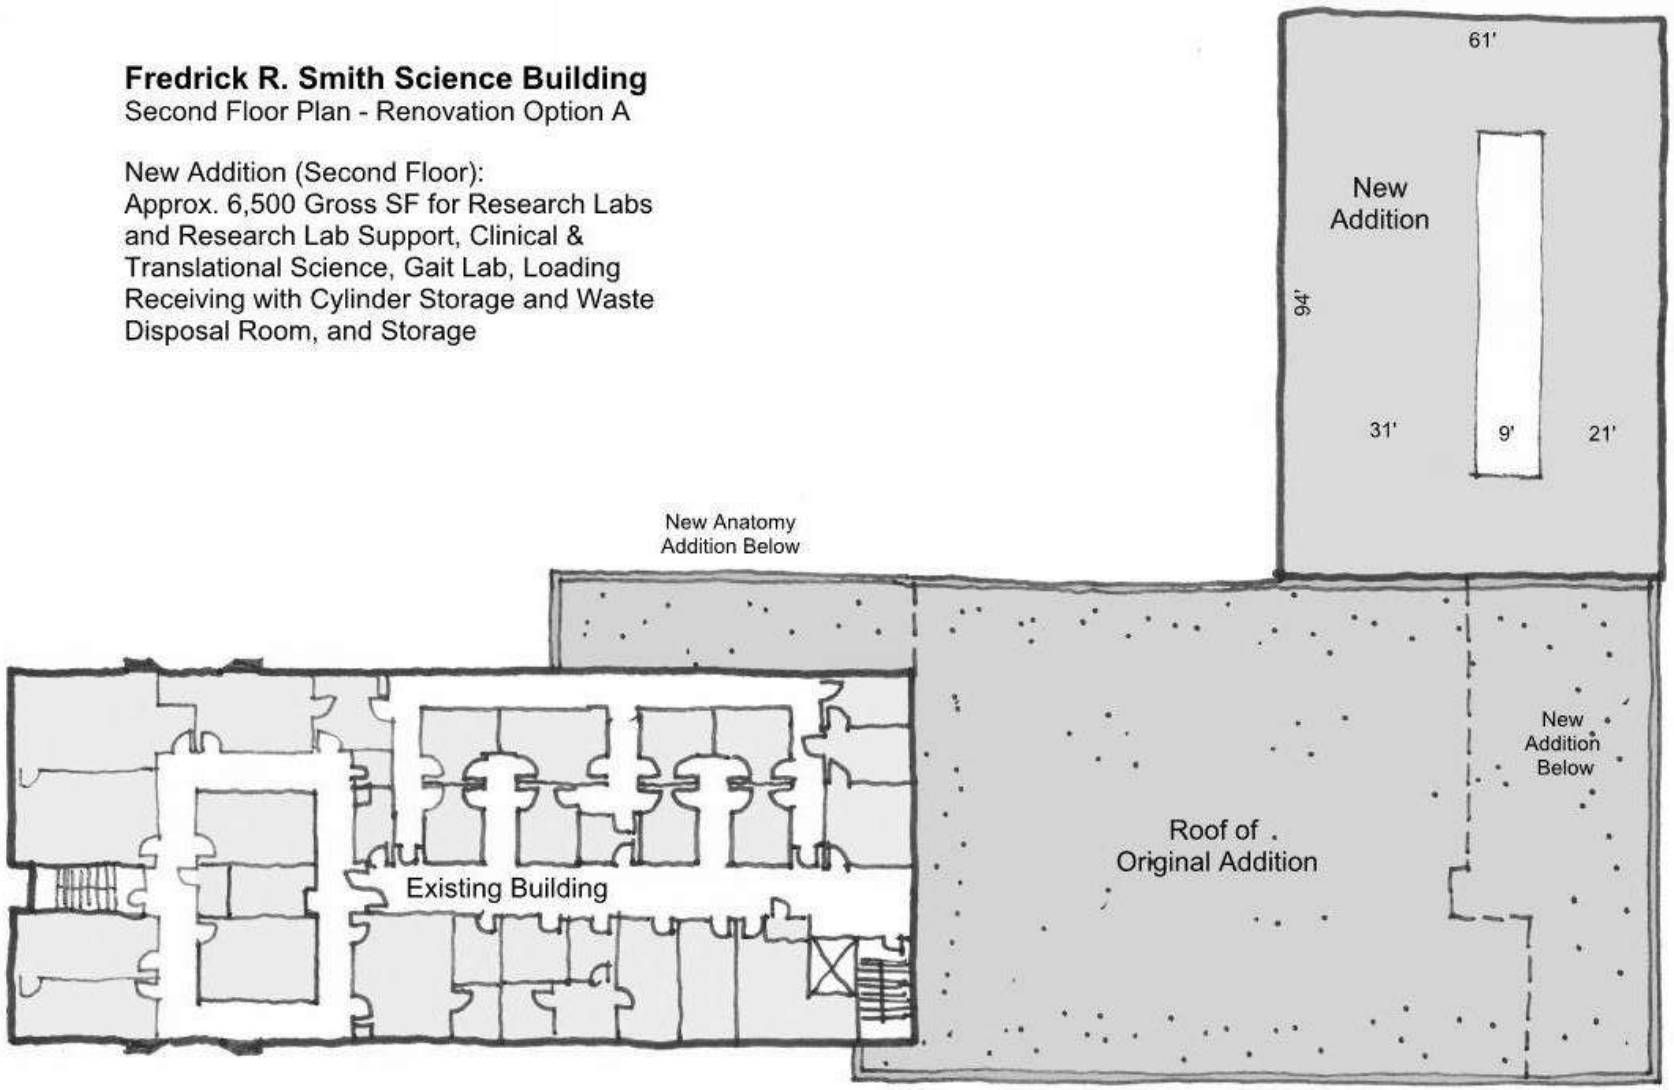
New Addition (First Floor):
Approx. 9,000 Gross SF for Research Labs and Research Lab Support, Clinical & Translational Science, Gait Lab, Loading Receiving with Cylinder Storage and Waste Disposal Room, and Storage

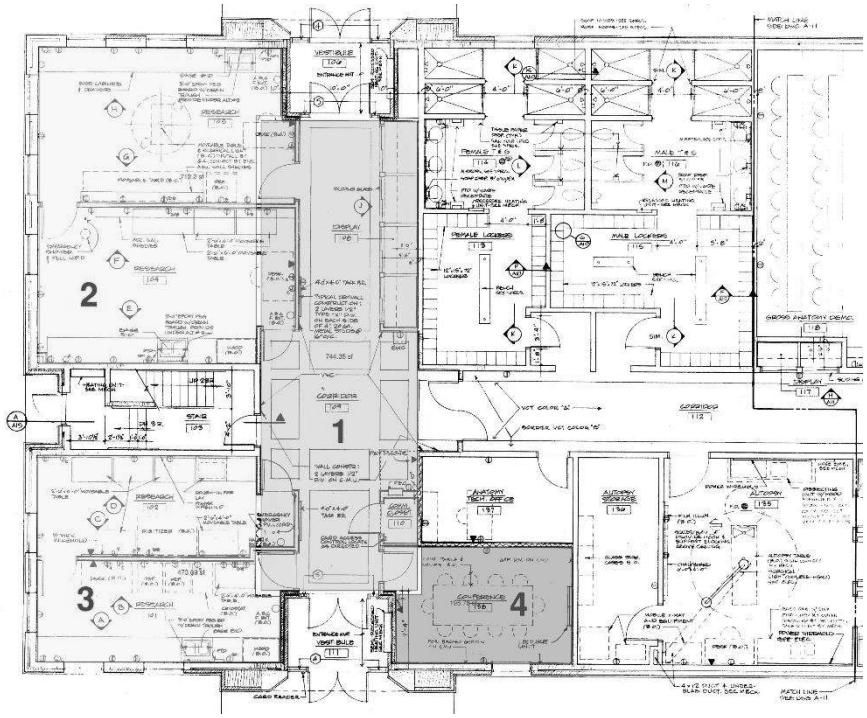
Anatomy Lab Expansion (First Floor):
Approx. 960 Gross SF



Fredrick R. Smith Science Building
Second Floor Plan - Renovation Option A

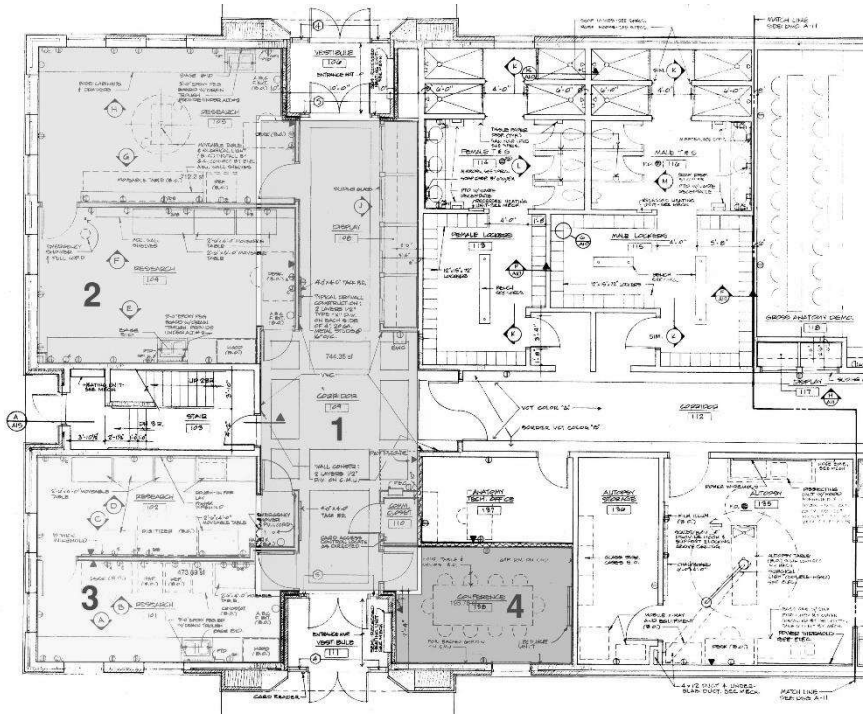
New Addition (Second Floor):
Approx. 6,500 Gross SF for Research Labs and Research Lab Support, Clinical & Translational Science, Gait Lab, Loading Receiving with Cylinder Storage and Waste Disposal Room, and Storage





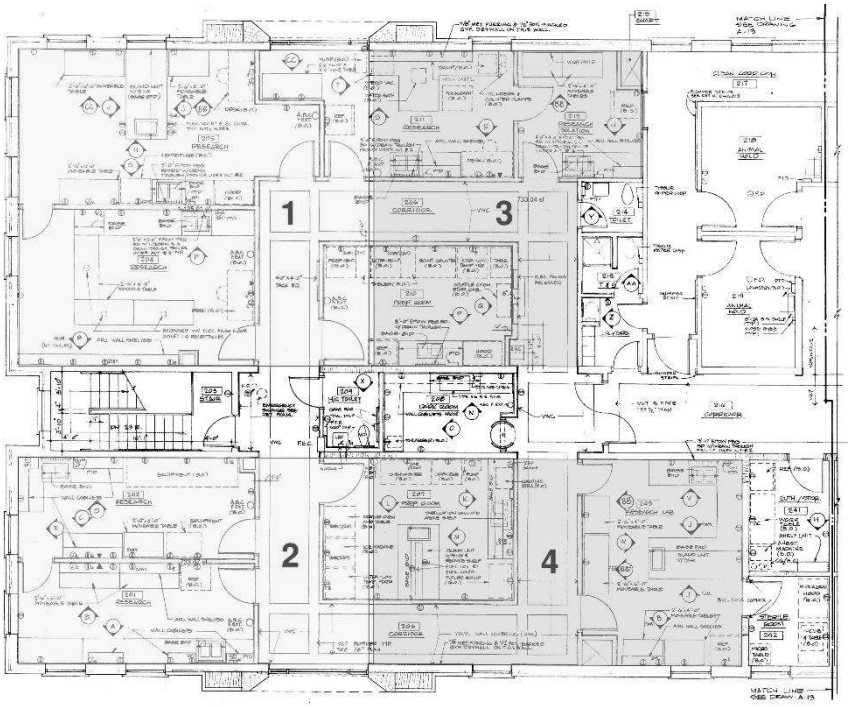
Partial First Floor Plan: Expanded Lobby Renovation – Option A

1. Widen Lobby to create more Public / Prefunction Space
2. Office, Conference, Collaboration, Grad Student Write-Up
3. Possible Conference Room / Seminar
4. Expand Plastination / Autopsy Storage



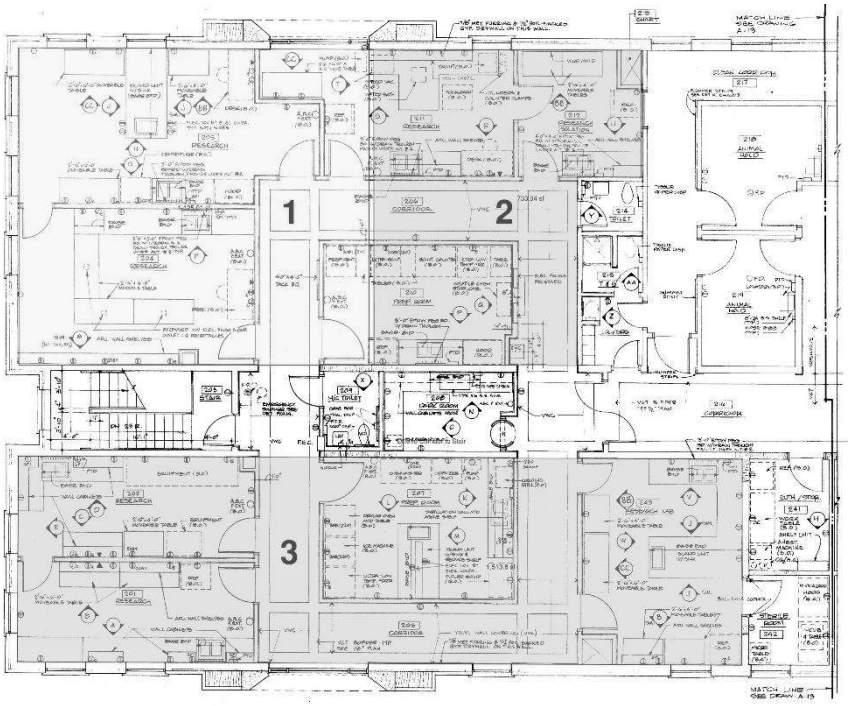
Partial First Floor Plan: Expanded Lobby Renovation – Option B

1. Widen Lobby to create more Public / Prefunction Space
2. Office, Conference, Collaboration, Grad Student Write-Up
3. Possible Conference Room / Seminar
4. Expand Plastination / Autopsy Storage



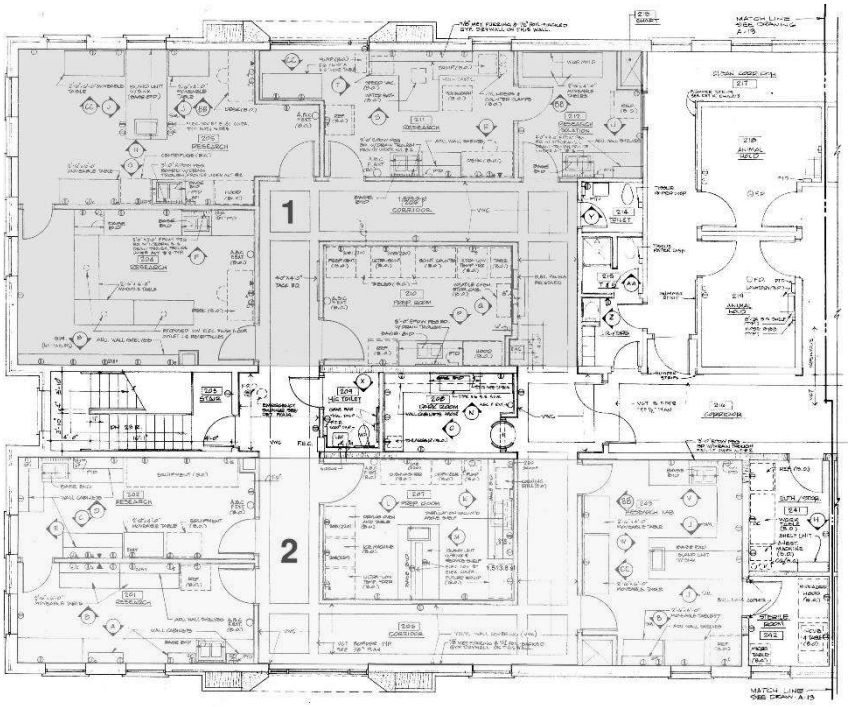
Partial Second Floor Plan: Double-Loaded Corridor – Option A

1. Office, Conference, Collaboration, Break Area, Grad Student Write-Up
2. Office, Conference, Collaboration, Break Area, Grad Student Write-Up
3. Dedicated Lab Space for Animal Research
4. Dedicated Lab Space for Animal Research



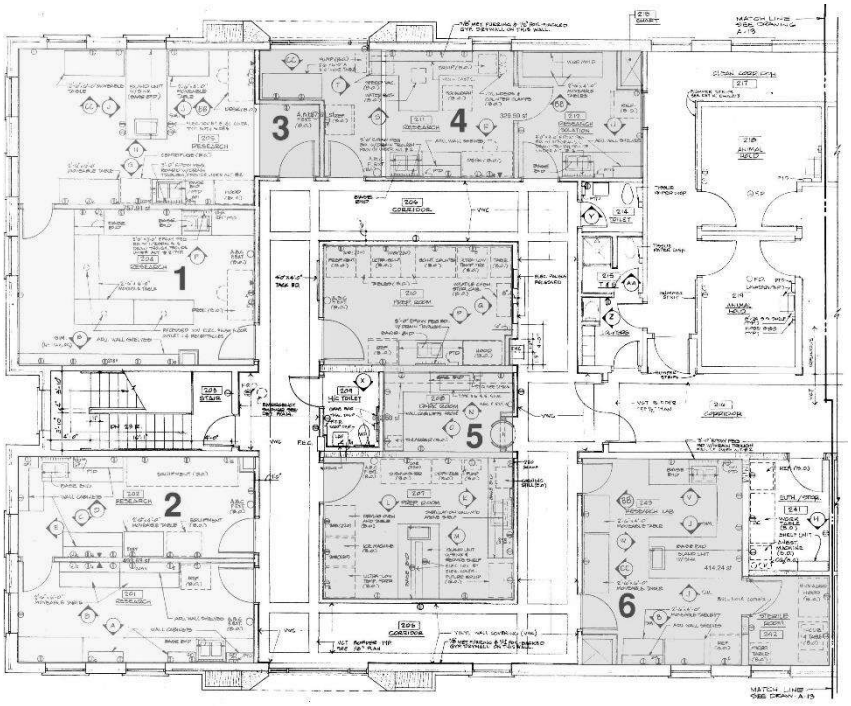
Partial Second Floor Plan: Double-Loaded Corridor – Option B

1. Office, Conference, Collaboration, Break Area, Grad Student Write-Up
2. Dedicated Lab Space for Animal Research
3. Dedicated Lab Space for Animal Research



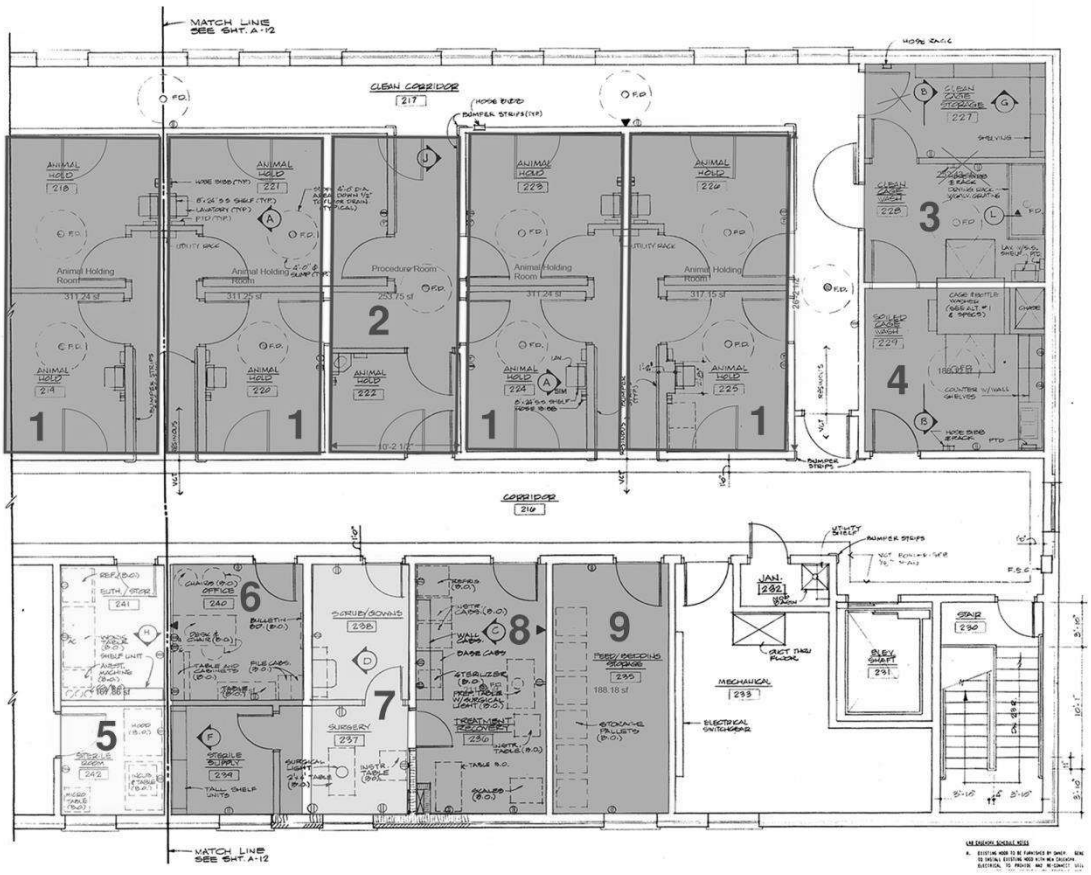
Partial Second Floor Plan: Double-Loaded Corridor – Option C

1. Dedicated Lab Space for Animal Research
2. Office, Conference, Collaboration, Break Area, Grad Student Write-Up



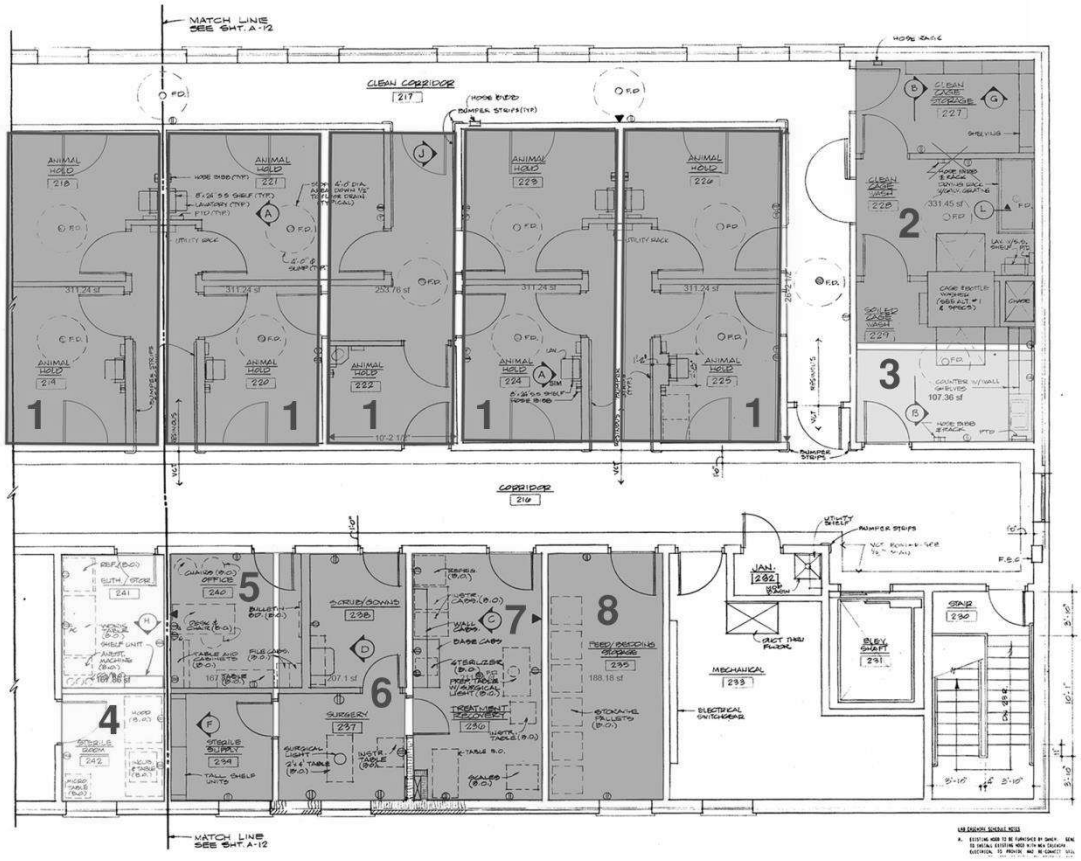
Partial Second Floor Plan: Double-Loaded Corridor – Option D

1. Office, Conference, Collaboration, Break Area, Grad Student Write-Up
2. Office, Conference, Collaboration, Break Area, Grad Student Write-Up
3. Support for Animal Research Labs
4. Dedicated Lab Space for Animal Research
5. Dedicated Lab Space for Animal Research
6. Dedicated Lab Space for Animal Research



Partial Second Floor Plan
Option A – Vivarium Renovation Maintaining Reusable Cages / Cage Wash

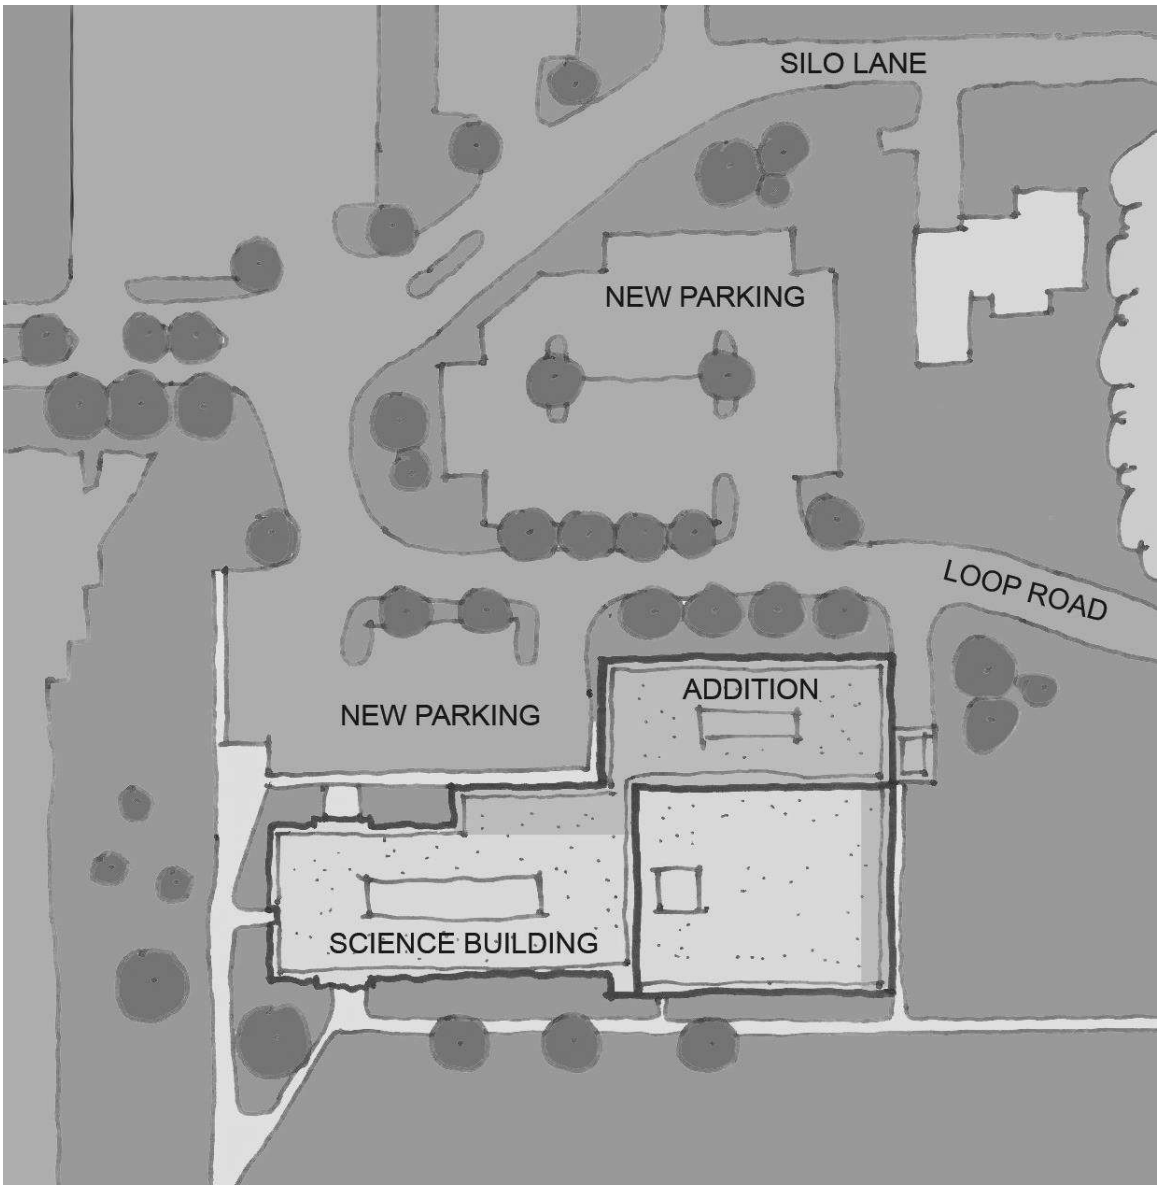
1. Animal Holding
2. Procedure Room
3. Relocate Autoclave and Expand Clean Cage Wash by removing walls and doors to include Clean Cage Storage and Prep
4. Keep Soiled Cage Wash
5. Offices
6. Euthanasia / Storage
7. Autoclave or relocate to Research
8. Incoming / Receiving (Quarantine / Transfer)
9. Keep Feed / Bedding Storage this location



Partial Second Floor Plan
Option B – Vivarium Renovation with Disposable Cages

1. Animal Holding
2. Renovate Autoclave into Surgical Suite: Scrub/Gown, Prep and Recovery (keep all animal spaces North)
3. Autoclave or relocated to Research (if relocated, expand Surgery)
4. Offices
5. Euthanasia / Storage
6. Incoming / Receiving (Quarantine / Transfer)
7. Feed / Bedding Storage
8. Outgoing (Galylords to collect boxes and waste)

Fredric W. Smith Science Building
Renovation Option B

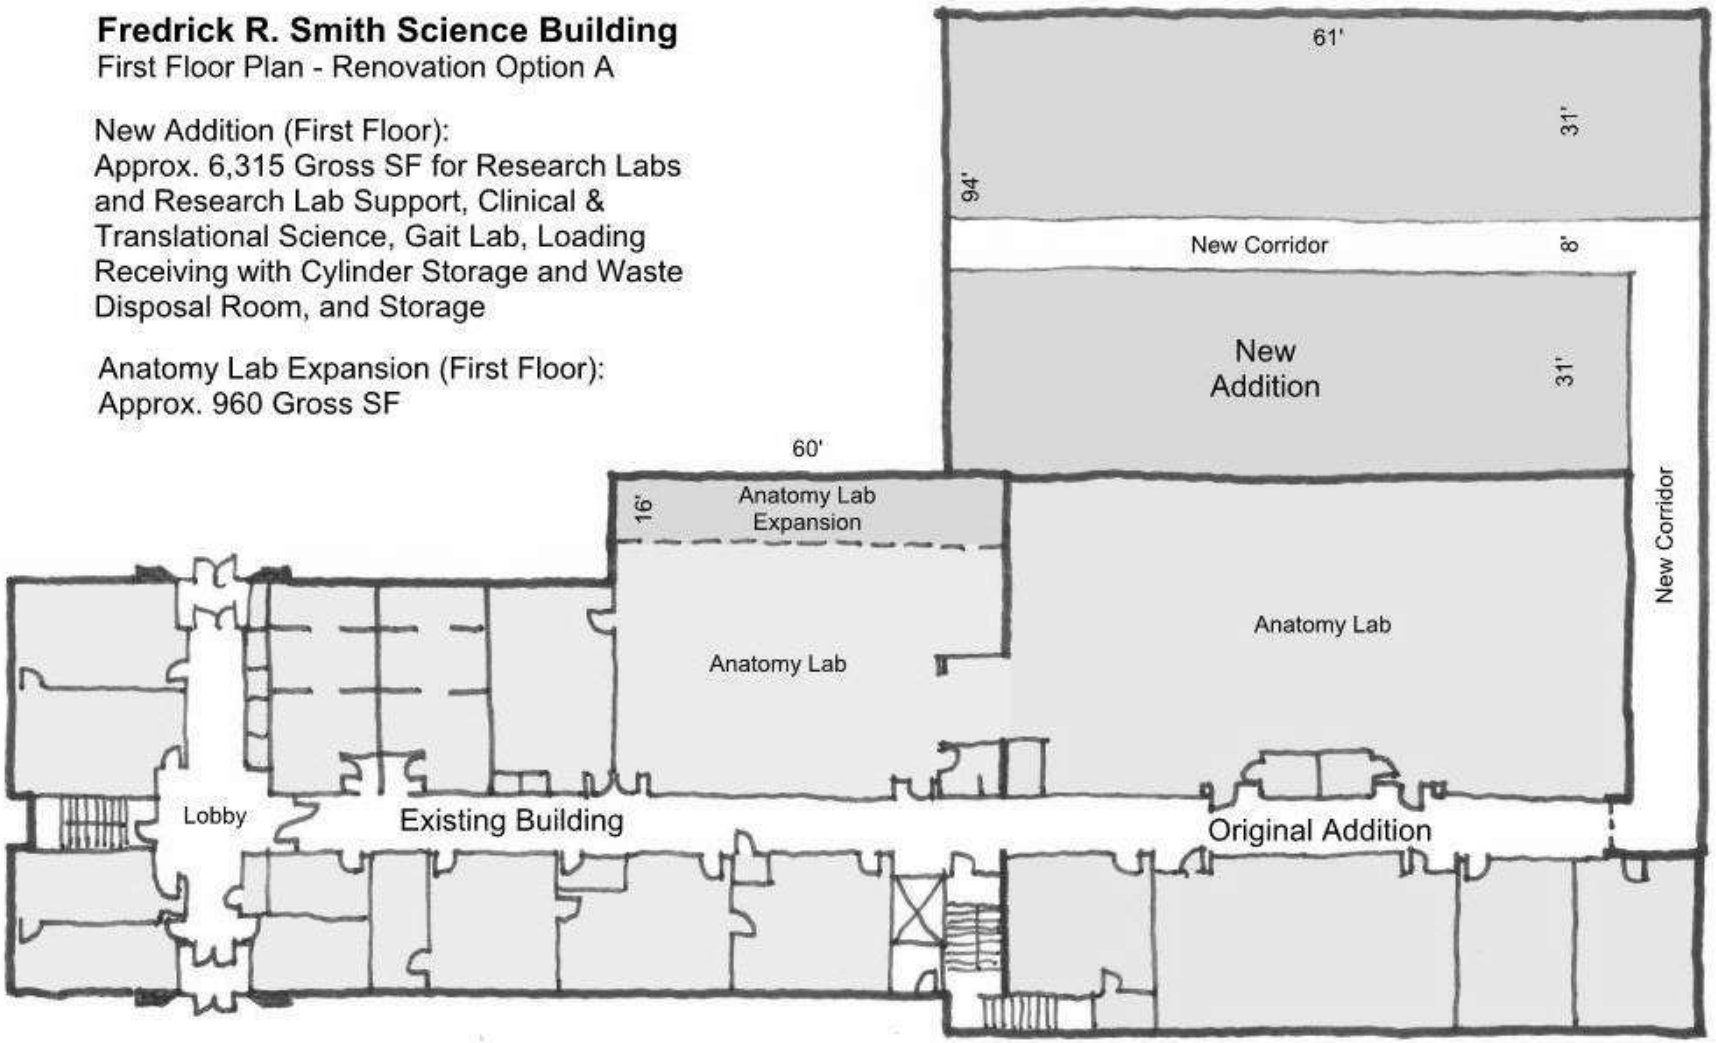


Proposed Site Plan

Fredrick R. Smith Science Building
First Floor Plan - Renovation Option A

New Addition (First Floor):
Approx. 6,315 Gross SF for Research Labs and Research Lab Support, Clinical & Translational Science, Gait Lab, Loading Receiving with Cylinder Storage and Waste Disposal Room, and Storage

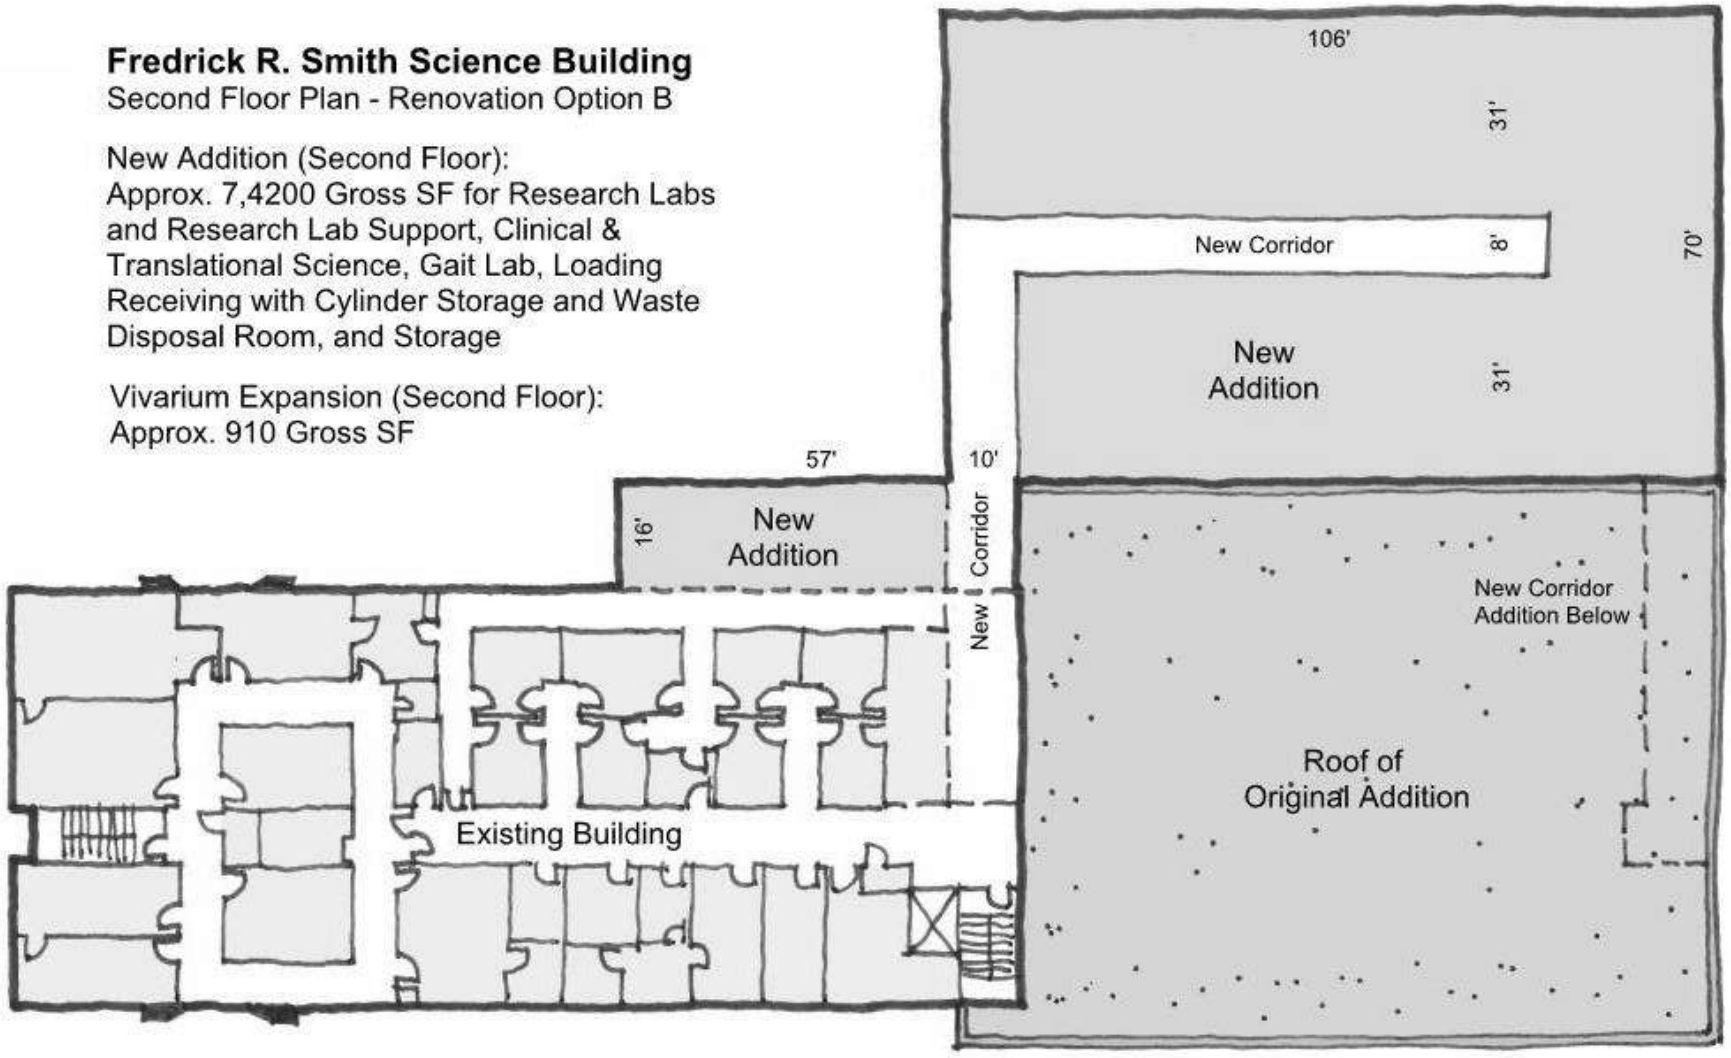
Anatomy Lab Expansion (First Floor):
Approx. 960 Gross SF

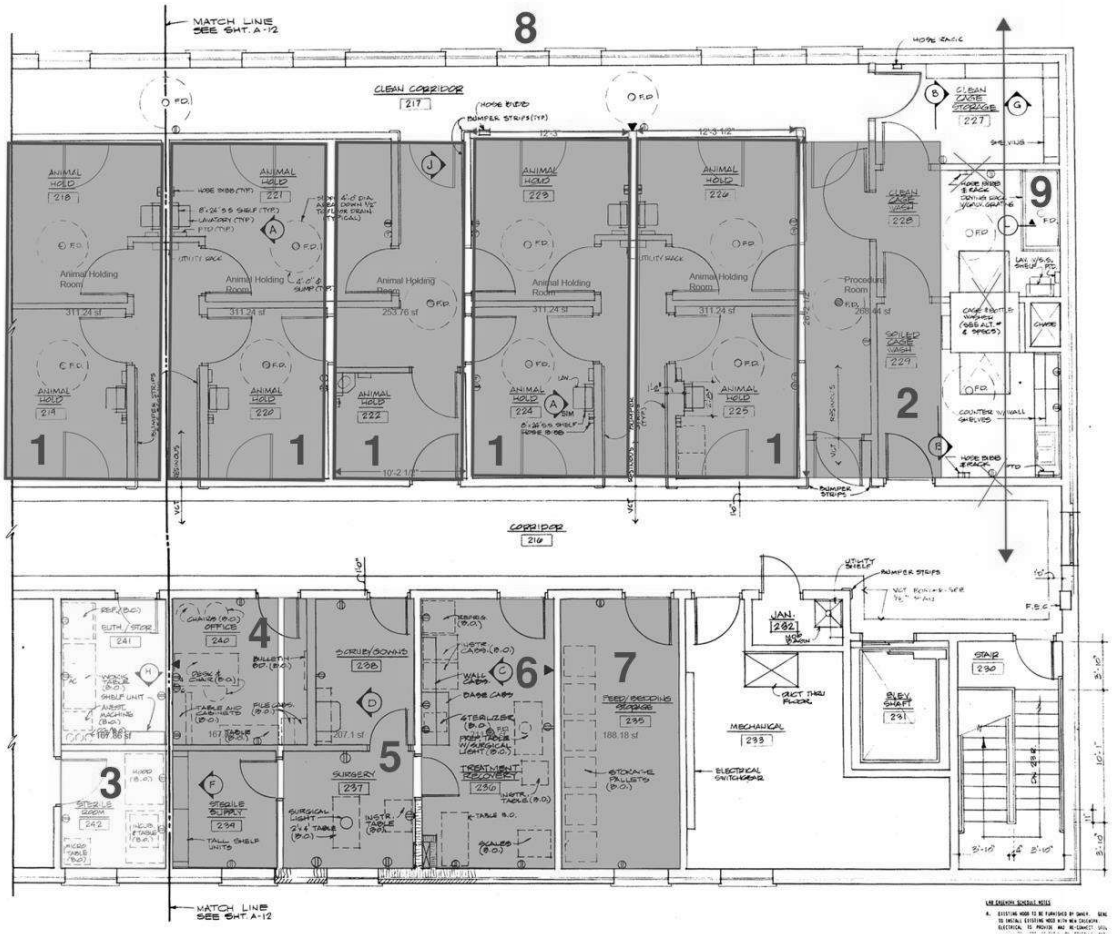


Fredrick R. Smith Science Building
Second Floor Plan - Renovation Option B

New Addition (Second Floor):
Approx. 7,4200 Gross SF for Research Labs and Research Lab Support, Clinical & Translational Science, Gait Lab, Loading Receiving with Cylinder Storage and Waste Disposal Room, and Storage

Vivarium Expansion (Second Floor):
Approx. 910 Gross SF



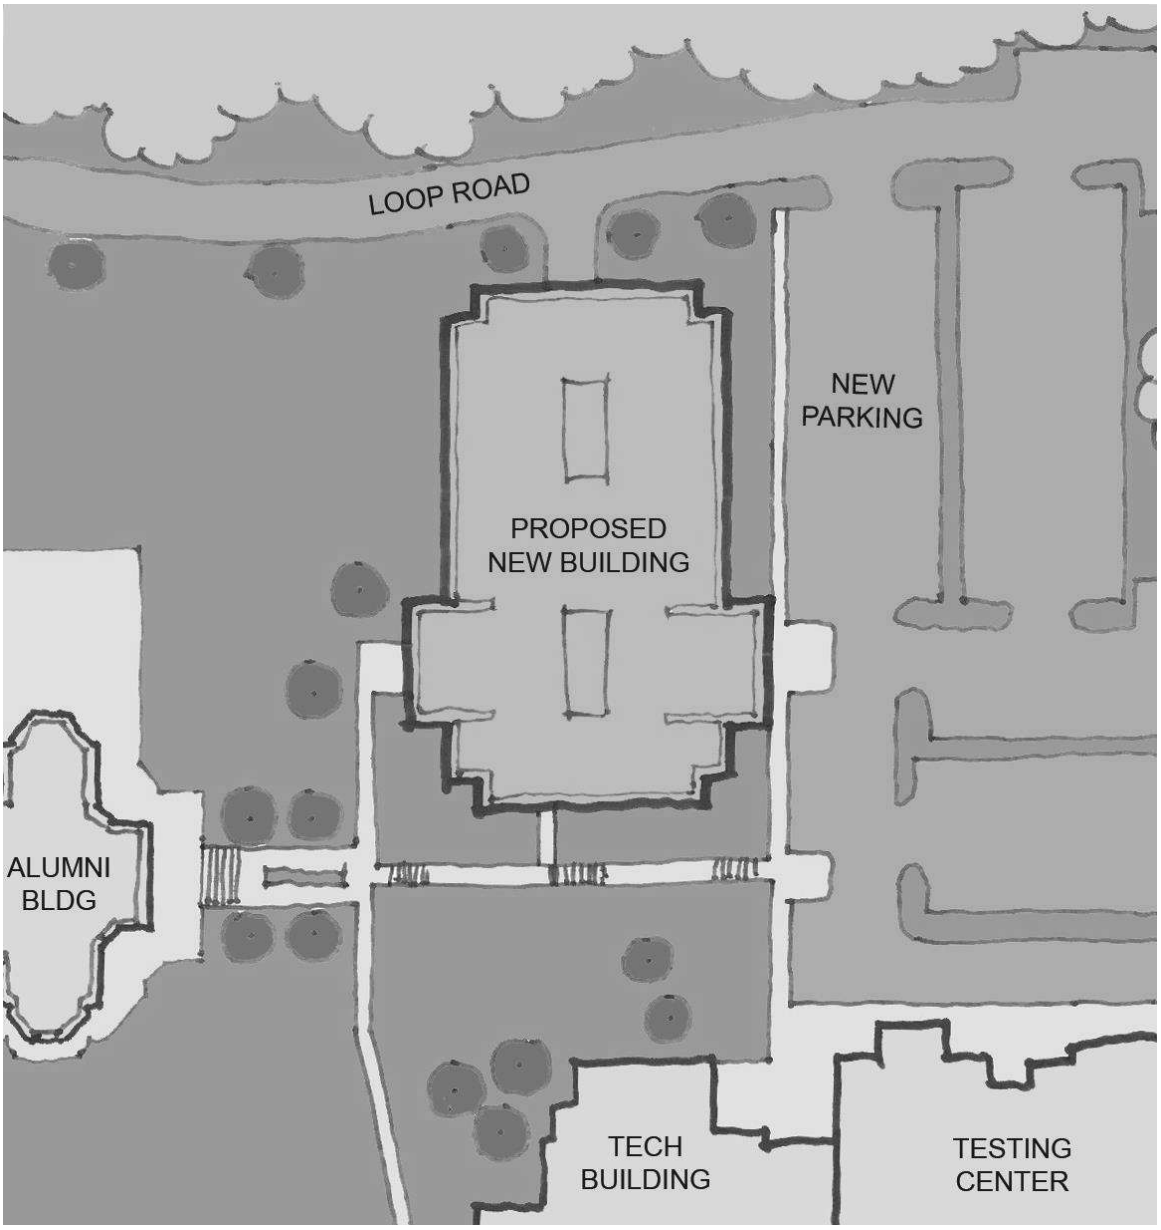


Partial Second Floor Plan
Option C – Vivarium Renovation with Disposable Cages & Connection to Addition

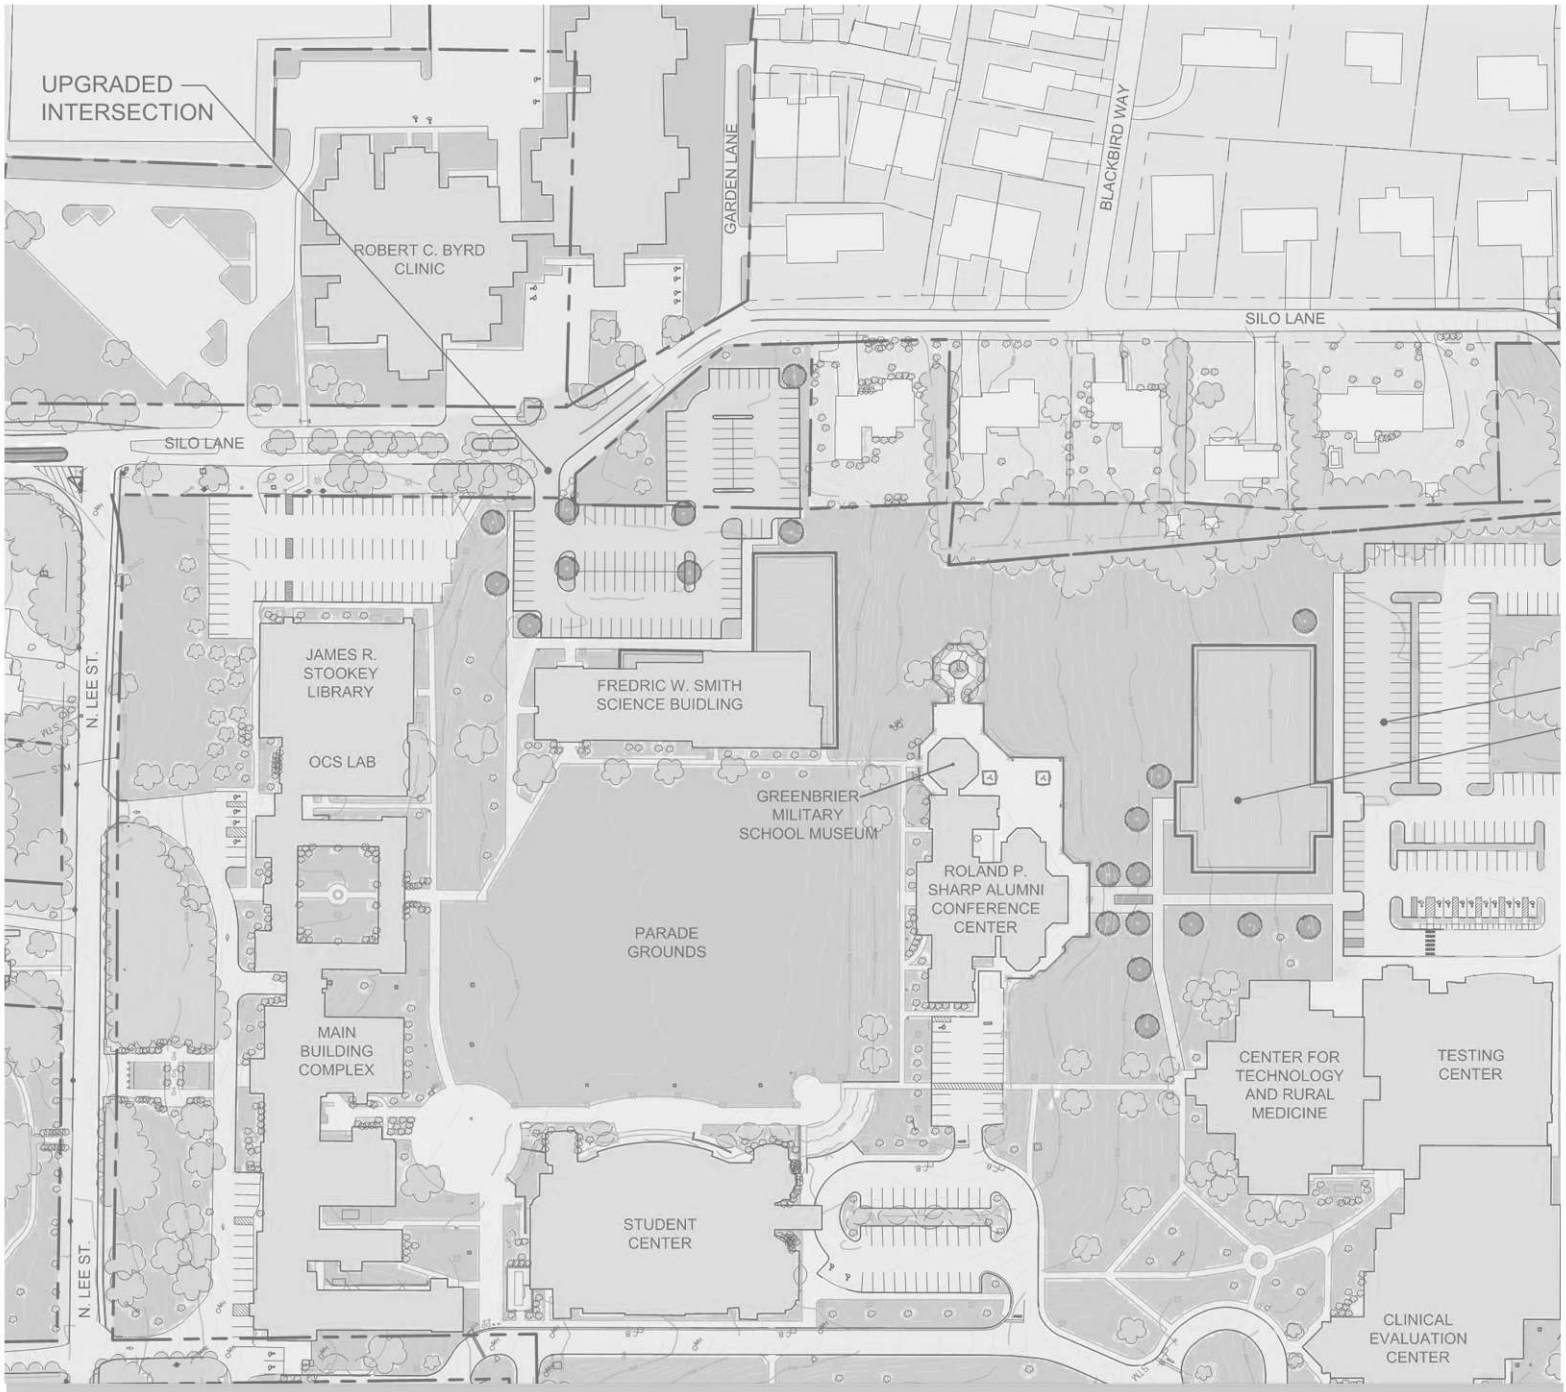
1. Animal Holding
2. Procedure
3. Offices
4. Euthanasia / Storage
5. Incoming / Receiving (Quarantine / Transfer)
6. Feed / Bedding Storage
7. Outgoing (Gaylords to collect boxes and waste)
8. Second Floor Expansion Space
9. Circulation Corridor between Existing Second Floor and New Second Floor Addition

Proposed New Building

Although the West Virginia School of Osteopathic Medicine's main focus over the next ten years is to work on deferred maintenance, renovation and addition projects, the Master Plan does designate one location for a future building on campus. This location is shown for long-range planning purposes only.



Proposed Site Plan



Section 9

LIST OF CAPITAL PROJECTS

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

The West Virginia School of Osteopathic Medicine has identified the following list of capital improvements and new projects necessary to enable continued growth and success of the School. These projects represent the immediate, near term (5 years) and long term (10 years) needs and are listed in order of priority. Please refer to Section 10 for timing, estimates and projected costs associated with all deferred maintenance and capital projects.

James R. Stookey Library / OCS Lab

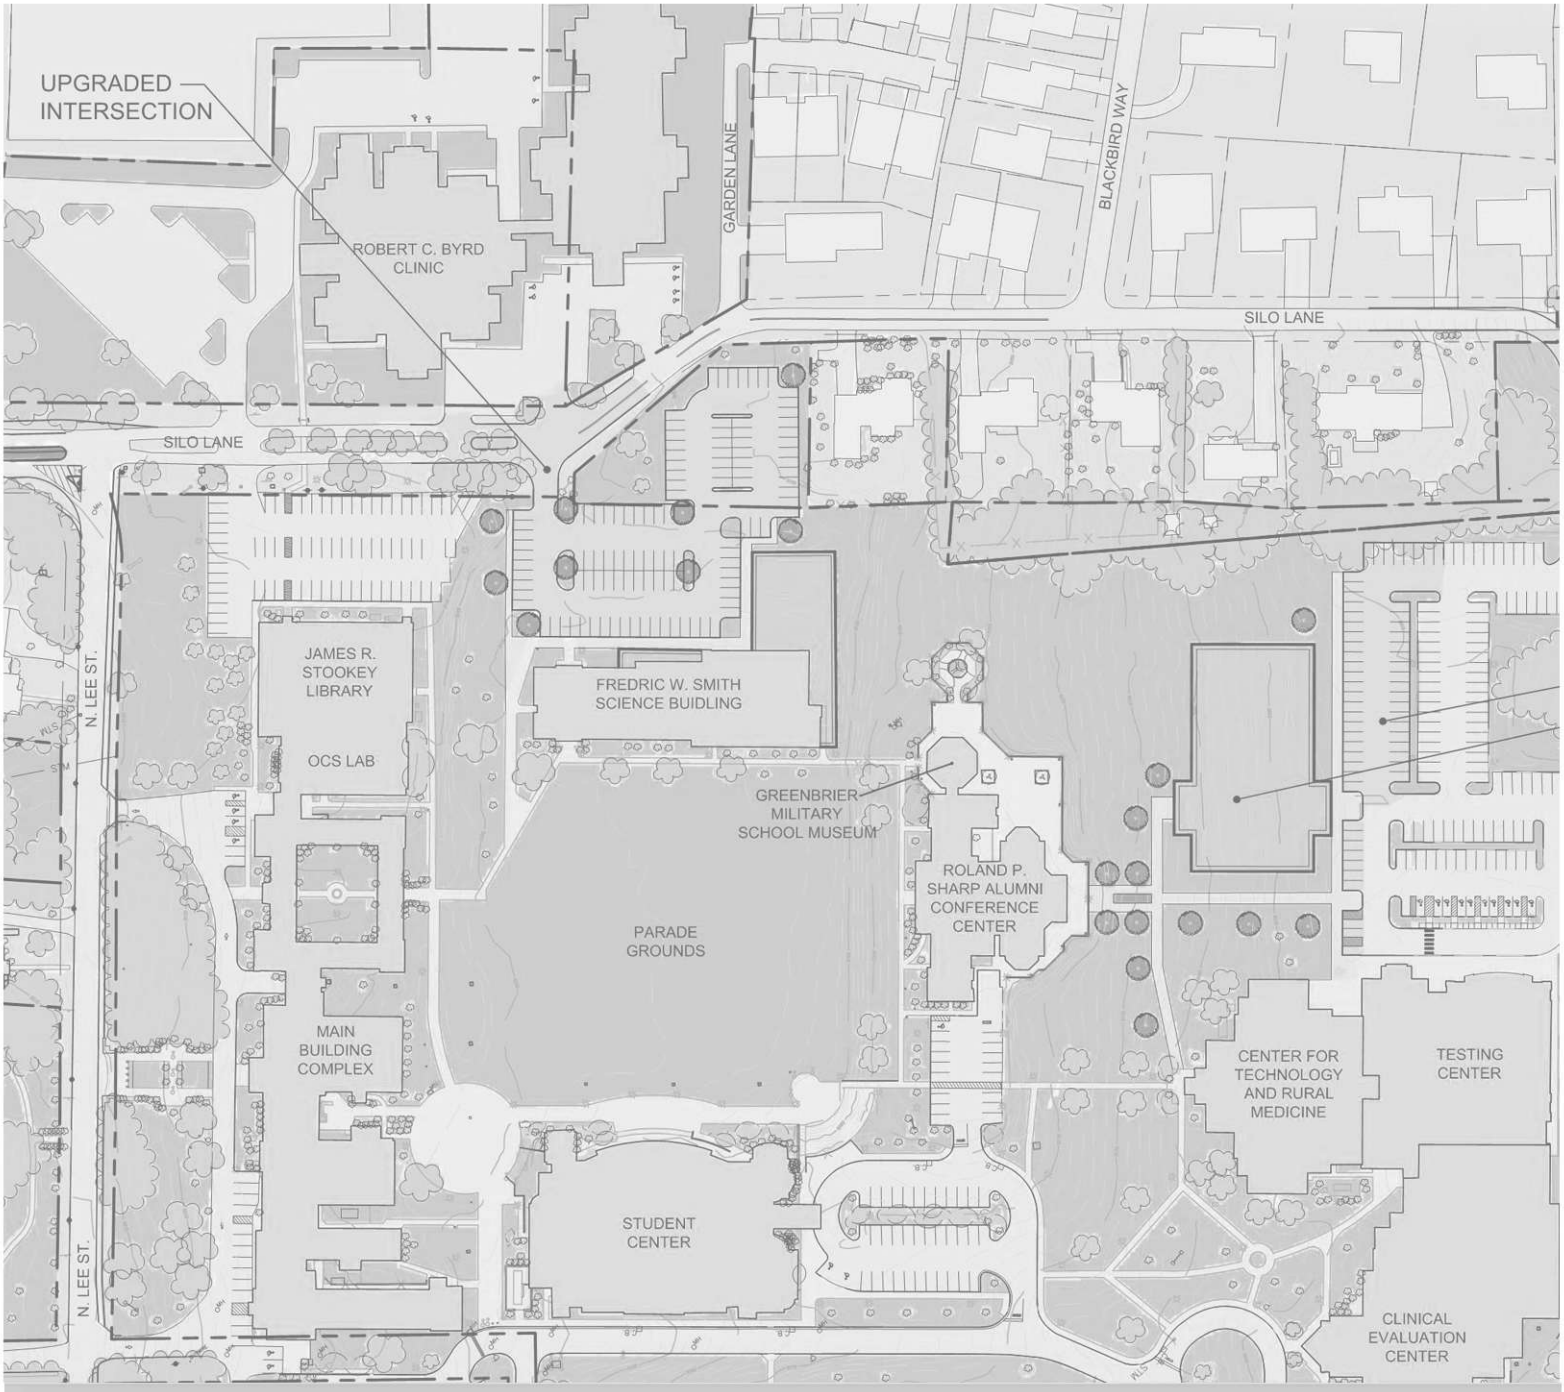
- Remove and replace ballasted EPDM roof on OCS Lab
- Expand Mezzanine to full Second Floor for additional study space
- Provide domestic water backflow preventer
- Update Restrooms
- Various exterior repairs and preventative maintenance
- Install new acoustical ceilings and LED light fixtures in OCS Lab

Fredric W. Smith Science Building

- New addition
- Increase size of roof generator
- Elevator upgrades
- Install ADA controls on main entrance doors from parking and parade grounds
- Various exterior repairs and preventative maintenance
- Various structural repairs
- Various HVAC upgrades, humidification and dehumidification issues
- Interior renovation and new interior finishes
- Upgrade Fire Alarm system to replace the two FACP's with a single control unit.

Campus Site Improvements

- Reconfigure main campus entrance off Route 219
- Construct new loop road on north side of campus and tie into existing traffic pattern



Section 10

TIMING, PHASING, AND PROJECTED COSTS

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

In order for the Master Plan to be appropriately implemented and funded over time, timing estimates with associated costs were identified. These estimates provide a sequence of construction, allowing projects to be built to accommodate the ongoing needs of the West Virginia School of Osteopathic Medicine. The planned projects have been identified starting with immediate needs and include proposed construction through FY2031. The estimated scheduling for projects assumes that funding strategies will begin in FY2021. The estimated scheduling also assumes that the Master Plan will be implemented in multiple steps, and that the steps may be adjusted as needs and enrollment changes. The proposed sequencing reflects current needs (rehabilitation of existing buildings), as well as the findings regarding projected enrollment and programmatic needs. Identified below are the list of deferred maintenance and capital projects in order of priority and their associated order of magnitude costs.

FY 2021 – FY 2024

Admissions Center **$ 130,000**

- Renovate residential home into Recruiting Offices

Main Building A **$ 180,000**

- Repair foundation cracking / water infiltration around building perimeter

Main Building C **$ 410,000**

- New EPDM roof

James R. Stookey Library / OCS Lab **$ 375,000**

- Remove and replace ballasted EPDM roof on OCS Lab

Fredric W. Smith Science Building **$ 630,000**

- Replace existing 45kW roof-mounted gas generator with 250kW gas generator
- Upgrades to existing 4000 lb. passenger elevator

Founders' Activity Center **$ 125,000**

- Repair valleys and gutters on perimeter drainage system
- Repair EIFS damage around building perimeter

Robert C. Byrd Clinic **$ 980,000**

- Remove and replace ballasted EPDM roofing on original building
- Repair, repoint and reseal cast stone coping, banding and trim around building perimeter
- Repair water damage to brick veneer under window/wainscot trim around building

FY 2025 – FY 2031

Admissions Center **$ 275,000**

- Upgrade HVAC system
- ADA Renovations: Parking, accessible route to building and entrance door upgrades
- Interior renovation and new interior finishes
- Various exterior repairs and preventative maintenance

Main Building A **$ 1,200,000**

- Install wet-type fire sprinkler system
- HVAC Ventilation
- Interior renovation and new interior finishes
- Various exterior repairs

Main Building B **$ 1,400,000**

- Main electrical upgrade
- Remove existing fire pump (need written approval from WV State Fire Marshal)
- Install wet-type fire sprinkler system
- Renovate third floor and interior finishes

Main Building C **$ 480,000**

- Main electrical upgrade
- Install wet-type fire sprinkler system
- Provide elevator machine room HVAC
- Interior renovation and new interior finishes

James R. Stookey Library / OCS Lab **$ 2,375,000**

- Expand Mezzanine to full Second Floor
- Provide domestic water backflow preventer
- Update Restrooms
- Various exterior repairs and preventative maintenance
- Install new acoustical ceilings and LED light fixtures in OCS Lab

Fredric W. Smith Science Building **$ 7,000,000**

- New addition and interior renovation
- Install ADA controls on main entrance doors from parking and parade grounds
- Various exterior repairs and preventative maintenance
- Various structural repairs
- Various HVAC upgrades, humidification and dehumidification issues
- Upgrade interior finishes
- Upgrade Fire Alarm system to replace the two FACP's with a single control unit.

Roland P. Sharp Alumni Conference Center and Greenbrier Military School Museum **$ 425,000**

- Interior renovation to Assembly Room, Bar and Kitchen
- New interior finishes
- Various exterior repairs and preventative maintenance
- Repair damage to low brick walls around terrace perimeter
- Upgrade all interior and exterior lighting to LED

Center for Technology and Rural Medicine **$ 530,000**

- Various exterior repairs and preventative maintenance
- Upgrade lower-level mechanical room equipment (split-system AHU, boilers, pumps)
- Update Break Room off Entrance Lobby
- Replace carpet in lecture halls
- Upgrade remaining interior and exterior lighting to LED

Clinical Evaluation Center $ 285,000

- ADA Renovations: Accessible route from parking to building and entrance door upgrades
- Various exterior repairs and preventative maintenance
- Upgrade remaining fluorescent and HID lighting to LED

Maintenance Building $ 280,000

- Construct storage mezzanine in open bay
- Various exterior repairs and preventative maintenance
- Address paint booth exhaust and make-up air
- ADA Renovations: Parking, door upgrades and restroom renovations
- Upgrade all interior and exterior lighting to LED

WV State Police – Lewisburg Detachment $ 115,000

- Install fire-rated wall between living area and garage
- Repair stair to basement on back of building
- Upgrade R-22 HVAC equipment
- Renovate restrooms to comply with ADA
- Relieve moisture issues in basement
- Upgrade all lighting to LED

Founders' Activity Center $ 185,000

- Upgrade HVAC systems
- Various exterior repairs and preventative maintenance
- Repair concrete slab in gym and replace damaged floor
- Renovate to increase number of plumbing fixtures

Robert C. Byrd Clinic $ 630,000

- Various exterior repairs and preventative maintenance
- Upgrade return fan with bearing issues
- Upgrade Entrance Lobby design
- Upgrade the Generator and ATS

Campus Improvements $ 480,000

- Reconfigure main campus entrance off Route 219

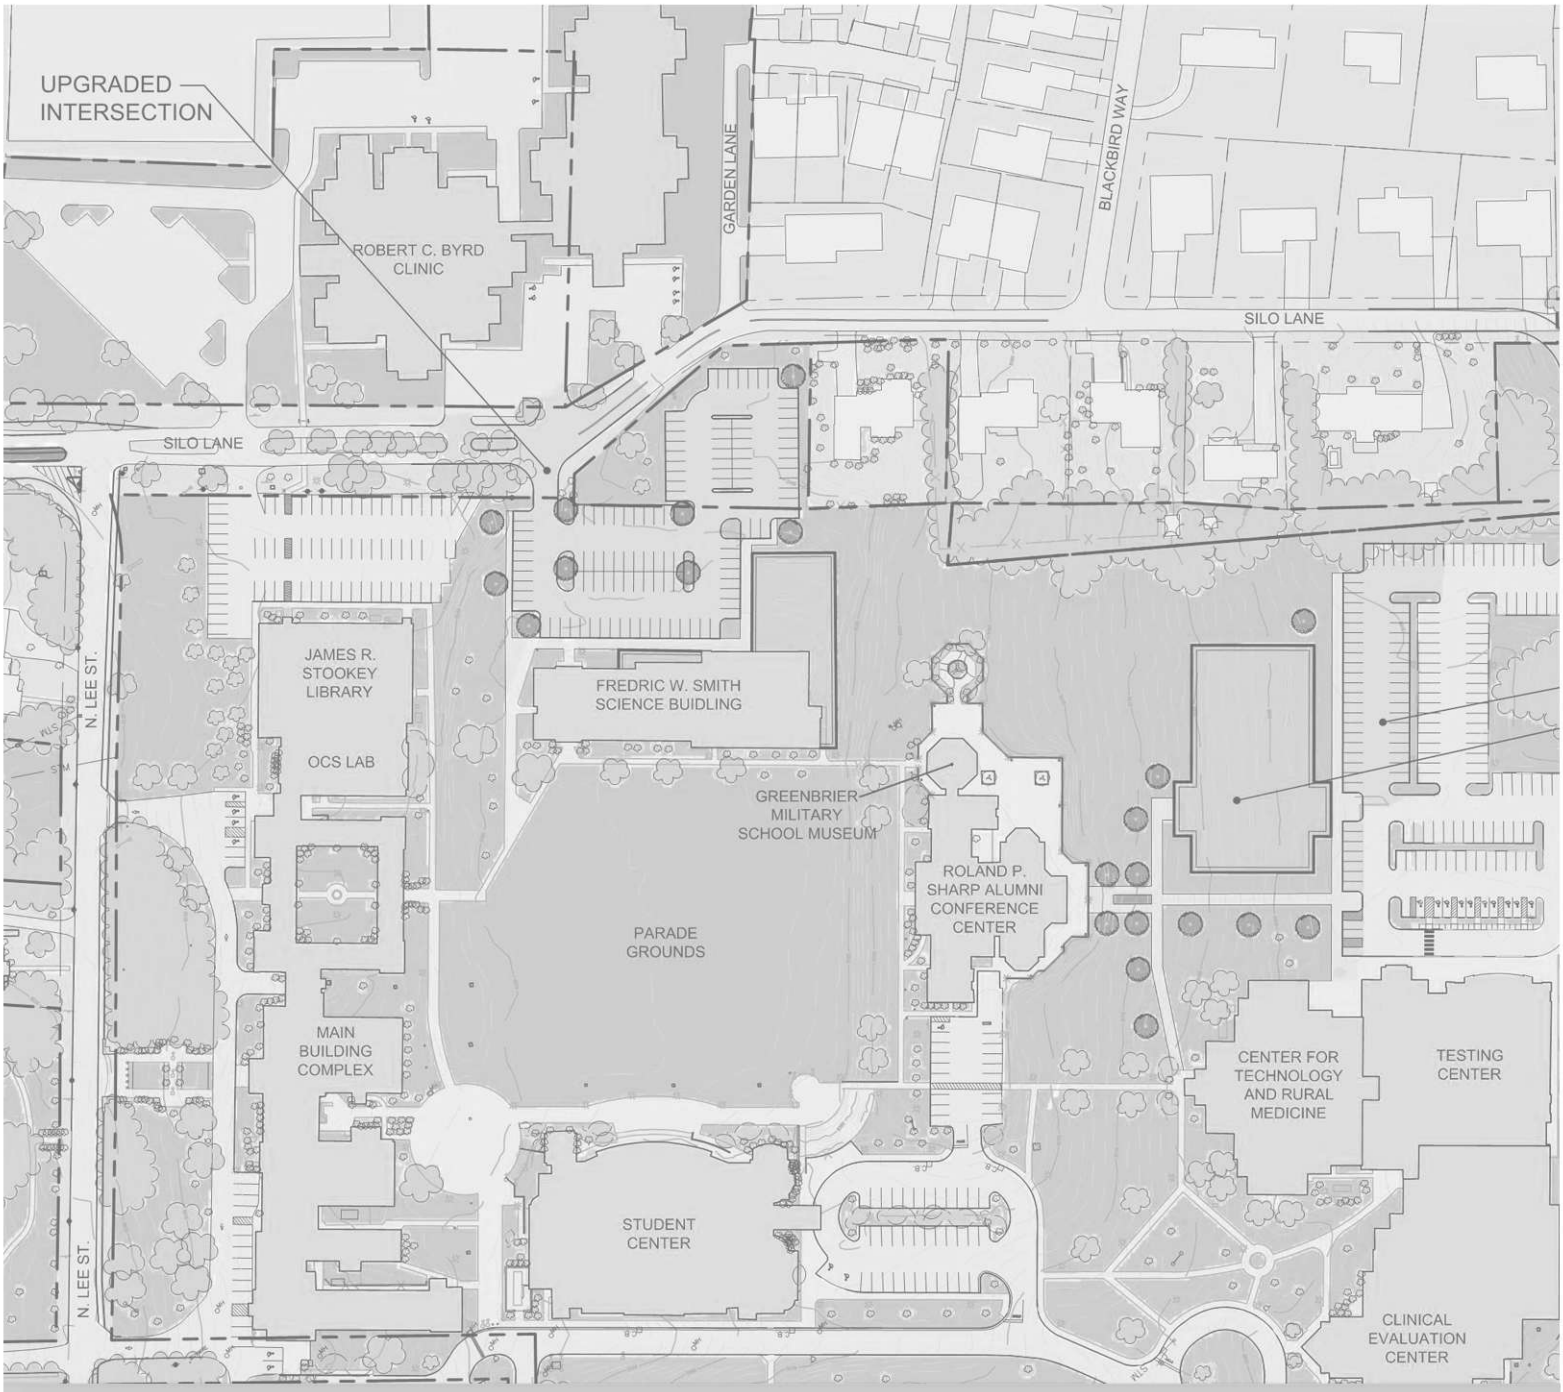
Overview

Each regional campus site provides structured programs for students through small group interactions, lectures, and clinical case conferences. The Statewide Campus program has garnered more than 2500 preceptors who help to provide a stronger infrastructure for clinical and postgraduate training.

WVSOM officials saw a need for a Statewide Campus system to ensure students were receiving the utmost educational experience, a more stable home life and more opportunities to complete their residency programs in the state. Prior to the inception of the program, students were scattered across the U.S. for their clinical rotations. Through regional assistant deans and physicians, students gain a stronger clinical rotation experience from these mentors as well as enhance their learning through personal evaluations.

In addition to the Statewide Campus System, resources are available to students, faculty, alumni and staff through the WVSOM Foundation, WVSOM Alumni Association, the Rural Health Initiative (RHI) Program and the Center for Rural and Community Health (CRCH). The Foundation is a nonprofit organization that accepts charitable gifts made to the school and provides scholarship opportunities for WVSOM students. The Alumni Association provides continuing educational opportunities for physicians and mid-levels, as well as being a resource for alumni of WVSOM. The RHI Program enhances the rural/underserved primary care curriculum at WVSOM to produce graduates qualified to practice medicine in rural/underserved communities. The CRCH is a resource center designed to improve the health and well-being of West Virginians through initiatives in which professionals and community members work together on research, education and outreach.

Each of these programs and resources work together in partnership to provide educational and financial resources to ensure the success of WVSOM medical students. Each of these programs reflect the WVSOM brand in some aspect of their design. Signage provides consistency at all on campus and off campus locations and leased facilities so that there is a uniform appearance for the existing buildings. With the exception of statewide campus, each of these programs is housed within a facility on the campus of WVSOM and easily accessible to students, faculty, staff and community members.



Section 11

CAMPUS INTERACTION

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

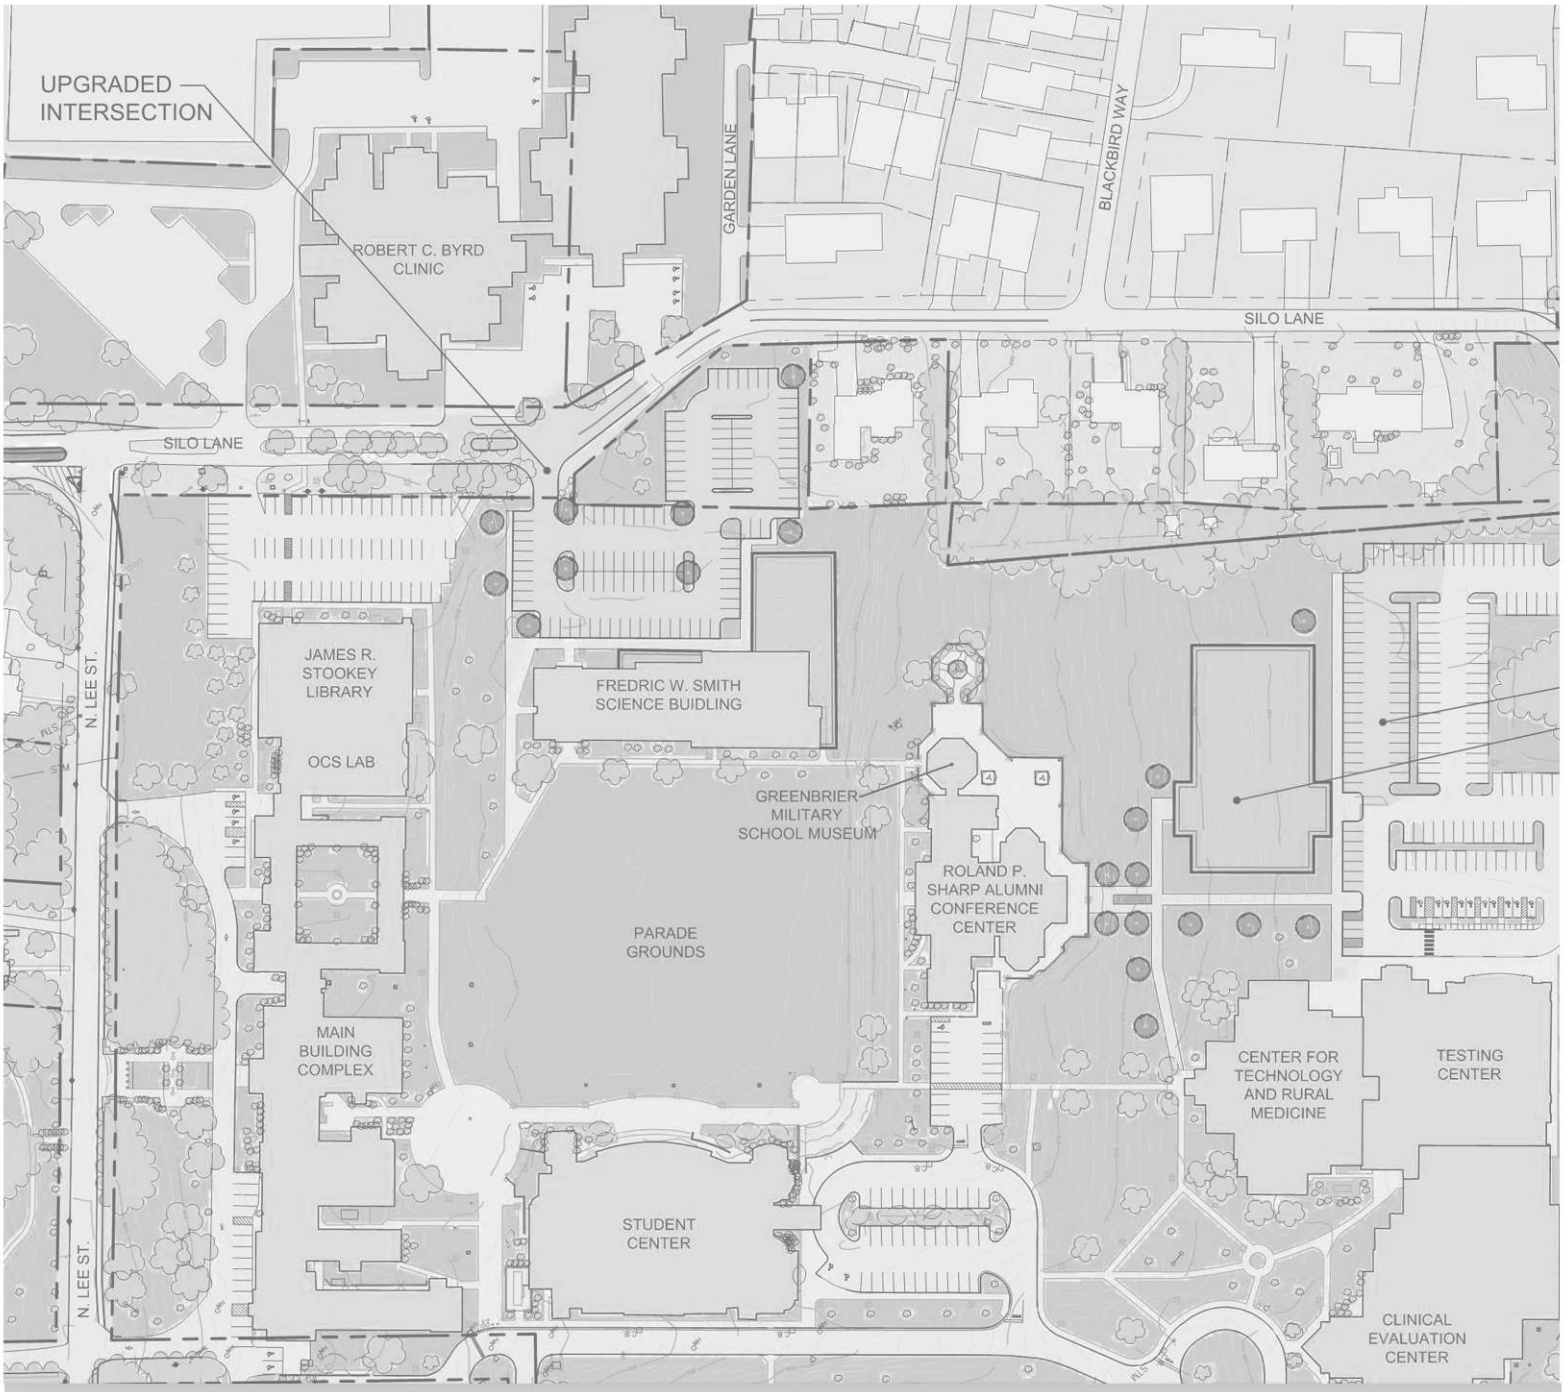
Overview

Each regional campus site provides structured programs for students through small group interactions, lectures, and clinical case conferences. The Statewide Campus program has garnered more than 2500 preceptors who help to provide a stronger infrastructure for clinical and postgraduate training.

WVSOM officials saw a need for a Statewide Campus system to ensure students were receiving the utmost educational experience, a more stable home life and more opportunities to complete their residency programs in the state. Prior to the inception of the program, students were scattered across the U.S. for their clinical rotations. Through regional assistant deans and physicians, students gain a stronger clinical rotation experience from these mentors as well as enhance their learning through personal evaluations.

In addition to the Statewide Campus System, resources are available to students, faculty, alumni and staff through the WVSOM Foundation, WVSOM Alumni Association, the Rural Health Initiative (RHI) Program and the Center for Rural and Community Health (CRCH). The Foundation is a nonprofit organization that accepts charitable gifts made to the school and provides scholarship opportunities for WVSOM students. The Alumni Association provides continuing educational opportunities for physicians and mid-levels, as well as being a resource for alumni of WVSOM. The RHI Program enhances the rural/underserved primary care curriculum at WVSOM to produce graduates qualified to practice medicine in rural/underserved communities. The CRCH is a resource center designed to improve the health and well-being of West Virginians through initiatives in which professionals and community members work together on research, education and outreach.

Each of these programs and resources work together in partnership to provide educational and financial resources to ensure the success of WVSOM medical students. Each of these programs reflect the WVSOM brand in some aspect of their design. Signage provides consistency at all on campus and off campus locations and leased facilities so that there is a uniform appearance for the existing buildings. With the exception of statewide campus, each of these programs is housed within a facility on the campus of WVSOM and easily accessible to students, faculty, staff and community members.



Section 12

IMPACT ON LOCAL COMMUNITY

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

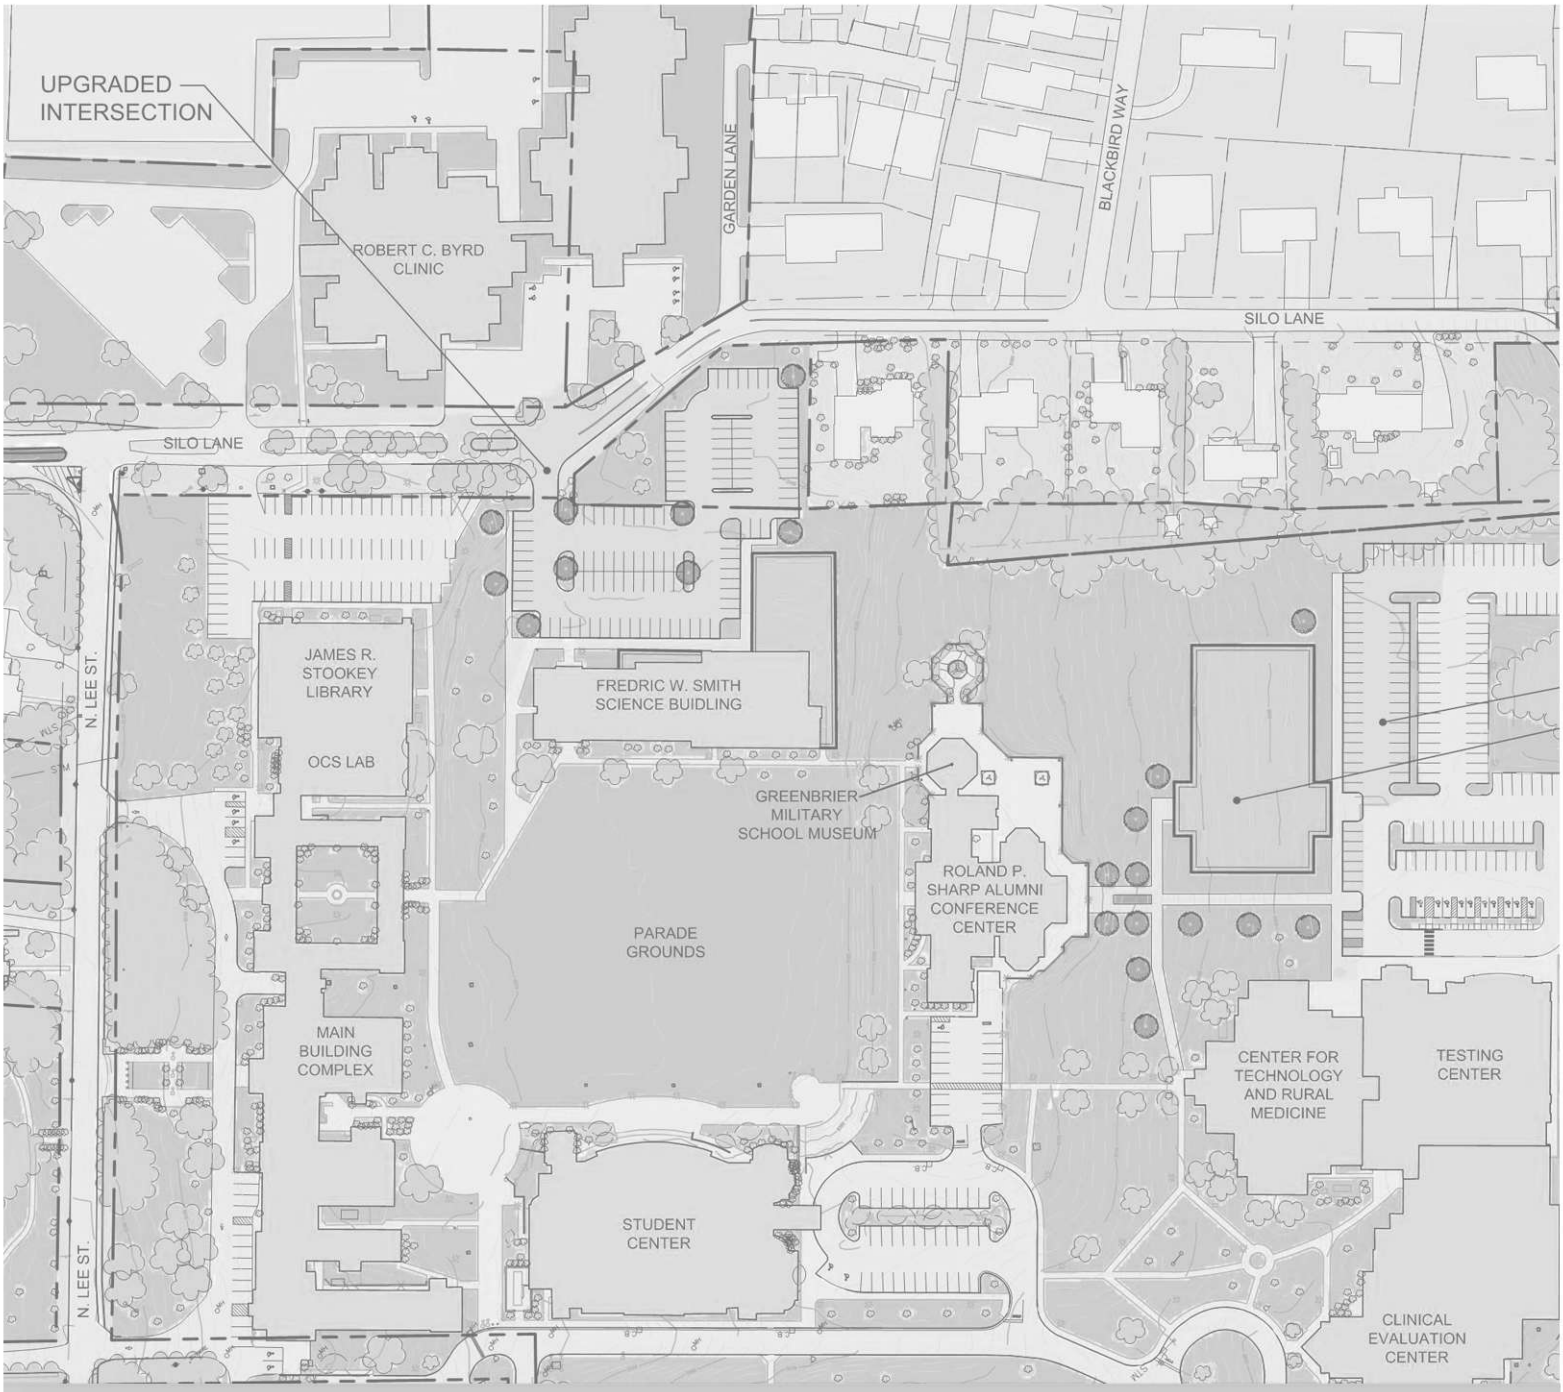
Overview

WVSOM is No. 1 in the nation among all medical schools graduating physicians who practice in rural areas. The impact of our graduates on the health of rural communities locally and statewide is best evidenced by the fact that there are 756 licensed osteopathic physicians practicing medicine in West Virginia and 657 of those physicians are WVSOM alumni. In addition, WVSOM graduates practice medicine in 46 of West Virginia's 55 counties.

As a medical school, WVSOM has uniquely situated itself as a leader in community engagement locally and statewide through its Center for Rural and Community Health (CRCH). The CRCH partners with community members and organizations to implement projects and programs that benefit the health and well-being of communities. The CRCH utilizes WVSOM medical students, who earn touch hours, to work on these community projects and programs. A good example occurred during the initial phase of the COVID-19 pandemic when students worked alongside CRCH staff and community members and partners to produce N-95 masks, feed seniors, provide resources to frontline workers and train children on proper use of masks, hand washing technique and social distancing.

The WVSOM CRCH and WVSOM Foundation have invested in the Clingman Center for Community Engagement to link WVSOM and clinical partners with local communities of the greater Greenbrier Valley to enhance learning opportunities and quality of life for all. The Clingman Center is a hub for cultivating connections and initiatives in engagement, education and research located at Montwell Commons, a central area within the historic district of downtown Lewisburg. Founded on values of inclusion, respect, equality and trust, partnerships are being formed and relationships defined. These collaborations are establishing sustainable infrastructure and programming in response to priority needs identified within the community.

Recently completed physical space to house the CRCH with easy access for the community to engage within the WVSOM campus main building, promises to be a space where community members and organizations can join with the CRCH staff to build community infrastructure. There will be a series of "think tank" sessions at the large community table that is the hub of activity within the Center where community members will be asked to provide input and assist us to create solutions to the very real public health issues of the Greenbrier Valley and statewide.



Section 13

SUSTAINABLE CAMPUS PLANNING

ZMM ARCHITECTS ENGINEERS

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE

Overview

Situated in the beautiful rolling hills of Greenbrier County on an historic campus, the WV School of Osteopathic Medicine's mission of delivering high quality medical care in rural areas of West Virginia fits perfectly with the idea of sustainability. Sustainable design can encompass many different aspects of architecture and engineering, land development and restoration, operations and maintenance, and even overall health and wellbeing. Outlined below are several approaches WVSOM could take in the development of a sustainability plan.

Campus Land Use and Transportation

According to the U.S. Green Building Council (USGBC), "the transport sector is responsible for a quarter of energy-related greenhouse gas (GHG) emissions worldwide." Since no on-site student housing exists and faculty and staff also commute, considering the impact of driving to and from the campus every day during the school year could be included in a benchmarking plan to begin reducing GHG emissions. The USGBC's LEED (Leadership in Energy and Environmental Design) for Existing Communities would be a detailed framework to use for this purpose.

Aspects of a transportation and land use plan include, but are not limited to:

1. Access to public transportation
2. Development of transportation policy that could include working with the city of Lewisburg on bike lanes, multi-purpose pedestrian walking paths, etc.
3. Priority parking for low emission vehicles and electric cars, bicycle commuting facilities, evaluation of fleet vehicles, etc.

Along with transportation, WVSOM could also consider sustainable ways to take care of the land currently owned by the school. Ideas include:

1. Restoring habitat by planting native species and reducing pervious surfaces
2. Using best practices in rainwater management and considering vegetative roofs where feasible
3. Reducing heat island effect by reducing asphalt use or covering paved areas with shade trees or solar arrays
4. Continue to provide open space for human enjoyment
5. Reduce light pollution to protect the night sky and nocturnal wildlife
6. Commit to any new buildings meeting the newest version of the LEED Green Building Rating System, Living Building Challenge, or having net-zero impact on the site

Water and Energy

Approaching water and energy use begins with reducing demand. Benchmarking existing energy and water use will show WVSOM where the greatest savings can be found. The following chart is a preliminary benchmarking analysis of the Energy utilization Index (EUI) for each facility on the WVSOM campus. Facilities with a higher EUI will be the focus of energy related improvements to ensure the most efficient use of funding dedicated to energy efficiency.

Based upon this benchmarking review, the following facilities are the highest priorities for implementing energy efficiency improvements:

1. Center for Technology and Rural Medicine
2. Robert C. Byrd Clinic
3. Student Center

	Building	SF	EUI (kBtu/SF)	ECI (Cost/SF)	Electricity (MMBtu)	Electricity ($)	Natural Gas (MMBtu)	Natural gas ($)	Total Cost	Notes
01	Admissions Center	3,960	72.51	1.59	155.44	$ 4,933	131.70	$ 1,359	$ 6,292	
02	Main Building	40,485	204.07	3.71	548.48	$ 17,515	2,961.67	$ 21,909	$ 39,423	
03	Stookey Library - OCS Lab	23,960	71.59	1.26	959.39	$ 24,288	755.97	$ 5,898	$ 30,187	
04	Fredric W Smith Science Building	28,480	360.68	5.47	3,918.47	$ 109,284	6,353.70	$ 46,546	$ 155,830	
05-06	Alumni Conference Center	16,700	34.19	1.62	570.99	$ 27,022	0.00	$ -	$ 27,022	No Gas Feed
07	*Center for Technology and Rural Medicine*	*21,410*	*~~274.45~~*	*~~3.43~~*	*2,056.81*	*$ 45,213*	*3,819.27*	*$ 28,172*	*$ 73,385*	** share the same gas service*
08	*Clinical Evaluation Center*	*37,855*	*~~54.25~~*	*~~1.33~~*	*2,053.53*	*$ 50,242*	*0.00*	*$ -*	*$ 50,242*	** share the same gas service*
07 & 08	Combined Buildings (due to shared gas service)	59,265	133.80	2.09	4110.34416	95454.33	3819.271	28171.98	$ 123,626	
09	Maintenance Building	13,490	56.98	0.93	261.57	$ 8,487	507.09	$ 4,076	$ 12,563	
11	Founders Activity Center	21,410	54.40	0.89	492.78	$ 13,802	671.98	$ 5,291	$ 19,092	
13	Robert C Byrd Clinic	54,820	168.47	2.55	1,685.41	$ 46,954	1,537.32	$ 48,664	$ 95,618	
14	Student Center	67,000	125.80	1.91	3,273.75	$ 88,556	5,154.93	$ 39,564	$ 128,120	
15	Clinical and Translational Science Center	1,638	53.72	0.84	18.52	$ 642	69.48	$ 730	$ 1,371	

After this step, applying energy conservation measures garners the “biggest bang for the buck.” Energy conservation methods could include:

1. Insulating walls and roofs and closing leaks
2. Installing new windows and doors
3. Installing instant hot or tankless water heaters
4. Purchasing Energy Star appliances, powering off equipment, etc.
5. Replacing outdated HVAC and plumbing systems with more energy efficient systems and fixtures
6. Upgrading light fixtures to LEDs, installing daylight sensors and occupancy sensors
7. Incorporate passive solar methods as much as possible

Once energy demand reduction and energy efficiency measures are put in place, then it is time to consider renewables in order to reduce costs and environmental impact of buildings.

1. Install solar arrays as cover for large parking areas or on rooftops
2. Install solar hot water systems
3. Test the viability of geothermal for new construction
4. Install smaller scale wind turbines where feasible

Materials

The impact of materials on the natural environment, the built environment, and local economy is huge. Our take - make - waste society is overrunning the planet with landfills and unsustainable economic model. The solution is complicated, but involves several steps:

1. Reduce the need for newly manufactured materials shipped to a project site in the first place by reusing existing buildings and products
2. Source local materials as much as possible and thereby strengthening the local economy
3. Source materials that contain recycled content and limited or zero harmful products such as heavy metals, volatile organic compounds, etc.

Indoor Environmental Quality

With WVSOM's focus on student wellness and health, the concept of indoor environmental quality could be the most impactful to student performance and wellbeing and in alignment with its mission. The WELL Building Standard could be the building rating system of choice used to implement the many design decisions relating to human health.

According to the International Well Building Institute (IWBI), "the WELL Building Standard is a performance-based system for measuring, certifying, and monitoring features of the built environment that impact human health and well-being though air, water, nourishment, light, fitness, and mind. WELL is the first standard of its kind to focus solely on human health and wellness in regards to the built environment." The standard is comprised of seven concepts:

1. Air. The largest category deals with indoor air quality via strategies that remove airborne contaminants, prevent air pollution, and purification.
2. Water. Improve building occupants' access to clean water and promote more drinking water for health.
3. Nourishment. Encourage healthier eating habits and provide healthier food and drink options in cafeterias and cafes.
4. Light. Minimize disruptions to circadian rhythms, increase productivity, and improve mood and physical energy
5. Fitness. Encourage daily physical activity in everyday life
6. Comfort. Improve acoustics, ergonomics, and thermal comfort
7. Mind. Support mental and emotional health thought support services and relaxation spaces

Please find resources for the USGBC LEED rating system and the Well Building Standard attached.

Map Unit Description

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions in this report, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named, soils that are similar to the named components, and some minor components that differ in use and management from the major soils.

Most of the soils similar to the major components have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Some minor components, however, have properties and behavior characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. All the soils of a series have major horizons that are similar in composition, thickness, and arrangement. Soils of a given series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Additional information about the map units described in this report is available in other soil reports, which give properties of the soils and the limitations, capabilities, and potentials for many uses. Also, the narratives that accompany the soil reports define some of the properties included in the map unit descriptions.

Greenbrier County, West Virginia

FrB—Frederick silt loam, karst, 3 to 8 percent slopes

Map Unit Setting

National map unit symbol: lkg4
Elevation: 1,620 to 2,560 feet
Mean annual precipitation: 31 to 46 inches
Mean annual air temperature: 48 to 55 degrees F
Frost-free period: 117 to 158 days

Farmland classification: All areas are prime farmland

Map Unit Composition

Frederick and similar soils: 80 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Frederick

Setting

Landform: Hills
Landform position (two-dimensional): Summit
Landform position (three-dimensional): Crest
Down-slope shape: Convex
Across-slope shape: Convex
Parent material: Clayey residuum weathered from limestone and dolomite

Typical profile

A+BA - 0 to 8 inches: channery silt loam
Bt1+Bt2 - 8 to 29 inches: silty clay loam
Bt3—>C - 29 to 80 inches: channery clay

Properties and qualities

Slope: 3 to 8 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Well drained
Runoff class: Medium
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high (0.57 to 1.98 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Moderate (about 8.5 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2e
Hydrologic Soil Group: B
Ecological site: F127XY013WV - Divergent Uplands
Other vegetative classification: Moist Loams (ML3)
Hydric soil rating: No

Data Source Information

Soil Survey Area: Greenbrier County, West Virginia
Survey Area Data: Version 19, Aug 28, 2024

APPENDIX D
WV FLOOD MAP

630 Cross Lanes Drive
Nitro, West Virginia 25314

Telephone: (304) 776-6717
Fax: (304) 776-6769

WV Flood Map

This map is not the official regulatory FIRM or DFIRM. Its purpose is to assist with determining potential flood risk for the selected location.

HIGH RISK

	Regulatory Floodway
Zone AE	1-Percent-Annual-Chance Flood Hazard Area **With Base Flood Elevation** (BFE)
Zone A	1-Percent-Annual-Chance Flood Hazard Area **Without BFE** (may have Advisory Flood Heights)
Advisory	1-Percent-Annual-Chance Future Conditions (High Risk Advisory Flood Zones)

Download the Full Legend for all flood tool symbols
https://www.mapwv.gov/flood/map/docs/wv_flood_tool_legend.pdf

Disclaimer:
The online map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. Refer to the official Flood Insurance Study (FIS) for detailed flood elevation data in flood profiles and data tables. WV Flood Tool (*https://www.MapWV.gov/flood*) is supported by FEMA, WV NFIP Office, and WV GIS Technical Center.

Project code: 2025-0064367
Project Name: WVSOM Addition NEPA Assessment

Federal Nexus: yes
Federal Action Agency (if applicable): Health Resources and Services Administration

Subject: Record of project representative's no effect determination for 'WVSOM Addition NEPA Assessment'

Dear Lucinda Kendall:

This letter records your determination using the Information for Planning and Consultation (IPaC) system provided to the U.S. Fish and Wildlife Service (Service) on March 05, 2025, for 'WVSOM Addition NEPA Assessment' (here forward, Project). This project has been assigned Project Code 2025-0064367 and all future correspondence should clearly reference this number. **Please carefully review this letter.**

Ensuring Accurate Determinations When Using IPaC

The Service developed the IPaC system and associated species' determination keys in accordance with the Endangered Species Act of 1973 (ESA; 87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.) and based on a standing analysis. All information submitted by the Project proponent into IPaC must accurately represent the full scope and details of the Project.

Failure to accurately represent or implement the Project as detailed in IPaC or the **Northern Long-eared Bat and Tricolored Bat Range-wide Determination Key (Dkey)**, invalidates this letter. ***Answers to certain questions in the DKey commit the project proponent to implementation of conservation measures that must be followed for the ESA determination to remain valid.***

Determination for the Northern Long-Eared Bat and/or Tricolored Bat

Based upon your IPaC submission and a standing analysis, your project has reached the following effect determinations:

Species	Listing Status	Determination
Northern Long-eared Bat (*Myotis septentrionalis*)	Endangered	No effect

Tricolored Bat (*Perimyotis subflavus*)	Proposed Endangered	No effect

Federal agencies must consult with U.S. Fish and Wildlife Service under section 7(a)(2) of the Endangered Species Act (ESA) when an action *may affect* a listed species. Tricolored bat is proposed for listing as endangered under the ESA, but not yet listed. For actions that may affect a proposed species, agencies cannot consult, but they can *confer* under the authority of section 7(a)(4) of the ESA. Such conferences can follow the procedures for a consultation and be adopted as such if and when the proposed species is listed. Should the tricolored bat be listed, agencies must review projects that are not yet complete, or projects with ongoing effects within the tricolored bat range that previously received a NE or NLAA determination from the key to confirm that the determination is still accurate.

To make a no effect determination, the full scope of the proposed project implementation (action) should not have any effects (either positive or negative), to a federally listed species or designated critical habitat. Effects of the action are all consequences to listed species or critical habitat that are caused by the proposed action, including the consequences of other activities that are caused by the proposed action. A consequence is caused by the proposed action if it would not occur but for the proposed action and it is reasonably certain to occur. Effects of the action may occur later in time and may include consequences occurring outside the immediate area involved in the action. (See § 402.17).

Under Section 7 of the ESA, if a federal action agency makes a no effect determination, no consultation with the Service is required (ESA §7). If a proposed Federal action may affect a listed species or designated critical habitat, formal consultation is required except when the Service concurs, in writing, that a proposed action "is not likely to adversely affect" listed species or designated critical habitat [50 CFR §402.02, 50 CFR§402.13].

Other Species and Critical Habitat that May be Present in the Action Area

The IPaC-assisted determination key for the northern long-eared bat and tricolored bat does not apply to the following ESA-protected species and/or critical habitat that also may occur in your Action area:

- Green Floater *Lasmigona subviridis* Proposed Threatened
- Indiana Bat *Myotis sodalis* Endangered
- Monarch Butterfly *Danaus plexippus* Proposed Threatened
- Small Whorled Pogonia *Isotria medeoloides* Threatened
- Virginia Spiraea *Spiraea virginiana* Threatened

You may coordinate with our Office to determine whether the Action may affect the animal species listed above and, if so, how they may be affected.

Next Steps

If there are no updates on listed species, no further consultation/coordination for this project is required with respect to the species covered by this key. However, the Service recommends that project proponents re-evaluate the Project in IPaC if: 1) the scope, timing, duration, or location of the Project changes (includes any project changes or amendments); 2) new information reveals the Project may impact (positively or negatively) federally listed species or designated critical habitat; or 3) a new species is listed, or critical habitat designated. If any of the above conditions occurs, additional coordination with the Service should take place to ensure compliance with the Act.

If you have any questions regarding this letter or need further assistance, please contact the West Virginia Ecological Services Field Office and reference Project Code 2025-0064367 associated with this Project.

Action Description
You provided to IPaC the following name and description for the subject Action.

1. Name

WVSOM Addition NEPA Assessment

2. Description

The following description was provided for the project 'WVSOM Addition NEPA Assessment':

> The West Virginia School of Osteopathic Medicine is building an addition to their Science Building. Per HRSA, Phase I and NEPA Environmental Assessments are to be completed first.

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@37.8045051,-80.43626249288853,14z

DETERMINATION KEY RESULT

Based on the information you provided, you have determined that the Proposed Action will have no effect on the species covered by this determination key. Therefore, no consultation with the U.S. Fish and Wildlife Service pursuant to Section 7(a)(2) of the Endangered Species Act of 1973 (87 Stat. 884, as amended 16 U.S.C. 1531 *et seq.*) is required for those species.

QUALIFICATION INTERVIEW

1. Does the proposed project include, or is it reasonably certain to cause, intentional take of listed bats or any other listed species?

   Note: Intentional take is defined as take that is the intended result of a project. Intentional take could refer to research, direct species management, surveys, and/or studies that include intentional handling/encountering, harassment, collection, or capturing of any individual of a federally listed threatened, endangered or proposed species?

   No

2. Is the action area wholly within Zone 2 of the year-round active area for northern long-eared bat and/or tricolored bat?

   Automatically answered
   No

3. Does the action area intersect Zone 1 of the year-round active area for northern long-eared bat and/or tricolored bat?

   Automatically answered
   No

4. Does any component of the action involve leasing, construction or operation of wind turbines? Answer 'yes' if the activities considered are conducted with the intention of gathering survey information to inform the leasing, construction, or operation of wind turbines.

   Note: For federal actions, answer ‘yes’ if the construction or operation of wind power facilities is either (1) part of the federal action or (2) would not occur but for a federal agency action (federal permit, funding, etc.).

   No

5. Is the proposed action authorized, permitted, licensed, funded, or being carried out by a Federal agency in whole or in part?

   Yes

6. Is the Federal Highway Administration (FHWA), Federal Railroad Administration (FRA), or Federal Transit Administration (FTA) funding or authorizing the proposed action, in whole or in part?

   No

7. Are you an employee of the federal action agency or have you been officially designated in writing by the agency as its designated non-federal representative for the purposes of Endangered Species Act Section 7 informal consultation per 50 CFR § 402.08?

   Note: This key may be used for federal actions and for non-federal actions to facilitate section 7 consultation and to help determine whether an incidental take permit may be needed, respectively. This question is for information purposes only.

   No

8. Is the lead federal action agency the Environmental Protection Agency (EPA) or Federal Communications Commission (FCC)? Is the Environmental Protection Agency (EPA) or Federal Communications Commission (FCC) funding or authorizing the proposed action, in whole or in part?

   No

9. Is the lead federal action agency the Federal Energy Regulatory Commission (FERC)?

   No

10. Have you contacted the appropriate agency to determine if your action is near any known northern long-eared bat or tricolored bat **hibernacula**?

    Note: A document with links to Natural Heritage Inventory databases and other state-specific sources of information on the locations of northern long-eared bat and tricolored bat hibernacula is available here. Location information for northern long-eared bat and tricolored bat hibernacula is generally kept in state natural heritage inventory databases – the availability of this data varies by state. Many states provide online access to their data, either directly by providing maps or by providing the opportunity to make a data request. In some cases, to protect those resources, access to the information may be limited.

    Yes

11. Is any portion of the action area within 0.5-mile radius of any known bat **hibernacula**?

    If unsure, contact your local Ecological Services Field Office.

    No

12. Have you contacted the appropriate agency to determine if your action is near any known occupied culverts?

    Note: A document with links to Natural Heritage Inventory databases and other state-specific sources of information on the locations of northern long-eared bat and tricolored bat hibernacula is available here. Location information for northern long-eared bat and tricolored bat hibernacula is generally kept in state natural heritage inventory databases – the availability of this data varies by state. Many states provide online access to their data, either directly by providing maps or by providing the opportunity to make a data request. In some cases, to protect those resources, access to the information may be limited.

    Yes

13. Is any portion of the action area within a 0.25-mile radius of any known bat occupied culvert? If unsure, contact your local Ecological Services Field Office.

    No

14. Does the action area contain any winter roosts or caves (or associated sinkholes, fissures, or other karst features), mines, rocky outcroppings, or tunnels that could provide habitat for hibernating bats?

    No

15. Will the action cause effects to a bridge?

    Note: Covered bridges should be considered as bridges in this question.

    No

16. Will the action result in effects to a culvert or tunnel at any time of year?

    No

17. Are trees present within 1000 feet of the action area?

    Note: If there are trees within the action area that are of a sufficient size to be potential roosts for bats answer "Yes". If unsure, additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in Appendix A of the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines at: https://www.fws.gov/media/range-wide-indiana-bat-and-northern-long-eared-bat-survey-guidelines.

    Yes

18. Does the action include the intentional exclusion of bats from a building or structure?

    Note: Exclusion is conducted to deny bats' entry or reentry into a building. To be effective and to avoid harming bats, it should be done according to established standards. If your action includes bat exclusion and you are unsure whether northern long-eared bats or tricolored bats are present, answer "Yes." Answer "No" if there are no signs of bat use in the building/structure. If unsure, contact your local Ecological Services Field Office to help assess whether northern long-eared bats or tricolored bats may be present. Contact a Nuisance Wildlife Control Operator (NWCO) for help in how to exclude bats from a structure safely without causing harm to the bats (to find a NWCO certified in bat standards, search the Internet using the search term "National Wildlife Control Operators Association bats"). Also see the White-Nose Syndrome Response Team's guide for bat control in structures.

    No

19. Does the action involve removal, modification, or maintenance of a human-made structure (barn, house, or other building) **known or suspected to contain roosting bats?**

    No

20. Will the action cause construction of one or more new roads open to the public?

    For federal actions, answer 'yes' when the construction or operation of these facilities is either (1) part of the federal action or (2) would not occur but for an action taken by a federal agency (federal permit, funding, etc.).

    No

21. Will the action include or cause any construction or other activity that is reasonably certain to increase average daily traffic permanently or temporarily on one or more existing roads?

    Note: For federal actions, answer ‘yes’ when the construction or operation of these facilities is either (1) part of the federal action or (2) would not occur but for an action taken by a federal agency (federal permit, funding, etc.). .

    Yes

22. Will the increased vehicle traffic occur on any road that lies between any two areas of contiguous forest that are each greater than or equal to 10 acres in extent and are separated by less than 1,000 feet? Bats may cross a road by flying between forest patches that are up to 1,000 feet apart.

    Note: "Contiguous forest" of 10 acres or more may includes areas where multiple forest patches are separated by less than 1,000 feet of non-forested area if the forested patches, added together, comprise at least 10 acres.

    No

23. Will the proposed Action involve the creation of a new water-borne contaminant source (e.g., leachate pond, pits containing chemicals that are not NSF/ANSI 60 compliant)?

    Note: For information regarding NSF/ANSI 60 please visit https://www.nsf.org/knowledge-library/nsf-ansi-standard-60-drinking-water-treatment-chemicals-health-effects

    No

24. Will the proposed action involve the creation of a new point source discharge from a facility other than a water treatment plant or storm water system?

    No

25. Will the action include drilling or blasting?

    No

26. Will the action involve military training (e.g., smoke operations, obscurant operations, exploding munitions, artillery fire, range use, helicopter or fixed wing aircraft use)?

    No

27. Will the proposed action involve the use of herbicides or other pesticides other than herbicides (e.g., fungicides, insecticides, or rodenticides)?

    No

28. Will the action include or cause activities that are reasonably certain to cause chronic or intense nighttime noise (above current levels of ambient noise in the area) in suitable summer habitat for the northern long-eared bat or tricolored bat during the active season?

    Chronic noise is noise that is continuous or occurs repeatedly again and again for a long time. Sources of chronic or intense noise that could cause adverse effects to bats may include, but are not limited to: road traffic; trains; aircraft; industrial activities; gas compressor stations; loud music; crowds; oil and gas extraction; construction; and mining.

    Note: Additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in Appendix A of the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines at: https://www.fws.gov/media/range-wide-indiana-bat-and-northern-long-eared-bat-survey-guidelines.

    No

29. Does the action include, or is it reasonably certain to cause, the use of permanent or temporary artificial lighting within 1000 feet of suitable northern long-eared bat or tricolored bat roosting habitat?

    Note: Additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in Appendix A of the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines at: https://www.fws.gov/media/range-wide-indiana-bat-and-northern-long-eared-bat-survey-guidelines.

    No

30. Will the action include tree cutting or other means of knocking down or bringing down trees, tree topping, or tree trimming?

    Yes

31. Will the proposed action occur exclusively in an already established and currently maintained utility right-of-way?

    No

32. Does the action include emergency cutting or trimming of hazard trees in order to remove an imminent threat to human safety or property? See hazard tree note at the bottom of the key for text that will be added to response letters

    Note: A "hazard tree" is a tree that is an immediate threat to lives, public health and safety, or improved property.

    No

33. Does the project intersect with the 0- 9.9% forest density category?

    Automatically answered
    No

34. Does the project intersect with the 10.0- 19.9% forest density category map?

    Automatically answered
    Yes

35. Does the project intersect with the 20.0- 29.9% forest density category map?

    Automatically answered
    No

36. Does the project intersect with the 30.0- 100% forest density category map?

    Automatically answered
    No

37. Will the action cause trees to be cut, knocked down, or otherwise brought down across an area greater than 5 acres in total extent?

    No

38. Will the proposed action result in the use of prescribed fire?

    Note: If the prescribed fire action includes other activities than application of fire (e.g., tree cutting, fire line preparation) please consider impacts from those activities within the previous representative questions in the key. This set of questions only considers impacts from flame and smoke.

    No

39. Does the action area intersect the northern long-eared bat species list area?

    Automatically answered
    Yes

40. [Semantic] Is the action area located within 0.25 miles of a culvert that is known to be occupied by northern long-eared or tricolored bats?

    Automatically answered
    No

41. Have you contacted the appropriate agency to determine if your action is within 150 feet of any documented northern long-eared bat roosts?

    Note: A document with links to Natural Heritage Inventory databases and other state-specific sources of information on the locations of northern long-eared bat roosts is available here. Location information for northern long-eared bat roosts is generally kept in state natural heritage inventory databases – the availability of this data varies by state. Many states provide online access to their data, either directly by providing maps or by providing the opportunity to make a data request. In some cases, to protect those resources, access to the information may be limited.

    Yes

42. Is any portion of the action area within 150 feet of any known northern long-eared bat roosts? If unsure, contact your local Ecological Services Field Office.

    No

43. Is suitable summer habitat for the northern long-eared bat present within 1000 feet of project activities?
If unsure, answer "Yes."

    Note: Additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in Appendix A of the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines at: https://www.fws.gov/media/range-wide-indiana-bat-and-northern-long-eared-bat-survey-guidelines.

    No

44. Does the action area intersect the tricolored bat species list area?

    Automatically answered
    Yes

45. [Semantic] Is the action area located within 0.25 miles of a culvert that is known to be occupied by northern long-eared or tricolored bats?

    Note: The map queried for this question contains proprietary information and cannot be displayed. If you need additional information, please contact your State wildlife agency.

    Automatically answered
    No

46. Have you contacted the appropriate agency to determine if your action is within 150 feet of any documented tricolored bat roosts?

    Note: A document with links to Natural Heritage Inventory databases and other state-specific sources of information on the locations of tricolored bat roosts is available here. Location information for tricolored bat roosts is generally kept in state natural heritage inventory databases – the availability of this data varies by state. Many states provide online access to their data, either directly by providing maps or by providing the opportunity to make a data request. In some cases, to protect those resources, access to the information may be limited.

    Yes

47. Is any portion of the action area within 150 feet of any documented tricolored bat roosts?
If unsure, contact your local Ecological Services Field Office.

    No

48. Have you contacted the appropriate agency to determine if the action area overlaps with a known tricolored bat habitat buffer? Summer habitat buffers include the following: (1) 3-mile buffer around tricolored bat captures or acoustic detections; (2)1.5-mile buffer around known roosts). The Spring Staging/Fall Swarming buffer includes a 3-mile buffer around the entrance of known hibernacula)?

    Note: A web page with links to state Natural Heritage Inventory databases and other sources of information on the locations of tricolored bat roost trees can be found here. Location information for tricolored bat maternity roost trees and swarming areas is generally kept in state natural heritage inventory databases – the availability of this data varies state-by-state. Many states provide online access to their data, either directly by providing maps or by providing the opportunity to make a data request. In some cases, to protect those resources, access to the information may be limited. If you'd like to assume presence of tricolored bats, answer "No".

    Yes

49. Does the action area intersect a known Spring Staging/Fall Swarming tricolored bat buffer (within 3 miles of known hibernacula)?

    No

50. Does the action area intersect a known tricolored bat summer buffer (3-mile buffer around tricolored bat captures or detections; 1.5-mile buffer around known roost trees)?

    No

51. Has a presence/probable absence bat survey targeting the tricolored bat and following the Service's Range-wide Indiana Bat and Northern Long-Eared Bat Survey Guidelines been conducted within the project area?

    No

52. Is suitable summer habitat for the tricolored bat present within 1000 feet of project activities?
    (If unsure, answer ""Yes."")

    Note: If there are trees within the action area that may provide potential roosts for tricolored bats (e.g., clusters of leaves in live and dead deciduous trees, Spanish moss (Tillandsia usneoides), clusters of dead pine needles of large live pines) answer ""Yes."" For a complete definition of suitable summer habitat for the tricolored bat, please see Appendix A in the Service's Range-wide Indiana Bat and Northern long-eared Bat Survey Guidelines.

    No

53. Do you have any documents that you want to include with this submission?

    No

PROJECT QUESTIONNAIRE

Enter the extent of the action area (in acres) from which trees will be removed - round up to the nearest tenth of an acre. For this question, include the entire area where tree removal will take place, even if some live or dead trees will be left standing.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*). If you determine that other federally protected species not listed in this Official Species List are present in your action area, you are still responsible to analyze your potential effects to those species and consult with the U.S. Fish and Wildlife Service if consultation is required.

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of

this letter with any request for consultation or correspondence about your project that you submit to our office.

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

West Virginia Ecological Services Field Office
6263 Appalachian Highway
Davis, WV 26260-8061
(304) 866-3858

PROJECT SUMMARY

Project Code: 2025-0064367
Project Name: WVSOM Addition NEPA Assessment
Project Type: Commercial Development
Project Description: The West Virginia School of Osteopathic Medicine is building an addition to their Science Building. Per HRSA, Phase I and NEPA Environmental Assessments are to be completed first.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@37.8045051,-80.43626249288853,14z

Counties: Greenbrier County, West Virginia

ENDANGERED SPECIES ACT SPECIES

There is a total of 7 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 1 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

MAMMALS

NAME	STATUS
Indiana Bat *Myotis sodalis* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. This species only needs to be considered under the following conditions: ▪ All activities in this location should consider potential effects to this species. This project is not within a known-use area, but potentially occupied habitat may exist. Please contact the WVFO for further coordination. Species profile: https://ecos.fws.gov/ecp/species/5949	Endangered
Northern Long-eared Bat *Myotis septentrionalis* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9045	Endangered
Tricolored Bat *Perimyotis subflavus* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/10515	Proposed Endangered

CLAMS

NAME	STATUS
Green Floater *Lasmigona subviridis* There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/7541	Proposed Threatened

INSECTS

NAME	STATUS
Monarch Butterfly *Danaus plexippus* There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/9743	Proposed Threatened

FLOWERING PLANTS

NAME	STATUS
Small Whorled Pogonia *Isotria medeoloides* Population: No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/1890	Threatened
Virginia Spiraea *Spiraea virginiana* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/1728	Threatened

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The Bald and Golden Eagle Protection Act of 1940.
2. The Migratory Birds Treaty Act of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

There are Bald Eagles and/or Golden Eagles in your project area.

Measures for Proactively Minimizing Eagle Impacts
For information on how to best avoid and minimize disturbance to nesting bald eagles, please review the National Bald Eagle Management Guidelines. You may employ the timing and activity-specific distance recommendations in this document when designing your project/ activity to avoid and minimize eagle impacts. For bald eagle information specific to Alaska, please refer to Bald Eagle Nesting and Sensitivity to Human Activity.

The FWS does not currently have guidelines for avoiding and minimizing disturbance to nesting Golden Eagles. For site-specific recommendations regarding nesting Golden Eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

If disturbance or take of eagles cannot be avoided, an incidental take permit may be available to authorize any take that results from, but is not the purpose of, an otherwise lawful activity. For assistance making this determination for Bald Eagles, visit the Do I Need A Permit Tool. For

assistance making this determination for golden eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

Ensure Your Eagle List is Accurate and Complete
If your project area is in a poorly surveyed area in IPaC, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the Supplemental Information on Migratory Birds and Eagles, to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to bald or golden eagles on your list, see the "Probability of Presence Summary" below to see when these bald or golden eagles are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Sep 1 to Aug 31

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (■)
Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)
Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

■ probability of presence ■ breeding season | survey effort – no data

MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) [1] prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service). The incidental take of migratory birds is the injury or death of birds that results from, but is not the purpose, of an activity. The Service interprets the MBTA to prohibit incidental take.

WETLANDS

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

THERE ARE NO WETLANDS WITHIN YOUR PROJECT AREA.

WVSOM ADDITION NEPA ASSESSMENT

BIOLOGICAL ANALYSIS

Prepared using IPaC

Generated by Lucinda Kendall (lmkendall@enviroprobeinc.com)

May 1, 2025

The purpose of this document is to assess the effects of the proposed project and determine whether the project may affect any federally threatened, endangered, proposed, or candidate species. If appropriate for the project, this document may be used as a biological assessment (BA), as it is prepared in accordance with legal requirements set forth under Section 7 of the Endangered Species Act (16 U.S.C. 1536 (c)).

In this document, any data provided by U.S. Fish and Wildlife Service is based on data as of April 8, 2025.

Prepared using IPaC version 6.126.0-rc2

1 DESCRIPTION OF THE ACTION

1.1 PROJECT NAME

WVSOM Addition NEPA Assessment

1.2 EXECUTIVE SUMMARY

As part of a NEPA Environmental Assessment, the effects to the environment, including select species and their habitat, of a proposed project to renovate and construct an addition to the West Virginia School of Osteopathic Medicine's (WVSOM's) Fredric W. Smith Science Building have been considered. Due to the project occurring on the WVSOM campus at an existing building, it is unlikely that any adverse effects would occur. The project does not include any areas that are not currently inhabited by people, walkways, and campus buildings.

1.3 EFFECT DETERMINATION SUMMARY

SPECIES (COMMON NAME)	SCIENTIFIC NAME	LISTING STATUS	PRESENT IN ACTION AREA	EFFECT DETERMINATION
Green Floater	Lasmigona subviridis	Proposed Threatened	Excluded from analysis	Excluded from analysis
Indiana Bat	Myotis sodalis	Endangered	No	NE
Monarch Butterfly	Danaus plexippus	Proposed Threatened	Excluded from analysis	Excluded from analysis
Northern Long-eared Bat† **. This species or critical habitat is covered by a DKey.**	Myotis septentrionalis	Endangered		NE

1.4.4 PROJECT PURPOSE

The proposed project is necessary renovation of existing facilities and an expansion of laboratory and faculty space at the West Virginia School of Osteopathic Medicine - Fredric W. Smith Science Building. The proposal includes:

- Building a new addition
- Increasing the size of the roof generator
- Upgrades to the elevator
- Installation of ADA controls on the main entrance doors
- Various exterior repairs, structural repairs, and preventative maintenance,
- Various HVAC upgrades, humidification and dehumidification
- Interior renovation, and
- Replacement of the Fire alarm system.

1.4.5 PROJECT TYPE AND DECONSTRUCTION

This project is a residential, commercial, industrial development project.

1.4.5.1 PROJECT MAP

LEGEND

Project footprint

Layer 1: Maintain building, building (structure)

Layer 3: Landscaping/restoration, maintain access road, minimize erosion from disturbed areas, staging area construction, sidewalk/bike path (structure)

1.4.5.2 BUILDING

STRUCTURE COMPLETION DATE
Unspecified

REMOVAL/DECOMMISSION DATE (IF APPLICABLE)
Not applicable

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
This will be an addition to a building already on the WVSOM campus. The grounds are already occupied by buildings, people, walkways, and grass.

1.4.5.3 SIDEWALK/BIKE PATH

STRUCTURE COMPLETION DATE
Unspecified

REMOVAL/DECOMMISSION DATE (IF APPLICABLE)
Not applicable

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
Upgrade current walkway. There will be no added stressors.

1.4.5.4 LANDSCAPING/RESTORATION

ACTIVITY START DATE
Unspecified

ACTIVITY END DATE
Unspecified

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
Current grasses will be replanted as needed to cover soil after construction.

1.4.5.5 MAINTAIN ACCESS ROAD

ACTIVITY START DATE
Unspecified

ACTIVITY END DATE
Unspecified

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
If needed, maintain the road during and after construction vehicles drive on it. The roadway is already there, so there should be no additional stressors.

1.4.5.6 MAINTAIN BUILDING

ACTIVITY START DATE
Unspecified

ACTIVITY END DATE
Unspecified

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
Upgrade parts of current building including HVAC, elevator, internal surfaces, etc. This should not contribute to stressors.

1.4.5.7 MINIMIZE EROSION FROM DISTURBED AREAS

ACTIVITY START DATE
Unspecified

ACTIVITY END DATE
Unspecified

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
Erosion controls will be deployed during and after construction to reduce any potential for stormwater to erode existing ground. Items such as erosion control netting, straw blankets, silt fence, etc. will be available and utilized as needed.

1.4.5.8 STAGING AREA CONSTRUCTION

ACTIVITY START DATE
Unspecified

ACTIVITY END DATE
Unspecified

STRESSORS
This activity is not expected to have any impact on the environment.

DESCRIPTION
Construction materials will potentially be staged on the current parking lot and not cause any additional stress.

1.4.6 ANTICIPATED ENVIRONMENTAL STRESSORS

Describe the anticipated effects of your proposed project on the aspects of the land, air and water that will occur due to the activities above. These should be based on the activity deconstructions done in the previous section and will be used to inform the action area.

1.5 ACTION AREA

LEGEND

Project footprint

Stressor location

1.6 CONSERVATION MEASURES

Describe any proposed measures being implemented as part of the project that are designed to reduce the impacts to the environment and their resulting effects to listed species. To avoid extra verbiage, don't list measures that have no relevance to the species being analyzed.

No conservation measures have been selected for this project.

1.7 PRIOR CONSULTATION HISTORY

I have not information about other consultations.

1.9 OTHER REPORTS AND HELPFUL INFORMATION

In 2021, a Master Plan for multiple upgrades to the WVSOM campus was created. The Master Plan includes information about the Fredric W. Smith Science Building. However, the plans for the addition have changed since 2021. See uploaded document for reference.

RELEVANT DOCUMENTATION

- 12a - WVSOM Master Plan 2021

2 SPECIES EFFECTS ANALYSIS

This section describes, species by species, the effects of the proposed action on listed, proposed, and candidate species, and the habitat on which they depend. In this document, effects are broken down as direct interactions (something happening directly to the species) or indirect interactions (something happening to the environment on which a species depends that could then result in effects to the species).

These interactions encompass effects that occur both during project construction and those which could be ongoing after the project is finished. All effects, however, should be considered, including effects from direct and indirect interactions and cumulative effects.

2.1 GREEN FLOATER

This species has been excluded from analysis in this environmental review document.

JUSTIFICATION FOR EXCLUSION

The construction of the addition to the Science building is contained on the WVSOM site, which is an active school of osteopathic medicine. The plans will only affect property that is already in use with students and faculty.

2.2 INDIANA BAT

This species has been excluded from analysis in this environmental review document.

JUSTIFICATION FOR EXCLUSION

The construction of the addition to the Science building is contained on the WVSOM site, which is an active school of osteopathic medicine. The plans will only affect property that is already in use with students and faculty.

2.3 MONARCH BUTTERFLY

This species has been excluded from analysis in this environmental review document.

JUSTIFICATION FOR EXCLUSION

The construction of the addition to the Science building is contained on the WVSOM site, which is an active school of osteopathic medicine. The plans will only affect property that is already in use with students and faculty.

3 CRITICAL HABITAT EFFECTS ANALYSIS

No critical habitats intersect with the project action area.

4 SUMMARY DISCUSSION AND CONCLUSION

4.1 SUMMARY DISCUSSION

There should be no significant impact to the environment or to species and their critical habitat. This is due to the project being completed on the already occupied WVSOM campus to upgrade and add to an existing building. There will be no areas outside of the campus disturbed.

4.2 CONCLUSION

In conclusion, it is believed that this project will have no adverse effects on the environment and species' critical habitat. The project includes renovations and an addition to a currently existing building on the WVSOM campus and will not affect any other areas.

Dear Ms Kendall, Mr. Capper, and Ms. Sergent

We have reviewed Natural Heritage Program files for information on rare, threatened, and endangered (RTE) species and sensitive habitats for the area of the proposed West Virginia School of Osteopathic Medicine building extension project in Lewisburg, Greenbrier County.

According to our database, the project lies within the buffer of one RTE species and one state rare species. There are no bats, reproducing trout streams, or bald eagle nests within the project buffer.

Species (Latin Name) or Habitat Feature	Common Name	Location/Description	Status
Etheostoma osburni	Candy darter	HUC 10 Wolf Creek Greenbrier River	Federal: endangered
Sygobromus spinatus	Spring cave amphipod	Surrounding project	State: rare crustacean

The information provided above is the product of a database search and retrieval. This information does not satisfy other consultation or permitting requirements for disturbances to the natural resources of the state, and further consultation may be required.

The information provided is the result of a search of the following bat buffers: summer occurrences, captures, and hibernacula for each of the Indiana bat, northern long-eared bat, Virginia big-eared bat, and tricolored bat. Data provided include and differentiate between the inner- and outer-tiers of capture, roost and hibernacula records, respectively, and identify anthropogenic sites such as bridges and culverts. All buffer types and distances are consistent with U.S. Fish and Wildlife Service values as of December 13th, 2024. Please note that due to

changes in the U.S. Fish and Wildlife Service guidance, and concurrent updates to the WVDNR records database, new records request responses may differ from past requests. In particular, the current U.S. Fish and Wildlife Service guidance reduces northern long-eared bat and tricolored bat buffers at culverts, bridges, and at all tricolored bat hibernacula. The information provided above is the product of a database search and retrieval. This information does not satisfy other consultation or permitting requirements for disturbances to the natural resources of the state, and further consultation may be required.

Additionally, any concurrence requirements for federally listed species must come from the US Fish and Wildlife Service. The Wildlife Resources Section knows of no other surveys that have been conducted in the area for rare species or rare species habitat. Consequently, this response is based on information currently available and should not be considered a comprehensive survey of the area under review. This response is valid for two years.

Thank you for your inquiry, and should you have any questions please feel free to contact me at the number below, or Anne.M.Wakeford@wv.gov. Enclosed please find an invoice.

RE: WVSOM Science Building Addition
HRSA FY 24 Grant No. CE1HS54324-229767
FR#: 25-1298-GB-1

Dear Ms. Kendall:

We have reviewed the information submitted in support of the above-referenced project. As required by Section 106 of the National Historic Preservation Act, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties", we submit our comments.

According to the submitted information, the West Virginia School of Osteopathic Medicine (WVSOM) proposes to renovate the Fredric W. Smith Science Building located at 400 Lee Street North in Lewisburg, Greenbrier County, West Virginia. The work will include increasing the roof generator, upgrading the elevator, upgrading the HVAC system, replacing the fire alarm system, and building an addition onto the building to house new laboratory space.

Architectural Resources:
Per our initial review letter dated April 24, 2025, we maintain that the proposed addition to the Smith Science building will have no adverse effect on any architectural resources eligible for or included in the National Register of Historic Places. The Smith Building was constructed in 1991 according to the WVSOM website history page and does not possess the historic character or significance to meet the criteria for evaluation for inclusion in the National Register. The proposed upgrades to this building will have no effect on any architectural resources eligible for or included in the National Register. No further consultation is necessary regarding architectural resources; however, we ask that you contact our office if your project should change.

Archaeological Resources:
A search of our records indicates that no previously recorded archaeological sites are located within the proposed project area. In addition, available information suggests that the proposed ground disturbing activities will be confined to previously disturbed areas. Therefore, it is

unlikely that significant archaeological resources will be encountered. In our opinion, the proposed project will have no effect on archaeological historic properties. No further consultation is necessary regarding archaeological resources. However, if cultural materials are encountered during construction, cease all activity within the area of discovery and contact this office immediately.

We appreciate the opportunity to be of service. *If you have questions regarding our comments or the Section 106 process, please contact Abigail M. Ayers, Structural Historian, or Carolyn M. Kender, Archaeologist, at (304) 558-0240*.

Sincerely,

Susan M. Pierce
Deputy State Historic Preservation Officer

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 5 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

WV BROWNFIELDS: Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the WV BROWNFIELDS list, as provided by EDR, and dated 09/11/2024 has revealed that there are 2 WV BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 7 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WHITEAKERS EXXON & G	408 N JEFFERSON ST	NNW 0 - 1/8 (0.031 mi.)	C25	56

Year:	08
Waste:	RECEIVED MANIFEST #000038853VES ON 04/03/2007, SIGNED BY TRANSPORTER ON 03/19-20/2007 AND AT WASTE DISPOSAL/FINAL SITE ON 03/22/2007. SCHOOL USED TEMPORARY ID NUMBER THAT WAS ISSUED TO THEM ON 05/05/2005 (WVP000002269) AND THE MATERIALS WERE PICKEDUP BY TRANSPORTER ON 05/05/2005 AND DELIVERED TO DISPOSAL/FINAL SITE ON 05/06/2005, CLOSING OUT THE TEMPORARY ID NUMBER 30 DAYS FROM THE DATE OF ISSUE DATE OF 05/05/2005, WHICH WOULD BE 06/04/2005. A NEW TEMPORARY SHOULD HAVE BEEN REQUESTED, BUT WAS NOT AND THE WVDEP RECEIVED THE MANIFEST WHICH HAD THE 2005 30-DAY ID NO. ON IT. THE REPRESENTATIVE OF THE SCHOOL, GARY J. COCHRAN WAS CONTACTED BY ME AND ADVISED OF THEIR ERROR. HE WAS TOLD TO SEND IN A NEW REQUEST FOR A TEMPORARY ID TO COVER THE NEW HAZ-WASTE PICK-UP AS REFLECTED ON THE CURRENT MANIFEST AND I WOULD ISSUE A NEW TEMPORARY IN ORDER TO BE ABLE TO RECORD THE HAZ-WASTE REMOVAL AND DISPOSAL. THIS TEMPORARY ID (WVP000003028) IS FOR THIS. I REFERRED THE HAZ-WASTE REMOVAL WITHOUT REQUESTING A TEMPORARY ID TO ENVIRONMENTAL INSPECTOR PENNY HARRIS FOR FOLLOW-UP ON 04/03/2007. THE CURRENT MANIFEST LISTS THE FOLLOWING: 9b.1- WASTE FLAMMABLE LIQUIDS, CORROSIVE, N.O.S. 8, UN2824, PGII (001DF/00005P-D001/D002)-W::631651/A:TW1631851; 9b.2-WASTE TOXIC SOLIDS, ORGANIC, N.O.S. (EPINEPHRINE, ESERINE), 8.1, UN2811, P1 (001DF/00010P-P042/P204)-W:631651/A:TW163165; THIOCLYCOL, 6.1, UN2966, II, DOT-E-9168 (001CF/00005P)-W:631651/A:TW1631651; TOXINS, EXTRACTED FROM LIVING SOURCES,SOLID, N.O.S. (OKADAIC ACID), 6.1, UN3462, III, DOT-E, 9189 (001CF/00005P)-W:631651/A:TW1631651; CORROSIVE LIQUIDS, TOXIC , N.O.S. (GLUTARALDEHYDE, IODOACETIC ACID), 8, 6.1, UN2922, II (001DF/00005P)-W:631651/A:TW1631651; ENVIRONMENTALLY HAZARDOUSSUSTANCES, LIQUID, N.O.S., 9, UN3082, III (001DF/00005P)-W:631651/A:TW1631651. TOTAL HAZARDOUS WASTE = 15 POUNDS + NON-HAZARDOUS = 30 POUNDS. PER THIS TEMPORARY, NOT LQG-LARGE QUANTITY GENERATOR.
Comments:	REQUEST FOR TEMPORARY ID FAXED IN BY GARY J. COCHRAN OF THE SCHOOL'S MAINTENANCE SECTION PER MY SUGGESTION TO SUBMIT AFTER WVDEP RECEIVED A

WEST VIRGINIA SCHOOL OF OSTEOPATHIC MEDICINE-CLOSE (Continued) **S108477808**

MANIFEST SHOWING THEY REMOVED/SHIPPED FOR DISPOSAL HAZARDOUS WASTE FROM THE SCHOOL'S LABORATORY USING A 30-DAY TEMPORARY ID NUMBER ISSUED TO THE SCHOOL ON 05/05/2005 (WVP000002269). A MANIFEST WAS PROCESSED ON THE 2005 TEMPORARY ID, AND THE NUMBER WAS CLOSED AFTER 30 DAYS, AND THEREFORE, NOT RE-USABLE. COMMENTS SECTION OF NEW REQUEST: "RESIDUAL FROM LABORATORY WORK." "LABORATORY CHEMICALS (WASTE) LESS THAN 25 LBS/YEAR." NOT LQG-LARGE QUANTITY GENERATOR. REFERRED TO PENNY HARRIS FOR FOLLOW-UP FOR FAILURE TO REQUEST TEMPORARY ID OR PERMANENT ID. THIS TEMPORARY ID CLOSED EFF. 03/22/2007, THE DATE OF DELIVERY TO WASTE DISPOSAL SITE, WHICH IS PRIOR TO DATE OF REQUEST BECAUSE MR. COCHRAN SHIPPED USING A CLOSED NO. FOR THIS SITE FROM 05/05/2005 (WVP000002269.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D005

WV SCHOOL OF OSTEOPATHIC MEDICINE (Continued) **1010339510**

Waste Description:	Barium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D038
Waste Description:	Pyridine
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	P030
Waste Description:	Cyanides (Soluble Cyanide Salts), Not Otherwise Specified
Waste Code:	P042
Waste Description:	1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine
Waste Code:	P098
Waste Description:	Potassium Cyanide (Or) Potassium Cyanide K(Cn)
Waste Code:	P105

WV SCHOOL OF OSTEOPATHIC MEDICINE (Continued) **1010339510**

Waste Description:	Sodium Azide
Waste Code:	P204
Waste Description:	Physostigmine (Or) Pyrrolo[2,3-B]Indol-5-Ol, 1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethyl-Methylcarbamate (Ester), (3as-Cis)-
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Waste Code:	D043
Waste Description:	Vinyl Chloride
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of

WALMART SUPERCENTER (Continued) **1004803523**

One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

WALMART SUPERCENTER (Continued) **1004803523**

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U205

WALMART SUPERCENTER (Continued) **1004803523**

Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U409
Waste Description: Carbamic Acid, [1,2-Phenylenebis (Iminocarbonothioyl)]Bis-, Dimethyl Ester (Or) Thiophanate-Methyl

Waste Code: U411
Waste Description: U411

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Sites Listing
Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

WVSOM
400 LEE STREET
LEWISBURG, WV 24901

TARGET PROPERTY COORDINATES

Latitude (North):	37.804438 - 37° 48' 15.98''
Longitude (West):	80.436296 - 80° 26' 10.67''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	549624.2
UTM Y (Meters):	4184061.8
Elevation:	2154 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14455085 LEWISBURG, WV
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

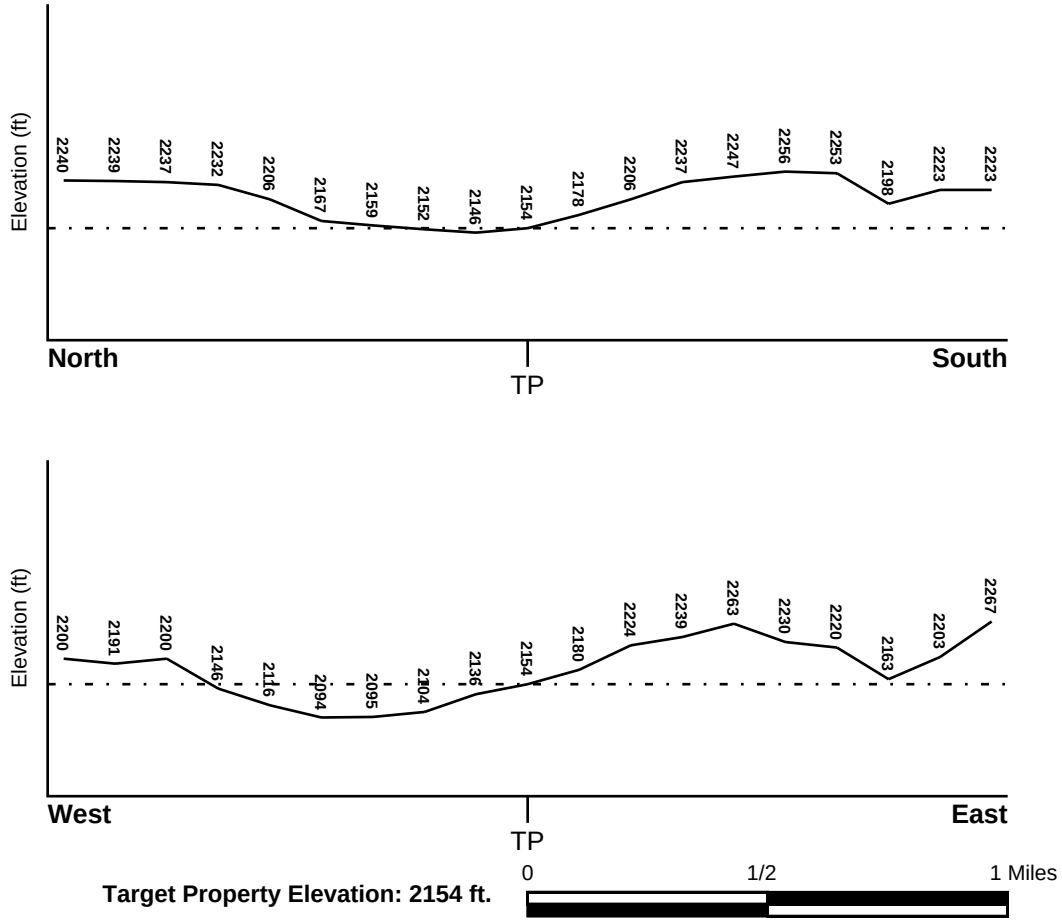
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 2154 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
54025C0645E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
54025C0630E	FEMA FIRM Flood data
54025C0635E	FEMA FIRM Flood data
5400400275B	FEMA Q3 Flood data
0000000000	FEMA Q3 Flood data
5400400355C	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LEWISBURG	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Frederick

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Not reported	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	7 inches	28 inches	silty clay loam	Not reported	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	28 inches	78 inches	channery clay	Not reported	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5

Soil Map ID: 2

Soil Component Name: Frederick

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 76 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Not reported	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5
2	7 inches	28 inches	silty clay loam	Not reported	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5
3	28 inches	78 inches	channery clay	Not reported	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 6 Min: 4.5

Soil Map ID: 3

Soil Component Name: Frederick

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

Federal EPA Radon Zone for GREENBRIER County: 1

Note: Zone 1 indoor average level > 4 pCi/L.
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
: Zone 3 indoor average level < 2 pCi/L.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: US Fish & Wildlife Service
Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

West Virginia Water Well Information
Source: Bureau of Public Health
Telephone: 304-558-6765
Community, non-community, non-transient non-community, non-public wells.

Telephone: 304-926-0450
Oil and Gas well locations in the state.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EPA Region 3 Statistical Summary Readings
Source: Region 3 EPA
Telephone: 215-814-2082
Radon readings for Delaware, D.C., Maryland, Pennsylvania, Virginia and West Virginia.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by EnviroProbe Integrations Solutions, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EnviroProbe Integrations Solutions, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 75BA-457A-921D

PO # 24-0453

Project WVSOM

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 75BA-457A-921D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

ENVIROPROBE INTEGRATED SOLUTIONS, INC.

2024 Résumé
Lucinda Kendall
Senior Environmental Scientist
lmkendall@enviroprobeinc.com

EDUCATION AND REGISTRATION

BS Geological Sciences-Water Resources | *Ohio University* 1991-1996
Coursework included environmental studies, geology, subsurface, hydrology, physics, chemistry, and mathematics.

EMPLOYMENT HISTORY

Senior Geologist | AECOM (2008—2024)
- Developed project scope, scheduling, data reduction, technical reports, National Pollutant Discharge Elimination System (NPDES) Discharge Monitoring Reports (DMRs), annual landfill reports, AST closure reports, Assessment of Corrective Measures (ACM) reports, Spill Prevention Response Plans (SPRP), Stormwater Pollution Prevention Plans (SWPPP), Groundwater Protection Plans (GPP) and ensured compliance with state and federal regulations (NPDES permits, air permits, groundwater, and AST regulations).

Geologist III | West Virginia Bureau for Public Health (BPH) (2004—2008)
- Researched and completed Source Water Assessment and Protection (SWAP) reports, maintained an access database for the Groundwater Under Direct Influence (GWUDI) program, taught the West Virginia (WV) Public Water Operator Class I and II courses for certification (Mathematics and Storage & Distribution), developed a math word problem training manual for water operators, taught Monitoring Well Driller training for certification in WV.

Staff Geologist | URS Corp. (2002—2004)
- Collected environmental samples such as surface water, soil, groundwater and pond sludge, acted as site geologist for drilling activities such as installation of monitoring wells, temporary boreholes, and Geoprobe soil sampling, entered data into spreadsheets, completed NPDES DMR reports, and participated in an 18-month groundwater and surface water investigation of the impact of the contaminant APFO per a consenter order, and co-managed a door to door water-use survey of approximately 6,000 households.

PROFESSIONAL EXPERIENCE

- Project management
- Technical report writing
- NPDES DMR reporting
- West Virginia Department of Environmental Protection (WVDEP) Electronic Submission System (ESS)
- Environmental Investigations
- Permit Renewal Applications
- Developed SWPPPs, SPRPs, GPPs, ACMs, and AST Closure Reports
- Solid Waste Management
- Data Reduction
- SWAP & GWUDI Reports
- Client and agency regulatory liaison
- Environmental Health & Safety Oversight
- Environmental Sampling
- Microsoft Office software (Word, Excel, Assess, PowerPoint)

ENVIROPROBE INTEGRATED SOLUTIONS, INC.

2025 Resume

Neil A. Capper, PE, LRS
Manager - Environmental Services
nacapper@enviroprobeinc.com

AREAS OF SPECIALIZATION

Neil A. Capper, PE, LRS is the Environmental Services Manager of EnviroProbe Integrated Solutions, Inc. (EnviroProbe), a professional engineering, environmental consulting, and drilling/direct-push firm. He possesses extensive experience providing solutions to a variety of complex engineering and environmental projects for various private, retail/commercial, and industrial clients, as well as state and federal government agencies.

EDUCATION AND REGISTRATION

- B.S. Civil Engineering, University of North Dakota - December 2015
- M.S. Environmental Toxicology, Clemson University - December 2006
- B.S. Marine Science, Coastal Carolina University - May 2004
- WV State Board of Registration for Professional Engineers (PE Reg. No. 26276)
- Licensed Remediation Specialist (LRS #250), WV Department of Environmental Protection
- WV Class B Underground Storage Tank Remover (#B872), WVDEP
- 40 Hour OSHA Hazardous Waste and Emergency Response (Current 8-hour Refresher)
- West Virginia Asbestos Inspector (AI010345)
- West Virginia Lead Inspector (PI000684) and Lead Risk Assessor (PA000408)
- Steel Tank Institute SP-001 Inspector (AST-990305)

EMPLOYMENT HISTORY

June 2007 - Present	EnviroProbe Integrated Solutions, Inc.
September 2006 – June 2007	Triad Environmental Consulting, Inc.
August 2004 – May 2006	Graduate Research Assistant – Clemson University
August 2003 – May 2004	Laboratory Assistant – Coastal Carolina University

PROFESSIONAL ORGANIZATIONS/AFFILIATIONS

- American Society of Civil Engineers (ASCE)
- Air and Waste Management Association (AWMA)
- Society of Environmental Toxicology and Chemistry (SETAC)
- Oil Marketers & Grocers Association (OM&GA)

PROFESSIONAL EXPERIENCE

ENVIRONMENTAL CONSULTING, ENGINEERING, AND MANAGEMENT

Mr. Capper offers a combination of project management, technical expertise and leadership experience in the environmental, engineering, regulatory compliance, and health and safety industry. His related experience and expertise is comprised of over 15 years completing engineering and environmental projects which have included:

- Engineering including:
  - Civil Engineering and Site Development
  - Environmental Engineering
- Environmental Site Assessments and Remediation
  - Phase I/II ESAs
  - Soil & Groundwater Investigations
  - Contamination Studies and Contaminant Fate and Transport
  - Soil Gas Investigations
  - Injection of Remediation Compounds
  - Indoor Air Quality Sampling/Investigations
  - Design of Soil & Groundwater Remediation Systems
  - "Brownfield" and Voluntary Remediation Program
  - Human Health and Environmental Risk Assessments
- Permits and Plans
  - General NPDES Permits
    - Construction Stormwater
    - Industrial Stormwater
    - Petroleum Remediation
  - Erosion and Sediment Control Plans
  - Underground Injection Control (UIC)
  - Spill Prevention, Control, and Countermeasures (SPCC)
  - Groundwater Protection Plans (GPP)
  - Stormwater Pollution Prevention Plans (SWPPP)
- Drilling
  - Environmental Drilling
    - Monitoring and Remediation Wells
    - Injection Wells
- Underground Storage Tanks (USTs)
  - Excavation, Removal, and Closure
  - Leaking UST Corrective Action
- Aboveground Storage Tanks (ASTs)
  - STI Inspections
  - SPCC/SPRP
  - GPP Plans
  - SWPPP Plans

ENVIRONMENTAL SITE ASSESSMENTS, RISK ASSESSMENTS, AND REMEDIATION

LEAKING UNDERGROUND STORAGE TANK (UST) SITES: Mr. Capper has been the Project Manager, Class B Remover, or Design Engineer for well over 100 UST/LUST closures, site assessments, and/or corrective action projects in WV, OH, PA, and VA. Suspected/Confirmed Releases; Initial Site Characterizations, Primary Site Assessments, development of Corrective Action Plans, design/implantation of free product recovery plans, design/implementation of soil and groundwater remediation systems, soil vapor extraction (SVE), dual-phase extraction (DPE), in-situ injection of remediation compounds, soil-gas sampling, waste management planning and consulting, permitting of treatment systems and discharges, remediation pilot testing, risk assessments, regulatory liaison; and expert testimony.

Brownfield and WVDEP Licensed Remediation Specialist: Mr. Capper has been the Licensed Remediation Specialist, Project Manager, or Risk Assessor for approximately 16 Brownfield/Voluntary Remediation Program (VRP)/Uniform Environmental Covenant Act (UECA) sites in West Virginia. These multi-disciplinary projects involved environmental site assessment, engineering, risk assessment, remediation work plan preparation/design, remediation work plan implementation, community involvement, and follow-up reporting and/or monitoring.

NEPA ENVIRONMENTAL ASSESSMENTS AND ENVIRONMENTAL IMPACT STATEMENTS (EISs): The National Environmental Policy Act (NEPA) of 1969 requires federal agencies to integrate environmental values into their decision-making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions. Mr. Capper has managed a number of EAs for projects funded by federal grants.

PHASE I ESAS – PROPERTY TRANSACTIONS: Phase I Environmental Site Assessments (ESAs) are performed in accordance with ASTM 1527-21, and in compliance with the "*All Appropriate Inquiry Standard*" specified by the Environmental Protection Agency. Mr. Capper is an ENVIRONMENTAL PROFESSIONAL as defined by the EPA in the AAI rule. Mr. Capper has managed and/or performed hundreds of Phase I Environmental Site Assessments that were intended to identify the presence or likely presence of hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of the hazardous substance or petroleum product into structures on the property or into the ground, groundwater, or surface water of the property. Mr. Capper has completed Phase I ESAs for banks, sellers, buyers, Architectural and Engineering firms, developers, manufacturers, chemical plants, city governments, and county governments.

PHASE II ESAS: Phase II ESAs are intrusive sampling events that many times occur after a Phase I ESA has identified a recognized environmental concern or as part of a regulatory compliance issue or suspected release of contaminants. Over his career, Mr. Capper has managed or performed hundreds of ESAs at various and numerous sites such as: UST/LUST sites, chemical plants/facilities, commercial property, residential property, city-owned property, county-owned property, manufacturing facilities, industrial facilities, industrial waste facilities, and Brownfield/Voluntary Remediation sites.

Spill Cleanup and Emergency Response

Mr. Capper has led teams that have responded to and performed emergency response and/or spill cleanup projects related to truck accidents, pipeline ruptures, and leaking tanks. These projects involve rapid response with the appropriate personnel and equipment as well as communication with regulatory agencies (i.e., WVDEP, EPA, DOT) and the public. Identification of and familiarity with the spilled or containerized product, possible unsafe chemical interactions/reactions, safe handling procedures, PPE requirements, environmental impacts (i.e., air, water/aquatic, soil), product transfer procedures, and waste management/disposal regulations are a crucial part of these projects.

CERCLA/RCRA/Superfund

Mr. Capper has been the project manager or project engineer for several projects involved in RCRA or CERCLA (NPL, Superfund) cleanups. These projects involved the investigation and remediation of soil and groundwater impacted by petroleum, polychlorinated biphenyls, dioxin, and other listed RCRA chemicals. These too are multi-disciplinary projects that involve drilling and sampling programs, QA/QC plans, laboratory sampling protocols, health and safety plans and concerns, waste management issues, regulatory hurdles, public involvement, remediation feasibility studies, risk assessment, remedial action work plans, implementation and monitoring of RAWPs, completion reporting, engineering controls, institutional controls, and/or long-term monitoring.

Energy and Resource Extraction

Mr. Capper's experience in the energy and resource extraction industries (i.e., oil & gas, coal, and timber) has been related to permitting, environmental assessment and remediation, due diligence, spill response and cleanup, waste management, environmental compliance audits, engineering/design, and drilling (environmental and geotechnical).

Permitting and Compliance

- NPDES Permitting
- Erosion and Sediment Control
- Underground Injection Control (UIC) Permits
- Compliance Audits
- Spill Prevention, Control and Countermeasure (SPCC) Plans
